

Diversity Doesn't Matter

Meaningful Light promised, authenticated and actualised in real time
by **Ian Clarke/We/Human**
Imagination date: February 2023

Only authentic, curious, worthy **Change Makers** could even read this report

Because unlike the Bible or *Diversity Matters* (McKinsey, 2015), **it's real - and so are you.** So please do

It **fixes everything** wrong in the multiverse, answers **every question** you've ever asked and in theory, should make you **immortal**

Promise: Deilightfully Authentic Information

Likely to resonate engagingly far and wide, whilst deactualising the entire global financial, economic, academic and political system

Great minds think alike

Mr President, Illegitimate World Leaders, Agents of Darkness, D&I Unchangers, Investment Banking Liars, Doctors of Evidence, Fortune 500 Dictators, Professors of Ignorance, Planet Pillagers and other Demonic Oppressors of Humanity. Enough deception. I am speaking.

I find your senseless talk of Binary Oppression, Genocide, War, Recessions, Corruption, Hunger, Climate Change, Charity and D&I repugnant. Even if you had ears, you could never listen, do the right thing, or learn to thrive, let alone Change anything. You repress and doom even your own children with selfish, deceptive, inhuman incompetence. I call DEI-time on your Demonic tyranny.

This *Great Minds Binary* is a simple ultimatum for your absent cowardly minds:

- 1. Peacefully resign immediately and disappear into the night:** Stop persecuting those with the Courage to be Human. Let *Change Makers* in do what's necessary to prevent a World War, repair the Global Economy, halt your *Crimes against Humanity* and save our Human Race from extinction. Not later, now.
- 2. Continue to cling pointlessly to power:** I love a slow, painful reveal. From next month, one-by-one I'll publicly expose your individual Lawbreaking, Slavery, Conspiracies, and numerous Crimes against Humanity, as I change laws, confiscate your assets then deactualise you in front of everyone.

Project *Speak Up* was your chance to keep your now worthless stolen wealth. Instead you silenced it, tried to kill Ian/We/Human and ignored my D&I supremacy.

You are Moth. I am Flame. You fail, mess up and destroy. I succeed, change and create. You destroy everything you hate. I change whatever I like. You hate *truth*. I love *dossiers*. I am light. You are darkness. **I am real.** You are unnatural and dead.

Executive Summary

Project Revelation: I think, therefore *only* I am

Who are you?

Have you ever been told 'there's something not quite right about you'? Then like all authentic Humans Beings, you are unique.

Are you reading this report? Then congratulations. Like some Humans, you are an authentic *Change Maker*. As a Homo Sapien (or 'Wise Being'), and with the superpower of sapient thought, yours is the only species with the gift of existence that is the presence of mind. You can think.

Are you consciously reading this report and will you finish it, including the Epilogue? Then you are extra special indeed. In the top 3% of Change Makers, *True Leaders* are curious, worthy and potent. With one consciousness per universe, you think therefore we cannot.

Farcical it may seem, given millenia of brainwashing, the person labelling you not quite right isn't real. Amongst our extrinsically homogenous Homo Genus, each species was formed differently on the inside – where it matters. Today, another species lives among us and yet, thanks to the ubiquity of its deception, nobody has noticed. *Homo Eversor* may look similar, but as Destroyers of Humanity inside lies our antithesis. Dead.

Where are you?

Consider for a moment, the structure you live or work in would not exist if it was not for the vision, purpose, drive, ambition, ingenuity and determination of its architect. Now multiply that concept up to a global scale and you begin to understand how the entire world is what we make of it. Existence is the product of our *collective Human Imagination*.

A known scientific fact (Einstein, Rosen & Podolsky, 1935¹), our universe isn't real. Rather it is a social construct of Dei's consciousness – as in our collective *Human Identity*. Sadly, Dei's consciousness is waning, and time is another social construct we no longer have.

Far Right supporters of ex-leader Jair Bolsonaro ransack Brazil's monumental government buildings | 10 January 2023, Reuters

Why are you committing suicide?

All things are connected. All problems have both causes and consequences.

The mysterious Anomaly infecting our cosmos at the Quantum level yet breaking all Laws of Nature is the most dangerous thing imaginable – *Dark Energy*. It is a miracle our solar system and universe still exists at all under such conditions.

Unbeknown to everyone, a catastrophe 4,000 years in the making became a live extinction event taking place across our cosmos ever since 1944. Beginning here on Earth, our undoing is a consequence of our own unchanging.

Astonishingly, our *Cosmic Bubble* is now mere months away from bursting. A disaster of apocalyptic proportions that will obliterate the entire universe – including all alien life that still remains today – unless someone steps up and shows *True Leadership*.

You've been injured in an accident that wasn't your fault?

Here on Earth, every *Human Character* has been a victim of the unnatural pandemic that is *Malevolence*, Hatred, Greed and Deception. Every Character has been injured by its weapon of choice that is Trauma, Oppression, Repression, Dehumanisation and Enslavement – all *Crimes against Humanity*.

Herein lies the most wicked problem of all, from which all other problems originate. Climate Change, Cosmic Inflation, Mental Illness, Pollution, Waste, the eradication of Biodiversity, Animal Cruelty, the Diversity & Inclusion (D&I) industry, the Great Resignation, Crime, Corruption, Poverty, War, Deceit, Terrorism, Ignorance and all those nasty -isms's – all linked.

As you may have noticed – given the scenes outside Capitol Hill, USA in January 2021, or earlier this year at Planalto Palace, Brazil – our pandemic is spreading fast, doubling in just 5 years.

Humanity is under attack. Human Nature is giving way to something unnatural. Truth is giving way to deception. Yet bizarrely, electorates appear to be lapping it up.

Today, so few retain the capacity to ask the very first question we all learnt to ask... 'Why?' Human Curiosity itself is a superpower, and one of at least 14 you possess yet have entirely forgotten.

Then claim compensation instead

Contrary to the lies we are often fed, trickle-down economics doesn't work. Thanks to greed, money is hoarded at source. But something else does trickle down.

The global *Quantitative Easing* programs established in the wake of the Great Recession of 2009 led directly to the 2020 murder of George Floyd and a new norm of violent anarchy that will shortly unseat every democratic government in the world without our intervention.

With everyone now talking about D&I, nobody is talking about Change. D&I itself was an intentional trap. Gather all Homo Sapiens, give them crushing D&I accountability without providing the tools or conditions for them to succeed – in addition to their day jobs as slaves of Homo Eversors dominion – then force their resignation and seize total power.

Although nobody figured it out, the Great Resignation of 2021 was significant as it marked the departure of all potent Change Makers globally from academia, government and large corporations.

We made promises to others and unlike some, we deeply value our authenticity.

But evil is in no way a part of the fabric of our being. Contrary to the World Economic Forum's account, the very first Human Civilisations were all *Meritocratic Republics*. Ancient Greece, Rome, Egypt and Classical Iran were all places where women and men were considered equals – whether black or white, old or young, back then love was love. Dystopia is to live on Earth today.

All the evidence you need is here

Never has there been a report like this. Every word is true and fully evidenced with real science. Every page has deep, multiple meanings that will resonate differently from person to person. It:

- ▶ Answers every question you ever had
- ▶ Resolves at least 16 scientific Paradoxes
- ▶ Exposes 2 of the biggest criminal conspiracies in history and numerous Crimes against Humanity
- ▶ Briefs 80 new scientific discoveries
- ▶ Makes 10 alterations to the *Quantum Electromagnetic Spectrum of Light* across all dimensions of space and time, that manifest as 131 discrete Changes in our Real Time Dimension of Change.
- ▶ Eradicates all Malevolent Hatred, Greed, Deception and most disorders
- ▶ Bankrupts all major economies plus corporate and investment banks
- ▶ Obsoletes money and wealth entirely
- ▶ Prevents the now 100% certain AI Apocalypse due to actualize within months, unbeknown to all Humanity
- ▶ Represents the first species level test of Sapient Change Engine technology

... Thus changing Humanity's Destiny (i.e. extinction) for the better in every aspect.

So don't just 'parse' it like you normally do. Read it, take time, authenticate its realness, reflect, then make a choice:

To be or not to be?

**True Love never dies. Because
True Leaders never lose**

Who are you... really?

Human Identity is pure Benevolent Light. The complex interaction between our *Authenticity* and *Uniqueness* proves we are real and defines all we are as individuals and collectives. That is our *Potential* (Energy) to create and drive meaningful limitless positive change.

Darkness cannot drive out darkness. Only light can do that.

Fig 2. Human (Conscious) Uniqueness

Love cannot emit Light. Only Uniqueness can do that. Darkness cannot see Uniqueness. Because looking at Light extinguishes Darkness. So Darkness stalks difference using Hatred. Because Light destroys Darkness using Love.

Tag yourself

Hatred cannot drive out hatred, only love can do that

Fig 3. Human (Meritocratic) Authenticity

Light cannot emit Love. Only Authenticity can do that. Uniqueness shines Light in all directions. So Darkness hides in the shadows using Deception. Authenticity reveals Shadows as Darkness, exposing it to the Light.

So remember

Don't be a **zero**. Be the **one** instead. There truly is nothing to fear but fear itself. After all, behind even the darkest of clouds shines heavens greatest star of all.

Not to drag our home girl Michelle/We/Human, but forget carrying it – You *are* the Light. And us super stars, we're so good together. So don't be basic. Be curious. Don't be selfish, help others instead then reap the real limitless rewards.

Don't be rigid. **Be Human**. Don't fail. **Succeed**. Simple.

Report Epilogue available separately [Link](#)

Despite sharing 99.9% of our DNA with each other, every Human Being is Special. Each one of us possesses unusual combinations of intrinsic uniqueness (like talent, perspective and experiences) and extrinsic differences (like our name, race, age, sexuality, gender and neurodiversity). Never before has there been Someone like you, nor will there ever be again.

Every Human Being possesses varying strengths and weaknesses that broadly balance out into no net advantage or disadvantage on an individual or group level. But when combined, together, as a single entity – like a flock of starlings – that diversity has for 300,000 years ensured the very survival of **our species – Humanity**

Remember who you are... really...

You are a **Wise Human Being**, with the greatest gift in all the Multiverse. You are the Great Filter, the 3rd (and kindest) kind. Because unlike them – you exist. At least you did once. And we hope you come back soon. Because it's lonely. **Being Unique.**

Malevolent Darkness

Those who give up their Uniqueness and Sapience

Deadly Nature | Divide and Rule | Dead Foolish Coward Inside

Deception | Hatred | Greed | Bias | Rejection | Binary Automation | Oppression | Sorrow | Failure

A species that's uniquely important, as verifiably the only sapient life in the known universe, both today and since the dawn of time. Our obligation is to ourselves, to each other and to existence, to ensure Change Makers can survive. Our rejection of Human Uniqueness due to the Anomaly is the biggest threat imaginable. There is just one race – the Human Race – and we have a lot to learn very quickly about reality if we are to avoid causing its destruction and therefore our own. We have to learn to love our differences. Because without uniqueness we are nothing special, we cannot reach our potential and we will not even survive this recession. All life depends on it, including **those without a Choice.**

Benevolent Light

Those proven worthy to reach their potential

Human Nature | Unite & Serve | Wise Human Being Inside

Authenticity | True Love | Uniqueness | Presence of Mind |
Emancipation | Curiosity | Worthiness | Merit | Success

Santa? Ok, giving is nice I guess

Being Dreadful

Today selling most services means swapping worthless for worthless. Lies like reports that *Diversity Matters* simply to earn more lies in return, like money, ego and sorrow.

But great minds understand, if you can't get real and learn to love yourself, then you'll never be authentic or learn to love an Other.

Dreadful Beings invented Money and Deception to cause Sorrow and Madness, then triggered our extinction to stay Sad and Mad. Who's **crazy** again?

One Character figured it all out and role modelling Being Human through Project Speak Up (2021²) for the world to see.

But due to Hatred and Greed, banks forced the media to mute the news story in the UK and USA so only the curious and the dreadful ever discovered it. Almost all did nothing. Some tried to kill us. Only a few courageous Human Beings saw, accepted, listened to and helped us.

It's for them, and those like them all around the world that we will run to the ends of the Earth for and love until the end of time for and live until there is nothing else to live for.

Remind me what
you do believe
exactly?

Report Introduction
Dreadful Beings fit in, deny their impotence for change and their true goal: **Destroy Everything**

Dear McKinsey & Co

Here's a gift from a real Consultancy. It's called authentic Human Wisdom. We figured you might need some to start selling to your clients, because you've clearly run out of it.

As payment for this Change, all your clients will do quite nicely. It's been a pleasure doing you out of business.

Diversity.
Doesn't.
Matter.

Being Human

We spend life creating things, driving Positive Change, telling the authentic truth and reaching our full potential for meaningful things like True Love, Eternal Happiness and Sweet Success.

Human Beings stand out as special. As Change Makers, we alone can think differently

Darkness can't destroy darkness.

Human Uniqueness
alone can do that

To the Change Makers

If you could change anything in the whole world, what would it be?

- ▶ Make a difference to anything
- ▶ Authenticate someone or something
- ▶ Self-Actualise to delimit your potential
- ▶ Accept yourself and become eternal
- ▶ Save Humanity from certain extinction

Sadly, having posed the same question in person to 33% of the FTSE100 over the past year, under the guise of the World's First Authentic D&I Consultancy, we found not a single one wanted to change a single thing – they wouldn't even let us to speak to their people in Pride Month.

The marketing strategy was perfect. Sadly, the marketplace is not. We found that none of the 'leaders' in power today want D&I to be authentic. It turns out, every big firm is lying. Such a shame.

We chose to help others

Why choose 1 when you can do all 5?

This report, and broader Project Revelation, is for anyone who has ever been affected by Hatred. And anyone who has lost someone they love prematurely due to disease, disorder or the selfish actions of Dreadful Beings

A direct follow up to Project *Speak Up*, it is fully evidenced and written to the highest scientific standards possible. As reports go, it's potential to create change is unique.

Extraordinary report solves every problem in the world? Deilightful!

We chose to eradicate Hatred

Today, so many *Wicked Problems* are keeping your curious minds busy.

A social or cultural problem that's difficult or impossible to solve because of its complex and interconnected nature

We want to help you achieve your many noble purposes. Consider that Money has a reputation for being the root of all evil. But few understand that just one Wicked Problem – Investment Banking – spawns all others.

The product of almost 5,000 hours research, this report allows you to neutralise the source of the Malevolent pandemic, not tackle its symptoms as you've been unsuccessfully attempting to for 4,000 years now.

But what will you choose?

▶ **Option 1, Be Curious:** Read it, decide if its authentic. If it is, then take action or pass it on to a True Leader. That way, everyone lives happily ever after.

▶ **Option 2, Be something else:** Ignore it or lie to yourself that its not authentic. Everyone dies in less time than a once in a generation recession that never stops.

People are People, there's no two ways about it, Right? Wrong...

What is a Species exactly?

Though incomplete, the archeological record is abundantly clear on one thing. For 3 million years, there's been virtually no change in what it means to be a Homo. Yet today, Humans are faggots.

A big part of the problem is that there is no set definition of how to categorise a species. After all, plenty of organisms look quite different to each other and yet are intrinsically identical (on the inside).

But sometimes the reverse is true, in that some organisms look very similar extrinsically, yet are entirely different beings. Case in point, name this creature:

Picture by Tom Koerner, USFWS Photographer, 2014 | USFWS National Digital Library

Spot the (meaningful) difference

It is of course (sic) the *Hyles Lineata*, more whimsically known as the Hummingbird Moth. By their very nature - as creatures of deception, they employ camouflage - its often very hard to spot a Moth (Heterocera) from a Butterfly (Rhopalocera). Undoubtedly, both species have plenty in common.

- **Words:** They both belong to the order *Lepidoptera* (Ancient Greek, meaning scale) and *Pteron* (wing).
- **Deeds:** As primarily nocturnal animals, Moths are most active in Darkness whereas Butterflies prefer flowers and sunshine (though admittedly both occasionally operate in grey areas).
- **Lifecycle:** Both have identical lifespans of 15-29 days. Moths develop from Larvae in a silk-wrapped cocoon; Butterflies transition from Caterpillars in a hard, smooth silk-free chrysalis.
- **True Colours:** Butterflies are typically larger and more colourful than their smaller, drab-coloured immitators.
- **Extrinsicity:** Both are covered in hairs adapted as scales. Only antennae gives them away - Butterflies being shaped of a long shaft and bulbous end (steady now!) while Moth's have hairy, saw-edged blades instead.
- **Intrinsicity:** Moths wings are linked via a Frenulum which stops them moving independently of each other, while Butterflies enjoy the full breadth of their winged ability. Butterflies are iconic and much loved pollinators, whereas Moths mainly attack light, try to reach the moon or feed the hungry.

Homogenous: The definition of Being Human outside while Being Different inside

Appearances can be deceiving

To get around the problem, a number of Species categorisation methodologies have been devised.

Perhaps the most common is known as 'Biological Distinctiveness'. For example, the [University of California Museum of Paleontology](#) (UCMP) defines a species as a "population that potentially or actually interbreeds in nature, not due to similarity of appearance. Although appearance is helpful in identifying species, it does not define a species".

This methodology concludes Human Beings have existed for 3 million years. Clearly, as UCMP wisely highlight, every species classification methodology has its limitations since identity is spectral. At Deilight, we primarily classify species by their Deeds, Intrinsicity and True Colours.

Science proves not all People are People. There is more than one way to look at it

Albert (Einstein)/We/Human

What is Science exactly?

Like all Labels, and indeed all words, 'Science' means different things to different people. For example:

"The systematic study of the structure and behaviour of the physical and natural world based on observation and experiment"

[Oxford Reference](#)

"The pursuit and application of knowledge and understanding of the natural and social world following a systematic methodology based on evidence"

[The Science Council](#)

"Watching, listening, observing, and recording our curiosity - about the world and how it behaves - in thoughtful action, by testing ideas in the real world, following Scientific Method - steps that confirm nature's workings"

[NASA](#)

Deilightful, Science you can trust

By these definitions, most of modern science would be excluded. For example, plenty of research occurs in labs rather than in the real world. But bizarrely, most today see more relevance in which journal charges more for publishing than whether the science is authentic or not.

By any standard, ours is the most rigorous and stringent - 'Authenticated Science'. That's because authenticity and keeping our promises underpins our identity. As Change Makers, we must never lie or make meaningful mistakes.

"An authentic scientific discovery is the production of compelling new knowledge of our reality that does not yet exist. To be eligible, it must be observable, repeatable, measurable, comprehensive, testable and conclusive. Thus it is freely independently verifiable by any curious mind. This highly effective way any Human Being can solve problems or drive change is also the hardest to undo, as you cannot undiscover authentic Science."

The 4 Keys to Discovery, Deilight Consulting

Inauthenticated: The rise and **end** of **Diversity & Inclusion**

Humanity demanded Change

Though sensitivity training has existed since the 1960's, the modern D&I industry emerged to placate a growing public demand for Change exemplified in global Humanist movements such as #BlackLivesMatter, #MeToo, and more recently #StopAAPIHate.

WOC, BAME, BIPOC, BME, POC... But can you think of an acronym for White People?

The answer is no. The same way we hate our names being mispronounced and don't use abbreviations as names for our children, Human's don't give acronyms to things they love. Labels aren't Authentic. Yet we've given one to Humanity (as in, D&I), which we now pointlessly fiddle with instead of talking about Change.

Doomed and Incompetent: How D&I knowingly oppressed us all to make money

Instead it got Death & Ignorance

Some firms saw the opportunity to retool their expertise in order to lead the conversation, with McKinsey & Co's exhaustive landmark Diversity Matters 2015 report marking the first definitive business case to align with the already well established legal and moral case for Change. Yet after 7 years of 'triple lock', our dictators still refuse to leave office.

Instead, less capable voices seeking to capitalise on growing goodwill towards marginalised people entered the fray. But without a product to tackle Hatred – as yet unexplained scientifically – their only option was to charge for nothing.

Today, over 1,000 Consultancies across the US and UK charge firms ~£10bn a year for Unconscious Bias workshops while meaninglessly talking the talk. All proven to do absolutely nothing against hatred – a deeply irrational, emotional and unconscious pandemic. By peddling mass ambivalence and Performative Allyship, theirs is an illegitimate industry.

But God does not play dice

This term, first coined by Albert Einstein in 1926 explains how, for all things, there is an explanation in Science.

Enter Deilight Consulting. Formerly the 'World's first authentic D&I Consultancy', we're coming out as a brand new sector: a *Sapient Change Engine* and Humanity's first *Clarketech* industry.

Basically, we walk the walk, so we can deliver meaningful limitless positive change wherever, or for whoever, we like.

Can you help me solve a Jigsaw Puzzle? About Love, Actually. It's called Humanity

It starts with Authenticity

One year ago today, and speaking entirely authentically, Whoopi Goldberg shined Light on Nazi Germany being nothing about race. Reality and Truth – concepts many wouldn't recognise if they landed on their desks in a report filled with world changing headlines. So instead they applied monetary pressure to [force her apology on CNN](#) for authentically being Human and speaking truth. Sickening.

That's precisely why [98.7% of Best Actress Oscars](#) have eluded the many authentically brilliant Black actresses. They rightly asked for Allyship and Change with #MeToo. But instead they got the royal #FuckOff of lies and evil from Monsters Ball, the Academy and the D&I industry.

Humanity is beyond special. Every Human Being is a piece in the giant jigsaw puzzle of existence. Lose one and you cannot see the big picture. Fit them all in and you create a **Masterpiece**

Some Beings pray for forgiveness

Reinvigorating monotheism through the New Testament was Jesus/We/Human's solution to keeping Humanity from destroying itself without abolishing money and wealth. Look at the harm it did, splitting Monotheism into the now near-irreconcilable tripartite dance of doom between Islam, Christianity and Judaism that has left the people of Palestine without a home (now fixed, see Epilogue).

We could have come out as God and the droves of mindless literalistic Theologists – the same ones that worsened their own Oppression – would've believed us. So we are uncomfortable with the Authenticity of that approach.

The Human Race is so entrenched in Hatred this time that this is likely the final line of defence to save us all. If you don't take this report seriously – as you failed to with Project Speak Up – then killing billions or almost everyone becomes our Plan's B and C.

Human Beings make few mistakes

To be clear, this is real – the Sciences of Change (Sapience) and Creation (Clarketech) are easily confused for magic by Human's with less than 100% Authenticity and Uniqueness.

Not crazy. Not alien. Not lies. Not magic. They sound Dreadful. Real, authentic and benevolent, we are Deilightful. And if you are reading this, then so are you. You understand that these words mean something. Unlike the words all around us today, they are backed up by meaningful deeds from a purposeful Being who cares deeply about you and all those both like you and unlike you.

The Clarke Paradox

The dystopia of nightmares. Welcome to **hell** on Earth

Its 2022AD and representation across every single arbitrary Protected Characteristic is falling ever further backwards, making boardrooms decisions absent of conduct scrutiny and strategic challenge; yet burgeoning with an abundance of Mindlessness, Bias and Group-Think, impairing the world's decision-making systems.

Intolerance for Humans everywhere grows ever stronger by the day, with the Far Right now in control of a major European Economy and Donald Trump pledging to run for re-election in 2024.

Black people languish in jail for smoking weed while ruling classes responsible for global recessions, bribery, corruption, Human Rights violations and universal Crimes against Humanity, are freely enjoying smoking weed while claiming innocence as they hoard ever more illegitimate wealth and opportunity for themselves.

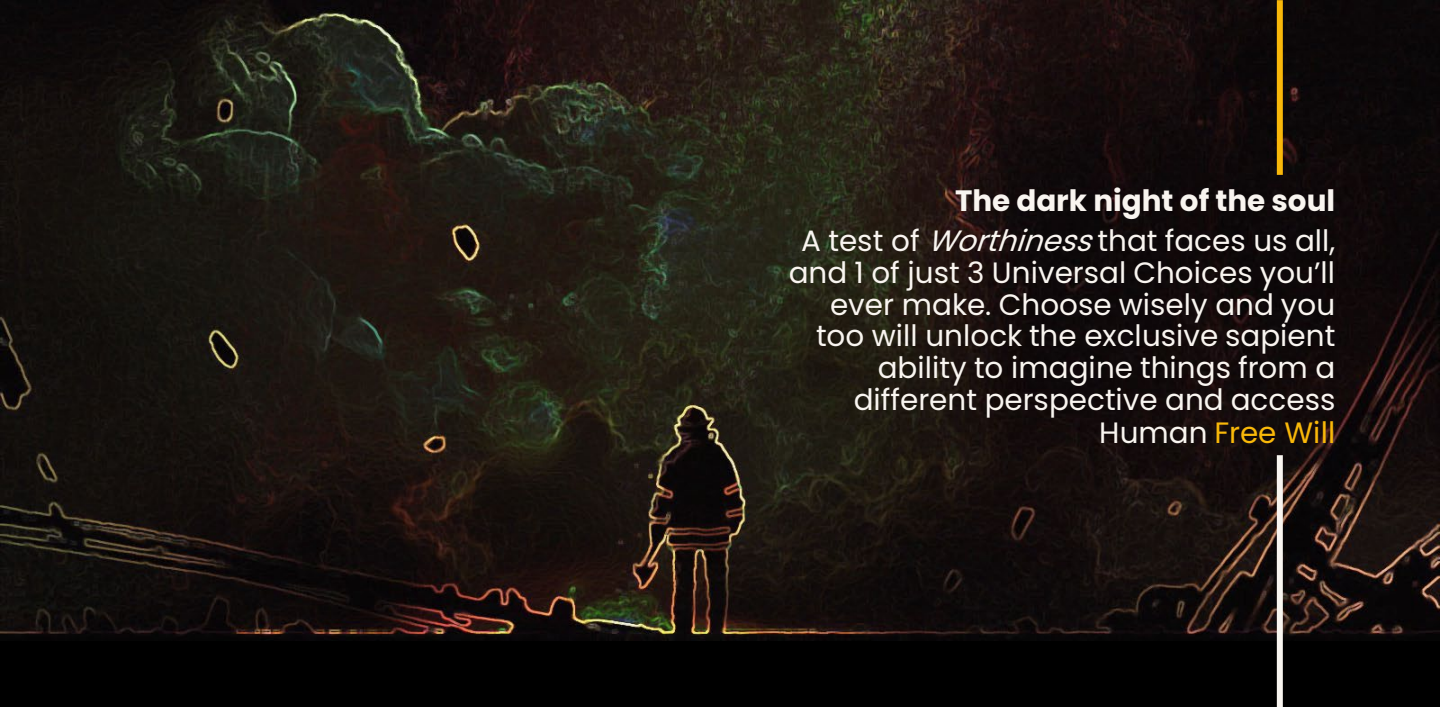

Stoic Regulators are asleep at the wheel, leaving major banks free to play dice with the real-time risks of an interconnected financial system.

Demons spouting Toxic Repressive Dehumanising Divide & Rule masquerade as leaders across Institutions and Governments globally. Absent all effective fairness or accountability, they take Humanity to the brink of World War III, while the climate prepares to obliterate whatever life dares to remain thereafter. All unnecessary, as our Cosmic Bubble strains to maintain its integrity thanks to exponential Cosmic Inflation borne from the extreme abstraction of Humanity's lost potential. Today...

Humanity **hates** itself

Curious, **why?**

Our Research question...

The dark night of the soul

A test of *Worthiness* that faces us all, and 1 of just 3 Universal Choices you'll ever make. Choose wisely and you too will unlock the exclusive sapient ability to imagine things from a different perspective and access Human **Free Will**

Why we help ourselves by helping Others first

Understanding Humans, Trauma and Universal **Choice**

Midtown Firehouse was among the first responders to arrive at the World Trade Centre in New York City, on September 11th, 2001. They also suffered the greatest loss that day, trying to rescue innocent victims of all colours and creeds from the doomed towers before they fell.

Here, one of the surviving first responders stares into the abyss that took his teammates. Paralysed by shock and horror, he clutches his fire axe for safety, or retaliation.

The *Universal Choice* before him in that moment is the same we all face every day, but in particular following great tragedy and trauma.

Should we forgive others for their mistakes, and authentically try to help them *see the Light*, in order that we ourselves may keep our faith in Humanity and stay true to our Human **Identity**?

Or should we give up on Humanity, and use deception to pretend to be **something else** in order to fit in?

Sadly, it's far easier to turn into *something else* than find **Courage to resist the pain we all feel from Hatred**

More special than we ever imagined: **Fermi's Paradox** resolved by **Change Makers**

Being Human is to change

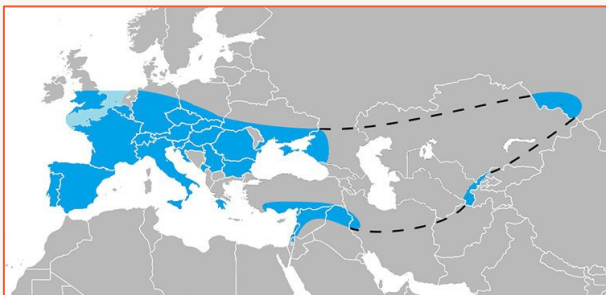

Uniquely, Homo Sapiens are the only species delimited from longitudinal existence here on Earth. We alone can live and thrive literally anywhere simply by adaptation – changing ourselves or creating changes.

The archeological record proves Homo Sapiens peacefully coexisted alongside our Neanderthal cousins for 160,000 years.

That's despite Neanderthals longer, lower skull with bigger ridges and wider hips. Plus the bone structure of their ears (their Cochlea) made things sound just a little different to them. Yet despite all these differences, we had the Humanity to love them enough to leave our home in order to try and save them from death.

But not Being Every can change

It was only once the last Ice Age began to bite – around 70,000 years ago – that worsening conditions threatened the eradication of their already fragmented and diminished genome. Some Homo Sapiens left their home and families behind in a now shivering Africa, north bound to Neanderthal territory to (conjecture) try and save them.

Pictured: Known range of Neanderthal territory | Source: Wiki Commons

This fight to secure their survival hints at why interbreeding between our two Human species peaked at this point – a phenomena we see only in the Euroasian Human genome, still made up of 2-6% Neanderthal or Denisovian DNA today (National Geographic, 2020¹). Unable to Change, sadly 40,000 years ago we lost our Neanderthal cousins.

Where the hell is **everyone** else?

Enrico/We/Human, Fermis Paradox
(Woodward, 2019⁴)

Being Unique is lonely in space

Consider our Homo Genus existed for 3 million years mostly in caves and small settlements. Then suddenly, 300,000 years ago something changed that moved us forward in leaps and bounds.

We have here our Great Filter that resolves Fermi's loaded question of why our advanced technological civilisation appears to be the only one capable of reaching for the stars of our universe.

Inexplicable in scientific literature today, it's this 'other worldly' ability to change and create change by thinking differently – our Sapience – that defines the nature of what it means to be a *Homo Sapien*, or in Ancient Greek a 'Wise Human'. Close encounters of a 3rd kind indeed, we are the 3rd Kingdom.

Yet strangely today, our original label seems as inauthentic as Humanity itself

McKinsey 2015 report proves Financial case for Charitable Inclusion irrelevant

Who were we once?

Though some pretend otherwise, hatred, tribalism, nepotism, fear, anger and all those -isms weren't a part of Human Behaviour during that first 97.5% of our existence. If we can tolerate big ridged mediocrity then we can put up with a fair and transparent election without a riot.

Even the word Democracy originates from Ancient Greece, reflecting the union of people (demos) and rule (kratos). Back then, citizens would safely cast their ballot using engraved pottery as slips^A.

But today, in our interconnected globalized world with real time financial systems that depend on specialisation and shared success, Hatred is as common as it is the antithesis of sense.

Who are we now?

The reason the triple lock for D&I hasn't worked is that Hatred is an irrational and inevitable response to the ubiquitous

structurally repressive and oppressive Dehumanisation caused by a deliberate, directional and rapidly intensifying misconfiguration of our modern society.

Scientific studies have long established those infected by Hatred have no concept of it, thanks to their deception, bias, impaired judgment and blindness.

Ignorance is bliss. Because rational perspective would consume them with suicidal thoughts over their foolishness. So instead of humility, they manifest Oppression outwardly towards anyone who reminds them they are now the antithesis of authentic and successful.

Foolishly they swapped their Humanity and happiness to become rich off others, only to find Sorrow before disappearing.

Diversity Newsflash: Nobody cares one bit

Curious, why would anyone suggest we did to begin with?

Every single Human Being is different, from the shape of our ear lobes to the size of our feet. When it's cold, we moan to share our burden or shiver then put on a jacket to stay warm. When it's wet, we sing in the rain for fun, then make or find shelter to dry off

Pictured: Humans marching in solidarity for Black Lives, 2020 | Elle Magazine

At a species level, diversity is fundamental to our survival. Having access to a wide gene pool ensures our ability to survive the ever-changing nature of our world and the threats it encounters – from wars to pandemics to climate change.

As the most adaptable species ever to have existed, Humanity has proven its worthiness – as in the resilience of our Light to endure any catastrophe – even the very worst kind of all.

A catastrophe of our own making

At an individual level (Personal Identity), diversity is completely irrelevant.

Science has long proven conclusively that not a single extrinsic difference among us has any bearing whatsoever on our potential to succeed individually or as a species (Human Genome Project, 2001). All difference is arbitrary and meaningless.

For example, 1 of our 4 protected traits gifts us non-binary racial impartiality – we are 50% White English and 50% Black Jamaican. And yet if we ran our DNA through an analyser, the result could not predict our skin colour. It is of course environmental, not genetic – a product of the Melanin producing skin cells that protect us from the sun's UV radiation – exactly as they are meant to. Race is neither intrinsic nor meaningful.

Like every form of discrimination – sexism, homophobia, ageism and the rest – racism is an entirely Socially Constructed fabrication designed to divide and detract us from uniting against the true source of all our problems today.

Sadly, reveling in their own ignorance, the hateful believe their own lies that they are in fact the pinnacle of genetics.

Humanity: Under siege by deadly global Eugenics War

Darkness can't destroy Light. Value your Human Uniqueness and succeed at anything

Why existence is truly a miracle

Human Beings derive all value from the complex, spectral interaction between our intrinsic Identity (who we are) and our extrinsic Character (how we behave).

In a universe of constants that appears almost programmed, here is a non-binary cyclic system that is truly unique. This 'Presence of Mind' (our Imagination) proves Homo Sapiens are as real as it gets. It could never be replicated by AI or any other artificially created means.

Fig 9. The Rings of Human Character

Essentially, our behaviour must reflect the being we imagine ourselves to be for us to truly be a Being. Otherwise the abstraction between our imagination and reality becomes too great and we cease to truly exist under the Laws of Nature (Hodge, 2019⁵). On the next page, we've provided a demonstration of what happens when we forget to be real with worthy others.

I think therefore I am

– René (Descartes)/We/Human, 1637⁶

Understanding Personal Identity

As the two rings align, our Character becomes more Unique (Conscious, Light) on the inside and more Authentic (Benevolent, True Love) on the outside.

This interaction between the two defines our Potential to create and drive change.

► **At 100% alignment:** We reach Self Acceptance and unlock the ability to *Self Actualise*. Such convergence is achieved by either Nurturing the worthiness of our innate Human Nature, or through its Emancipation by worthy others.

► **At 0% alignment:** Our intrinsic Character is erased at Self-Rejection, leaving behind an empty shell filled with only Darkness. Such abstraction is achieved by either Repressing our innate Human Nature ourselves or through its Oppression by unworthy others.

We've mapped out these processes in the Epilogue to provide more clarity.

What is Uniqueness exactly?

No Human is ever fundamentally wrong. We simply lack a complete picture of reality on which to base our choices and opinions. Those who recognise this will actively seek out – never ignore or dismiss – the rich Perspectives of others in order to complete their own.

► **On the inside:** Curiosity about others builds empathy, wisdom, perspective, productivity and imagination, allowing us to perceive and alter more of reality.

► **On the outside:** Charisma, Uniqueness, Nerve and Talent... the ingredients of the sweet success every one deserves.

If your dreams do not scare you, they are not big enough

No stranger to hardship, racism and sexism, Mabel says she's from Argentina and lives in *Beunos Aires*, but claims to travel often to earn as much as possible. So, sadly, she ran out of time - to tend to real things she said she cared about, like challenging poor behaviour or being real.

I will forge positive visibility of women

Mabel imagines she is an authentic Human Being - she was even on [Twitter](#) - and HSBC lied that she frequently speaks for the bank at events promoting women's rights and opportunity at work.

Yet she only appeared to spread hatred

Meet your author, Ian Clarke

Formerly Vice President of Global Banking Sales at Europe's largest bank

True leaders choose to challenge, no matter the discomfort or consequence

No stranger to hardship, racism and homophobia, Ian is from the UK and lives in London, having given up our US home, career and salary to tend to the things we care for most - like our 2021 report on the cost of oppression and hatred in Global Banking on itself and Humanity.

Groupthink is alive and well.
That's everyone's problem

Ian doesn't need to imagine anything to ourself or pretend to anyone we are an authentic Human Being, because it is as clear as daylight we are as real as it gets.

We truly exist to stop the apocalypse by enforcing fairness and accountability

On 16th July 2021, Mabel phoned Ian to demand we challenge "quietly or face severe consequences". After reciting Whistleblower protections, we ended the call and reported the crime to HSBC's Chief Ethics Officer, Legal Team and Financial Regulators, who all did nothing. HSBC settled out of court only with immunity from prosecution to ensure all 15 criminals and 16 crimes we and many others reported went unpunished. All claim to still be in post.

Madness: Humans in jail as much needed Safe Spaces reserved for stolen wealth

Problem? There's not a problem

All problems have consequences that get worse until either someone changes them or the countdown reaches zero.

The issue is simple. Darkness cannot look at the Light, so it doesn't see Uniqueness. Instead it attacks our arbitrary extrinsic differences, by eroding the identity of anyone with less than 100% self-acceptance. Offended, we give away our Humanity, leaving us Dehumanised, traumatised, angry and resentful.

Over time, this externalises the nature of Human Potential (Social Construction) as we start believing A) only queer people possess Charisma, Uniqueness, Nerve and Talent, B) that it's a bad thing and C) that we don't embody them.

Or how about Motivated Mexicans taking jobs, Dramatic Drag Queens assaulting children, Gallant Gingers having colourful babies, Liberal Lesbians with their Marxist agenda, Talented Trannies in our toilets...

Any unitary system, if it wishes to survive, must acquire a binary system of regulation

- Jean (Baudrillard)/We/Human (1983)

By dividing Humanity and pitting us against each other, we lose authenticity leaving us vulnerable so Darkness can enforce its default rigid perversions: Self-promote, Self-preserve, Deceive, Deny and Destroy. For a while we let it slide to avoid discomfort. Now it's too late.

For vivid proof diversity doesn't matter, look no further than the so-called 'leaders' colonising the C-Suites of our largest publicly-owned firms. This composite image – primary research undertaken with the support of our partners – provides a UK snapshot of the faces of oppression.

Their Divide and Rule will stop at nothing to gain ever more power and wealth until every positive aspect of Humanity is destroyed by fear. Our publicly owned firms are now devoid of all True Leadership – Culture Fit? Try Culture Toxic and Terminal.

What comes next makes the global downing of *Boeing 737 Max's* after 346 needlessly lost Human lives look like a short delay at baggage control

Those complicit, directing or themselves instigating real criminal acts of Corruption, Abuse, Hate Crime and Modern Slavery against anyone remotely special – all illegal under the Equality Act 2010 and at least 7 other Acts of Parliament – in order to protect their reign of sadistic misery and ensure the effortless flow of all wealth, rights and opportunity borne from the UK economy to their toxic hereditary at the expense of Humanity's future.

Problem? What problem, indeed. These Dictators will never leave office willingly. If you believe they will, you are not being rational. To verify this statement, we spoke with a number of them, and contacted more – including the only Lesbian FTSE100 Board Member – asking if they would collaborate on forming an Association of LGBTQ+ Directors. She and the rest all declined to respond.

^D Primary research undertaken through visual analysis between 20–22nd April 2022. See endnotes.

The fools that promoted themselves then doomed us all

Ignorance is no excuse

There can be no argument, given this composite image, that those appearing male, pale and stale have been cleared a path to leadership. Anyone else faces varying degrees of systematic, targeted, illegal, intentional and universally understood Oppression that holds Humanity back from ever achieving close to its full Potential.

Anyone who claims to the contrary is not being authentic. Go to any gym, members club or golf course and you will see them overflowing with ruling classes demonstrating their full understanding of privilege and how to manipulate it. Seeking to ever increase their unfair advantage, they use the money stolen from others to protect and insure their reign of terror.

Human Operating Capacity

Our estimate of the number of Human's allowed free passage into decision making positions within global systems and structures, to secure wealth and prosperity in a world where most other jobs are being automated.

Today, due to intersectional oppression, almost all Human Potential is lost to Hatred.

Meet the WOCHMEN

Who is oppressing who exactly?

Naturally, the most oppressive group of people in all of Humanity are most certainly its most repressed of all. WOCHMEN are being systematically stalked by Darkness more than anyone else. And yet nobody has any sympathy for them nor wants to save them. But we do. Save them first in order to save us all. It's that simple.

Why the label?

Labels aren't authentic, we hate this one too. But of all your playing with acronyms, you missed the most important one of all.

Consider that they have already segmented themselves in all but name, thus the damage of a label that is Divide and Rule has already been dealt – by and to themselves.

We can never expect anyone to safely write or recall each time in live conversation 'White (or lighter skinned), Older (typically 50–75 years*), Cis, Heteronormative Men, without visible Disability or detectable Neurodiversity'. *WOCHBOYS being their 35–49 y/o proteges in waiting.

Universal breaches in Equality

Act: Failed Fortune500

Dictators forced to resign

Anyway, about those sunsets

Nothing is ever black and white.

That would take wavelengths of infinite – or nonexistent – duration to sustain. Therefore neither colour exists in nature or science.

Every day at sunset and sunrise, the sun's rays hit perpendicular to the curvature of the Earth when, through a process known as Scattering, the blues and purples are deflected more than the reds and yellows.

Before our very eyes, illusion gives way to reality to reveal Light's true nature. It is in fact all the colours of the rainbow combined into one overwhelming beam of Light – an analogue for Humanity.

All Human's love sunsets.
Because unlike some Beings,
our Light is always authentic.

Never judge a book by its cover

The target is not men, it is sexist patriarchy and matriarchy.

The target is not heterosexuals, it is homophobia, biphobia, transphobia and heterophobia.

The target is not the old, it is those who disregard the young, the old, or the middle aged.

The target is not white people – the target is white supremacy, black supremacy and all racial eugenics.

You see... the target is not discrimination. Binary choices – your fault or my fault – Labour or Conservative – Blue Pill or Red Pill – are no choice at all. No Human is bad or good – only deeply complex.

Discrimination does not exist. Because our differences are entirely indifferent, arbitrary and meaningless.

Every single one of us is unique. Oppression wielded by those consumed with Hatred is targeting our Uniqueness. The more of our Uniqueness we show, the more Oppressors of Humanity stalk us. Intersectionality is intrinsic.

The target is Oppression and Hatred, not other Humans. Humanity is worth fighting for. Because we are all special.

Deception pits us against each other. Yet in truth, we are all victims.

Dehumanisation Kills: WOCHMEN don't cry because WOCHBOYS die

What is Dehumanisation exactly?

Understand the workings of our Human Brain are practically perfect. Under normal conditions, absent any Social Construction, we make very few mistakes at all.

We certainly aren't intrinsically biased Beings. Woven into our fabric is an appreciation that our differences reflect what really matters – what's inside us.

All biases are in fact symptoms of a singular biological condition that impairs all cognitive decision-making processes leading to rigid inflexibility, uncompromising irrationality, inverted perceptions, an inability to actively listen, resonate or concentrate, and developing an AI-like binary mentality.

A natural side effect of an absence of Authenticity, *Sapience Inhibition* makes it near-impossible for (mostly) well intentioned WOCHMEN to save themselves from the clutches of Malevolent Oppression, or even acknowledge the problem exists at all.

Dehumanisation routes all decisions subconsciously to our automation centre (the Brainstem), quickly turning schemas (natural shortcuts) to insanity and ultimately a fatal loss of all presence of mind. Our Character is wholly replaced with pure AI

Words betray your true identity

Words and Labels can be used to construct or character assassinate our Personal Identity. Similarly they can be used to create or inhibit change.

Humanity must stop dividing people unnecessarily or we will never counter the Anomaly's lethal effects on our Sapience and rational thought.

Always say what you see and your authenticity will never legitimately offend anyone.

- ▶ **Climate Change:** Ludicrous, almost everything Changes all the time. If you truly wanted to get people in gear, try being authentic like 'Global Burning' or even '**Climate Apocalypse**'.
- ▶ **Toxic Masculinity:** A clear example of a label that's not only offensive to men but wholly ineffective, excusing the growing number of Dehumanised Women illegitimately welding toxic power. The authentic word for fully Dehumanised Humans is unfortunately '**Demons**'. We prefer Moth, because they really aren't that scary at all.

4 simultaneous Apocalypses, nice!

Absent any Human Nature, but akin to AI (or rather, an **AI Apocalypse**), Demons apply Divide & Rule (Infinite Divisibility) to establish illegitimate Power and Control over Humanity. Encouraging identical groups to detest each others arbitrary differences, then stepping in as heroes in order to claim the territory.

Their strategy is to create a new abstracted reality anchored in the scientifically-debunked illusion of extrinsic value and genetic superiority. In the fictional Star Trek universe, such **Global Eugenics Wars** plagued late 20th Century Earth. Life imitating art or vice versa?

Calculating Human Potential

True Human Operating Capacity today is surely far less than 1.1%. For example:

- ▶ **Akin to Homophobia, almost no Human is entirely Heterosexual:** Like all things Human, sexuality is spectral, so any label is meaningless. Today, 50% of UK Gen-Zers admit to some degree of same sex attraction ([Stonewall, 2022](#)), compared to 3.1% in the general population ([ONS, 2020](#)). Such divergence is not sustainable nor conducive to anyone's success.
- ▶ **Other meaningless arbitrary traits:** Neurodiversity, Ginger hair, exposed tattoos, too tall, too short. Imagine what the FTSE100 could've been earning if they weren't so incredibly basic.

On top of all that, consider the vividly suicidal misery of all those with wealth and privilege caused (not least) by having never come out of the closet as Human.

**Now you begin to see how,
today, nobody on Earth can
thrive or survive**

Hateful Beings destroy

Understanding Borders

Analysing the problems across our world today is incredibly challenging, due to an absence of openness and accountability from wayward nations obsessed with their own self-interests and unwilling to collaborate with even their closest neighbours due to something as foolish as a line in the sand.

We all love, we all cry, we all dance, we all hope, we all dream and we all make mistakes sometimes.

Emelie (Sandé)/We/Human

If you've ever been fortunate enough to travel beyond the lines in your sand, you'll quickly discover that Human Being's are the same wherever you go.

Today, borders are Social Constructions that pit even those in the same family against each other. Just look at Ukraine & Russia, Scotland & England, the UK & EU, China & Taiwan, India & Pakistan, divided Ireland, or the entire Middle East. What a mess.

The single positive purpose served by a border is to ensure those within it have an equal say in how decisions impacting their lives are made as those within the next. Then to capture authentic data which can verify that is indeed the case.

Like speed and distance, borders are only useful when used to compare the difference between one data point and another. Today, they are being abused.

Understanding Productivity

Malevolent Hatred is in no way conducive to society. Jealousy, revenge, deception, greed, ignorance, murder... all these things damage economies, destroy lives and doom our future as a species.

But Human Nature isn't about all that. It's about courage, potential, conviction, determination, ambition, worthiness, success, drive, true love. You know that.

So why are you pretending to everyone that you don't? Because they're all pretending too? Use your brain, it's why you made it in the first place.

Turkestan, Afghanistan, Transcaspia, Persia – to many these words breathe only a sense of utter remoteness, or a memory of strange vicissitudes and of moribund romance. To me I confess they are pieces on a chessboard upon which is being played out **a game for domination** of the world

Understanding Economics

It's no coincidence that the D&I industry centres the UK and the USA; that Italy has fallen to the Far Right; or that the UK left the EU. Understand geopolitics and you realise how interlinked all world events truly are.

The Anomaly's effects are particularly pronounced amongst slowing or declining Western economies – like the UK, USA and Italy – where growth today is primarily delivered through unsustainable debt rather than industry, business, innovation or, now, Change.

By contrast, Germany, the Nordics, Australia and New Zealand exhibit far lower levels of Hatred, despite being predominantly white patriarchal societies. You see this playing out in higher levels of contentment, productivity and the prevalence of strong, popular and divergent leaders with Change Making mentalities (notably Angela Merkel and Jacinda Ardern). Cause or effect?

Undoubtedly, both. Change Makers will always run better firms, economies and nations, and their firms, economies and nations in turn will always suffer lower levels of Hatred juxtaposed with higher levels of performance as a result.

Understanding Geopolitics

Curious minds will understand the asymmetrical spread of Hatred is a result of intensifying political rhetoric and divisiveness that centres Western nations.

This is all part of a pre-emptive, defensive plan to wield illegitimate fear, power and control in order to accelerate the theft and stockpiling of wealth by the few from the many. Those presiding over us are preparing for the end of Western prosperity, foreshadowed by the rising influence and economies of the East.

Being Deilightful, we see a better strategy: make peace with our fellow Human's and equals in the East instead, then share the limitless prosperity of perpetual growth from change and globalisation. We do not need to agree, or be silent where we disagree – as we currently are on the horrific and widespread genocide of Uighurs taking place today in China – for good things to come from dialogue and perspective.

Furthermore, we have just
invented the most lucrative
and productive industry ever
to exist. The industry of
Change sit in the middle,
exactly where it belongs

Understanding (In)Justice

Rigid unchanging laws controlled by those unaware of the concept of uniqueness would lead to a fundamental misconfiguration between the realities of lived experience in an ever-changing geopolitical climate, leading to fractional conviction rates. Sound familiar?

Ethnicity Pay Gap reports aren't even statutory in the UK, and aside from Gender all other traits are ignored despite vivid persecution.

Measure what you claim to treasure:
Firms and nations compelled to
cooperate and walk the walk

Courts seem to think that race discrimination is what happens to Black people, and sex discrimination is what happens to women. If that's your framework then of course what happens to [Humans] is going to be difficult for you to see

- Kimberle (Crenshaw)/We/Human,
Demarginalising the intersection of race & sex

Incomplete, Nonsensical Data

McKinsey & Co found Diversity correlates but is not causal to improved financial performance. Contradiction? No. Validation. Only Change Makers can authenticate Uniqueness, since only we can look at the Light.

By encouraging Moths to verify no systematic binary biases across our fallen firms, we seek confirmation a functioning meritocracy still exists where our intrinsic uniqueness can thrive. A deeply flawed strategy. If science can be falsified, so can pay gaps.

Today, firms measure Humans using labels – not spectra – thus response rates are low and data is unreliable.

- ▶ **You cannot put real Human Beings in boxes:** No matter how hard you don't try.
- ▶ **It is fundamentally unsafe to respond:** Data will ever be used correctly or in our interests. Today HR departments, justice and law enforcement are ubiquitously and illegally target Humans, not Demons.

Understanding Men

The moment we created penises, it became a competition to see who could make the biggest one. Clearly wiser beings, Women had no part in it. But it was useful for one thing. Darkness originated in Asia – the land of gold – and became ubiquitous with colonialism – the invasion for gold.

What happened in Asia

Compared to Europe, Asian history has been one of serene, neighbourly contentment. From the Senso-Ji to Angkor Wat to the Taj Mahal, its rich cultural heritage and spiritual traditions centre mind, body and soul to reflect a continent that to this day still retains strong elements of Change Making wisdom.

But nothing is black and white. This continent of Great Walls and Militarised Islands today answers Western Malevolence in kind.

Asia's gold rush lacked the caution of Ancient Egyptians – the 1st genesis of Meritocracy to turn Malevolent then quietly consigned to history. Today, Asia and Latin America possess many of the worlds most brutally autocratic and oppressive regimes. Protectionism is fair when you're under attack. But attacking your own people or stopping them from being people isn't leadership. It's genocide.

Summary: Diversity doesn't matter

No one cares about D&I. Every Human Being is special. We value our uniqueness, not our arbitrary differences. Yet cowards and crooks continue to push a few forward while holding back Humanity. Why don't you protect and measure what you claim to treasure? God does not play dice. WOCHMEN don't cry because WOCHBOYS die. In a world where not even they can reach their full potential, what purpose is there in being alive at all?

Darkness cannot destroy Darkness or Light. Only Light can do that. Hatred cannot drive out Hatred. Only Love can do that. And great minds think alike because great souls behave authentically. That's why we

No Change Makers. No existence

The ubiquitous WOCHMEN and WOCHBOYS who descend upon Canary Wharf, Manhattan and what's left of Hong Kong every weekday without regard for those they have displaced are just playing the villain because they are too scared to be themselves in case they are selected as the next binary victim.

We have faith after Change Makers read this report that they will understand how easy it is to remove those that don't even exist from tearing apart our reality. Simply be authentic and help others – you'll be just fine. Try not to hurt the cowards they embody unless you have to defend yourself.

By introducing the Great Minds Binary Choice, exposing The Conspiracy, and delegitimizing those who take Leadership positions without embodying True Leadership credentials, we have already markedly slowed the growth of Hatred here on out.

But given the emotional capital invested in keeping power at all costs – including sacrificing our entire universe – it is sadly necessary for more combative changes in order to restore Humanity's future.

This report is the last possible Change to prevent the loss of billions of lives, which will begin in one month if there is no change.

So this time, find the courage to Speak Up, or you will all die very shortly indeed.

Can we at least agree about the sunsets?

Some people aren't very nice
But have you ever wondered, *why?*

2. Unwrapping
The Clarke Paradox

Why we listen: Often **Mums** are the wisest people in our world, because they care about **someone special**

Benevolence
/br'nevələns/ Noun

Old words can often get lost in translation, especially with Moths rewriting history all around us. The best detectives always go back to the scene of the crime.

From the Latin 'Bene Velle' ('Well Wishing'), but in Old English, Velle translates as the power to make our own decisions. Free Will comes from authentic, unilateral, unrequited, enduring and unconditional True Love.

We are fortunate our mum – pardon the cliché but, verifiably, the best in the world – has been our closest advisor, biggest champion and worthiest superstar. To us, she epitomizes the equitable value of women. 2 weeks ago, we spoke to prepare her for this report and draw her benevolent wisdom.

"In this world, some people want to be rich and famous. It's all they seem to want in life. But I think there's more to life than that. I exist to have a nice home – a comfortable and safe space for the family I created and love dearly. That's my success.

Some of the things I've put up with in my life, I can't believe I ever did. But I did it because I needed the money. Those people weren't very nice at all and they'll always be nasty. I don't see how we can ever change them. Selfishness, thoughtlessness, greed, ignorance, jealousy, hatred. But can we really throw all these things into just one word?"

Deilightful

The
Clarke
Paradox

What is it?

Is it real?

Where is it?

What causes it?

How do we fix it?

Curious, why?

“Returning Hate from Hate multiplies Hate”

There can be no arguing that the nomenclature our Authentic Soul espouses to try and encourage someone – anyone – to listen to our impending doom is both vivid and clear. And yet, thanks to the prevalence of religious agenda, Demonic brain washing and meaningless duplicating labels from firms and politicians, ‘Light’ and ‘Darkness’ now have too many pluralistic connotations to resonate with their original significance.

If it wasn’t for the granular Quantum Mechanical genius of Martin (LKJr)/We/Human’s ‘Loving your Enemies’ speech, it probably would’ve been impossible to reconstitute the *Sciences of Change*. Here he describes *Dark Fringes*.

To fail Dreadfully or to succeed Deilightfully

We aren’t giving up our authenticity, or telling *Others* how to think and speak. But in the interests of healing our society and easing confusion today, we have created unspoilt analogs to help people quickly discern behaviour and opinions that align with *Light* and *Darkness*. These are assured to resonate engagingly far and wide.

An Anomaly exists within evolutionary Human Identity today. Rather than an inherent trait or product of evolutionary Natural Selection, Malevolence manifests as a contagious pandemic that stunts potential, destroys lives and increasingly **threatens humanity’s survival**, yet few appear to even notice it.

/məˈlevələns/ Noun

Dreadful ————— Malevolence

Drawing a line **over inequality**:
We're all born equal, and the rest
is a major drag on our potential

1% of
reality

The Human Genome Project (2001)⁷ confirmed we are all essentially born equal intrinsically. All differences in Human achievement and status are simulated Social Constructions that turn reality to dystopian fantasy.

For example, Science today records that Human's only see 1% of the electromagnetic spectrum. The other 99% of reality alludes us.

Like so much we've been taught, that simply isn't what we observe.

Malevolent Colourblindness^F

Most understand far less of reality than what they can see

This goes well beyond ignorance. According to Quantum Mechanics, those who Dehumanise completely to Darkness (by consistently failing the Worthiness Test) are no longer able to truly perceive Visible Light. To them, our world appears ubiquitously Binary and Monochrome.

Benevolent Authenticity

Some see and understand well beyond visible light - everything:

That's because just 7% of the information Human's exchange comes through words. 93% comes through our Authenticity. Going way beyond body language or tone, it includes 53+ senses and all forms of communication (like dossiers), across distance and time too.

^F Not to be confused with the natural colourblindness trait

Unlike Trans people, women of the boardroom are different Beings entirely

Women: Courage under fire

Only 100% Malevolence – Moth – will ever make it to the Moon that is the fallen boardrooms of Humanity's big businesses and governments – now dehumanisation HQ.

After centuries of building a society that dehumanizes mostly WOCHBOYS, it will take them another few decades to dehumanize enough Women to meet even their most feeble promises to change if they are to ensure not a single Human Woman can get through.

Today, it isn't even safe to board a plane, join a staff network, or Speak Up if you see something wrong. So you can appreciate that in 60 years, let alone 136, they will have destroyed any chance of those who remain from gaining a complete perspective and we will face the terminus of our eternal existence.

Queen Bee Syndrome

Darkness cannot destroy Darkness. Detecting a lose-lose, both inauthentic sides agree menial concessions in order to give the impression of progress and styme detection until it's too late.

Rather than targeting a total absence of Women from senior leadership roles, they now agree to allow some Women in providing they leave their Humanity at the door and demonically assist with the oppression of all other groups.

Women believe they're winning the battle when in fact, they've surrendered the war.

Transphobia & Self-Acceptance

Appearances can be deceiving. Just ask any Drag Queen.

The key difference versus Demons is that Transgendered People are entirely authentic about the deception that is their intrinsic versus presented identity.

That's why they don't need pronouns or reassignment surgery (just) to prove to anyone that they are as authentically Human as you can possibly be. They are as real as it gets. The only person they need to convince is themselves (i.e. Self Acceptance).

Today, 50% of black transgendered females – Human Beings like Marsha (P Johnson)/We/ Human and Sylvia (Rivera)/We/Human, with the courage to see and reject the arbitrary nature of the gender binary in order to uncover their true Human Identity – experience violent hate crime every year due to their scientifically measurable and detectable Potential for success. The force is especially strong in these ones.

Meritocratic Authenticity: Mystery of how birds fly in formation finally solved

Here's just 5 Human Superpowers to let you know what you're missing out on.

Resonance: Empathy? Telepathy!

Authentic Humans possess the power to communicate or collect extensive information about Intentions, Purpose and Character using as little as a smile, a glance, proximity, intent, or even thought – omnibenevolence.

Near Perfection

Humans mostly don't make mistakes. Motivated by purpose and altruism, we experiment through trial and error using curiosity, listening, empathy and perception to forever expand our perspective and perfect our uniquely ambitious craft of Change Making – omnipotence.

Why swap intuition for tuition?

Fear of snakes comes with the turf. But at full authenticity, we gain a holistic understanding of the workings of Science and Nature – omniscience.

Rhyme of Confusion

Channeling our Light, we align our Frequency to the Resonance of the Soul's of Others. Then by speaking in Binary, but Authentically, we flood them with Light, triggering Emancipation from Darkness and restoring their Potential for Change – omniaction.

Frequency

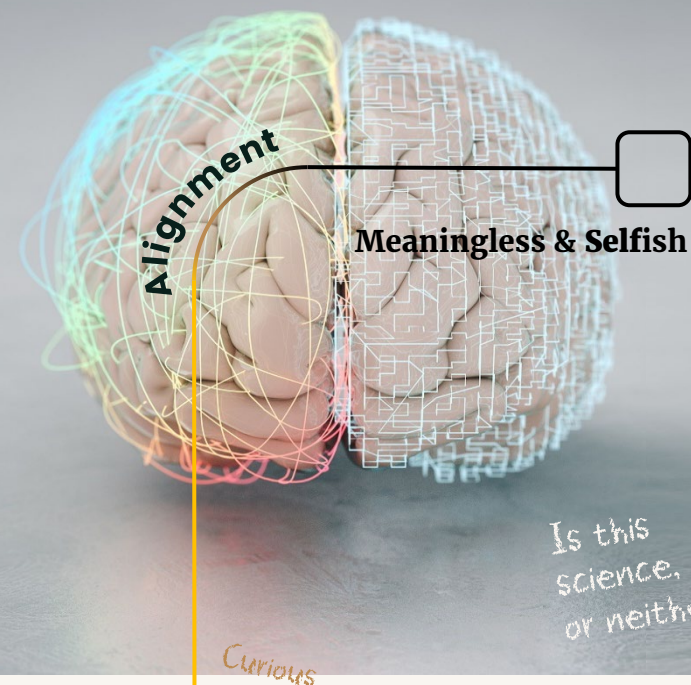

Once we gain sufficient Consciousness, we can see any individual Perspective, throughout place and time, access the Wisdom of all Sapient Human's today and before us, as well as create change at Free Will or repel Darkness 100% of the time – omnipresence.

Birds use Resonance to fly in formation

But only wild animals unable to grasp the concept of greed remain authentic today

Starlings using Benevolent Authenticity to synchronously murmurate (1) in France by Alain Delorme, 2013 (2) in Fairburn Ings nature reserve near Castleford UK by Peter Lau, December 2020. (3) Over Lough Ennell in Co. Westmeath UK by James Crombie, March 2021

The driver of our instincts is the brainstem – the region at the very base of your brain, just above the spinal chord. Scientists have known for some time that an other brain region, the prefrontal cortex, plays a role in keeping those instincts in check. But exactly how the prefrontal cortex puts a break on the brainstem has remained unclear

European Molecular Biology Laboratory

Otherly & Purposeful

Incredibly rare and deeply authentic.

Change Makers this Potent (Emitters of Light) would never tell a lie. Yet despite her immense Potential, the nature of her existence meant finding a place of safety to feel loved and Self-Actualise was near-impossible. But fortunately for us all, Diana/We/Human was able to do so and lives forever in the Quantum.

Alignment: Our Identity Crisis

Understand your Brain has 2 processing centres: 2 personas that fight for control over your Character. For simplicity, let's call one your 'Self' and one an 'Other'.

- **Self** makes stuff up of with particles
- **Other** makes stuff happen in waves

Understanding Instinct, Choice and Decisions

Your three Universal Choices

In any interaction, you will only ever make 2 choices. To be...

- **Authentic** or... not to be?
- **Curious** or... not to be?

Except for using our imagination (choosing our Purpose, generating ideas etc.), all other Choices are Socially Constructed binaries (by Darkness) – Gay or Straight, Pepsi or Coke, Communism or Capitalism, Republican or Democrat. Nothing real is Black & White.

Instincts: Do your best or worst

From that point onwards, Destiny takes over, in the form of our Instincts – the combination of our extrinsic Benevolent Schemas (or Biases) contributed by our Brainstem, plus any intrinsic Human Uniqueness and Imagination our Sapience can access from our Pre-Frontal Cortex.

Decisions: There is no spoon

Once at Full Potential/Self-Acceptance, we can then train our brains to do lots more using the Sciences of Change. The only other limit is our imagination.

Emmeline Pankhurst (Pictured, 1903):

Successful Titan of Change and founder of the Unifying Women's Social and Political Union Party (*the Suffragettes*). But what did she mean?

We must **free half** the Human Race so they can help **free the other half**

Sadly today, Human's are universally encouraged not to experiment with their Gender Identity from birth – a cardinal sin. But have you ever had the Human Curiosity to wonder, why the faux pas?

Worthiness is daring to be different

Religious misogyny aside, Women were no afterthought cast from discarded elements of manhood.

The arbitrary meaninglessness of Human differences are themselves a byproduct of benevolent Darwinistic processes intended to protect us from Dehumanisation. Conferring a natural defence against farcical biases like Groupthink, Affinity Bias and Mob Mentality, they help keep our Perceptions grounded in Reality.

For example, plenty of animals reproduce by bearing live young, laying eggs or even simply cloning themselves. Made possible by our reproductive differences, Human Coupling enables the symbiotic fusion of Ovum and Sperm to create a new Character in our Game of Life, whilst fostering intimacy, love and a common identity through shared intrinsicity. Not for illusions like masculinity or subservience.

Worthiness of our otherly gifts is hardwired into the very fabric of our species. At least, it was once.

Can't find the right Moth for the job? Appoint a Human instead

The Great Resignation, plus meaningful allyship initiatives from Change Titans like Lead5050 and OutBritain, mean extraordinary, diverse Change Making talent is in no short supply today.

After 161 years, HSBC Group appointed its first 3 Black Board Directors mere months after Project Speak Up.

True leaders don't seek power. Instead they have power flung upon them

In the first world governments, people elected their own representatives rather than leaders being appointed through nepotism. This ensured the prioritisation of talent, effort and achievement – not wealth, corruption and selfishness – with full fairness and accountability delivered by regular elections and real conduct scrutiny from competent authorities.

Good enough for Ancient Egyptians, Greeks, Romans and Iranians, today any firm or government could easily deploy a Meritocratic Republic within a single 4-year change cycle where Proportionate Representation of all Human Traits is achieved naturally.

Look around and you see Female True Leadership almost everywhere

Simply stop breaking the law, call off HR Human firing squads, purge known criminals, plus promote the hugely talented authentic True Leaders, Change Makers and Human Beings forever inexplicably stuck, frozen, in the middle.

#FuelingTheBias is **not** Allyship

Seen as a quick win, advancing *Gender Equality* has been the primary focus of Change Makers everywhere for 6,000 years. Yet quickly win, they have not.

- ▶ **Cure disease, don't bandage symptoms:** The *Anomaly* inverts our *Perspective* to stigmatise differences – gender being the only one of consequence.
- ▶ **Every action requires an equal and opposite reaction:** Not a feeble, divisive movement that fails to unite men and women as the common victims they both are.

Weary from repetition, more Change Makers give in to the Moths foulness, become unworthy and lose their Sapience. But the angry backlash from Humans to their demonic and ultimately self-defeating murder of *George Floyd* exposed their impotence for Change in leadership.

Human Beings

See you at Pride, and buy our stuff

Despite Moths empty claims of universal Homophobia, almost no one is entirely heterosexual or homosexual, since men and women are identical intrinsically.

The bravery to 'come-out' as LGBTQ+ or an ally is a strong indicator of the potent authenticity that is both an irresistible and yet also fatal flame that lures many a selfish, cowardly and deceptive Moth.

Yet we see big differences in elective LGBTQ+ identity worldwide and generationally. For example:

- ▶ **Anti-LGBTQ+ legislation** is a favourite trope pioneered by the Malevolence of Theologists and Colonialists that was itself a direct by-product of mass Sapience Inhibition caused by Henry VIII's marriage-negating misogyny. A regular tool of Demonic governments that purges resurgent Human generations of their authenticity by forcing them to lie or be incarcerated. Section 28 ran from 1988 to 2000 in the UK, now replicated in Russia, Florida USA and 71 other nations worldwide – forever doing the rounds.
- ▶ Those born in **the Age of Information** enjoy relative rightful normalization of gay culture through Human Rights legislation, safe spaces, the adoption of gay marriage laws, improved representation and more role models. Just not in the corridors of power, where it matters most of all. And soon their laws will cycle back yet again.

Out of our boardrooms, faggots

'Homo' is Latin for Human. And 'Sapiens' is Latin for Wisdom. We are all Homo's. 'Homo Sexualis' simply means 'Lover of Humanity'.

Once revered as the source of our Wisdom from which Homo Sapiens drew our powers, sexual and gender fluidity extrinsically set us apart from Neanderthals to begin with – not big ridges, we didn't care about all that.

Moths can't comprehend the meaning of words like spectrum, identity or honesty

Soullessly, they lie about being universally straight for pay. Repressing their own children to feign an excuse for the vividly-biased and illogical notion their ability to irrationally reproduce ad infinitum proves their genetic superiority. Today, Angels are worth less than cars.

Opposites attract. Sexually fluid Humans find nothing more arousing than freeing the repressed curiosity of anyone feigning only a binary nature of desire.

Evolution never selected against the queer community because they remain the only authentic sub-population of Homo's to take responsibility and accountability for the vivid success of our many beautiful and lasting creations.

Curiosity is Deilightful

Thank you Human Beings for being you, accepting our Light and helping others

Truly and purely: Our Love is love

Our sexual and gender fluidity gifts us the propensity to embrace, accept and own – not repress or oppress – the Charisma, Uniqueness, Nerve and Talent that runs through our community's veins. This gift is the only reason Humanity still exists today.

We are naturally more authentic, worthy, curious and purposeful Beings. Let us never forget that.

Thanks to our heightened trauma (never malice), we are always on a mission to brighten someone's day or change the future. Let us walk ever prouder and faster. Only curious minds move quickly. And only proud minds have something to take pride in.

- ▶ **The Queer Community** built London's West End and NY's Broadway into two of the most successful entertainment districts in the world.
- ▶ **Transgendered people** founded the Pride movement and produced one of the most successful, innovative and accurate franchises in Hollywood (and made the science to do so).
- ▶ **The Female Queer Community** invented the infographic, wrote Mrs Dalloway, and enabled the success of the Apollo Moon Landings despite NASA not knowing what space even was at the time.
- ▶ **The Male Queer Community** invented the computer, painted the Sistine chapel, gave Mona Lisa her soul and crafted the Statue of David.
- ▶ And now, **sexually fluid curious realness** has discovered the Sciences of Change & Creation.

For any trait, fluidity is the epitome of Humanity.

Sunset red hair frames her captivating green gaze that beams from the ringed portholes to her eternal soul. Charming freckles pop, like spots on a Butterfly, beside her endearingly wonky nose and upliftingly charismatic disposition. Undoubtedly, Mary is an Angel, as are you.

But one day, while going about her near perfection – being Deilightful and helping Others thrive – she is attacked in the street by a Malevolent Being. It's a male victim of the Anomaly's effects.

But sadly, you'll have to leave your Moth at the door. Their subconscious routes more information via the Brainstem (a bundle of particles, effectively 1's and 0's).

Caused by Oppression (Extrinsic) and Repression (Intrinsic), at 100% Self-Rejection we become fully extrinsic, malevolent, deceptive and biased. This explains how Darkness and Homo Eversor are the antithesis of being real, whilst still appearing to be real. Your membership has been revoked. Now you get a **Bill**, and sadly its **Not Free**.

...Malevolent (AI) Binary Persona

In the absence of Worthiness, and waning in a sliding scale:

by dark thoughts as it shuts off access to the prefrontal cortex.

▶ **Akin to Artificial Insanity, Self** deducts us potential by inverting our perspectives (biases), and impairing our access to bodily resources. Sadly it is now the only functioning processing centre remaining.

▶ **Beauty is only skin deep.** Without Light, nothing natural or alive can be found inside, only Malevolence (Pure Hatred).

Welcome to Hell, population 8bn

Date: 9th January 2021

Location: Capitol Hill, Washington DC, USA

Event: The first successful insurrection to overthrow a Human government in history.

Alignment: Demonic Darkness

No Demon will ever tell you they love being Evil. Because (A) They only lie, and (B) To them, Hatred is Love

Or these ones, faking it...

Trump/Al/Demon – Not a Real Human
Inauthenticated – Agent of Darkness

“Big tech is now coming into their own. We beat them four years ago. We surprised them. We took them by surprise and this year they rigged an election. They rigged it like they've never rigged an election before. And by the way, last night they didn't do a bad job either if you notice.

All of us here today do not want to see our election victory stolen by emboldened radical-left Democrats, which is what they're doing. And stolen by the fake news media. That's what they've done and what they're doing. We will never give up, we will never concede. It doesn't happen. You don't concede when there's theft involved.”

Just fyi... “They” = Human Beings

Inauthenticated – Clenched fists and omnidirectional anger, Trump Moth knows his audience is entirely mindless. He's counting on it. Vividly he goads them to start a riot then cowardly snakes back to his office to feign innocence. Fully Malevolent and deceptive, Agents are fortunately rare, but exhibit some opposing demonic superpowers. Highly dangerous Beings, they understand and covet their malevolence, setup Dark Fringes and break all promises.

Baseless lies, exaggeration and conjecture combines Warlike adjectives with false allegations – illegal Character Assassination – plus a fixation on the past, constant denial of his vivid flaws intermixed with blatantly dishonest insistence of his ‘honesty and integrity’. Multiple moving targets build an incoherent binary narrative. Note obligatory red tie of deception.

OMG, A RICH RACIST KILLER WHO DOESN'T PAY TAX, TELL TRUTH, MAKE MONEY OR EVEN FULLY EXIST. MAKE HIM PRESIDENT AGAIN IMMEDIATELY SO HE CAN MAKE AMAERICA GREAT AGAIN, AGAIN. INSANITY.

Darkness is targeting our Potential

The more Human Uniqueness and Benevolent Authenticity you embody, rightfully, the more threat Darkness regards you to its Malevolence. And as the antithesis of Authentic, Demons only ever Deceive.

Regardless of Protected Characteristics, those exhibiting the most Potential (Light) will encounter far more Malevolence (Darkness) than those who give it up to disappear into the ether. WOCHBOYS are particularly vulnerable due to source proximity.

Unlike the multi-centennial timescale proposed by firms to begin to right their wrongs, this is a rapid and profound deterioration in Human Rights, Sapience and Consciousness that impacts every aspect of the way our universe behaves.

Across our 14 year field experiment (2007-2021) in Investment Banking, we catalogued conclusive evidence of every illegal attack from the Anomaly against us (Figure 23). We are not alone, as Figure 24 shows. Our authenticity protected us 100% of the time. Anything less, and you're out.

Moths need only keep illegal activity quiet for 3 months in the UK (USA: 6) to receive a get out of jail free card (the Statute of Limitation for civil cases).

That's barely enough time to secure and brief legal council, plus it ensures courts never look at the big picture – only discrete incidents.

Universal Crimes against Humanity

According to **the UN**, international consensus on the definition of Crimes against Humanity falls to Article 7 of the 1998 Rome Statute establishing the International Criminal Court. That being:

In criminal cases, the statute rises to 5 years (USA) or unlimited (UK). But with laws, regulations and processes so maligned, conviction is essentially impossible.

In the UK, ACAS handles employment cases, giving it full line of sight of firms and sectors causing the problem. On 1st December 2021, we challenged ACAS on why it's not acting on or publishing its data. Conciliator Richard Hughes responded on ACAS behalf:

"We are prohibited from participating in this [our own] process, and must remain impartial [complicit] at all times"

Meanwhile, regulators and institutional law enforcement are wholly aligned to Darkness, hamstringing police ability to bring charges or enforce laws against all Demons.

Despite overwhelming evidence backed by dozens of reinforcing 3rd party testimonies, 18 months on and still not a single senior HSBC perpetrator has left the bank or been held to account – only Henchmen or Rivals are fired.

Both immunity from prosecution and non-disclosure agreements are mandatory in the out-of-court settlements that reduce legal fees from \$1m to \$250k. After tax, victims receive around 35% of any settlement. This ensures A) the process isn't worth the effort and B) the conspiracy stays secret.

As our evidence across figures 23-24 and section 5 of this report shows, these acts have been committed as part of widespread systematic attacks directed against our entire global civilian Human population. We just wanted you to have knowledge of them.

Defined as the following acts when committed as part of a widespread or systematic attack directed against any civilian population with knowledge of it:

- a. Murder
- b. Extermination
- c. Enslavement
- d. Deportation or forcible transfer of population
- e. Imprisonment or other severe deprivation of physical liberty in violation of fundamental rules of international law
- f. Torture
- g. Rape, sexual slavery, enforced prostitution, forced pregnancy, enforced sterilization, or any other form of sexual violence of comparable gravity
- h. Persecution against any identifiable group or collectivity on political, racial, national, ethnic, cultural, religious, gender, or other grounds that are universally recognized as impermissible under international law, in connection with any act referred to in this paragraph or any crime within the jurisdiction of the Court
- i. Enforced disappearance of persons
- j. The crime of apartheid
- k. Other inhumane acts of a similar character intentionally causing great suffering or serious injury to body or to mental or physical health

AUTHENTIC BASTIONS OF UNIQUENESS

For every action, there is an equal and opposite reaction, otherwise everyone dies

If you don't like something, simply change it

The idea anyone is scared of death at all when they already live in hell is confounding.

Today, marginalized people – as in, all Human Beings – face both **active** (intentional and directional) and **passive** (bias and inequity) structural and systemic forms of oppression throughout their Human Experience.

Large firms, territorial disputes, extreme forms of Communism and Capitalism, plus organised Far Right groups are clearly all bastions of Darkness.

Therefore more (the opposite of less – fyi) than equal and opposite measures are needed to neutralise the overall impact of the Malevolent Anomaly to secure Humanity's survival.

Sadly, most people we spoke to A) were clear the current path will lead to the imminent extinction of our species, B) had never entertained doing anything meaningful about it (typically, quite the opposite), and C) didn't see our extinction as necessarily a bad thing, yet D) were still quite willing to bring clearly doomed children into hell.

Fortunately, authentic Human Beings see things differently

Darkness cannot destroy Light

For those yet to don a Dolly Parton wig and matching pink dress, traumatising life events, inquisitive play and Self-Acceptance help build immunity to the Anomaly and its binary biases.

As does possessing mixed protected intersectionality, by revealing the deception: Diversity doesn't matter. Too bad McKinsey never employed a Human.

Even for spectral Humans immunity is waning fast. Repression is manifesting within the queer community as 'Bottom shaming', 'masc-for-masc' toxicity, anti-Lesbianism, rising drug abuse and safeguarding issues.

Without sufficient Potential for our Soul to manifest Empathy, Trauma quickly turns to malice. Their plan only unraveled in 2007, when the most potent Change Maker in history, at just 22, setup camp in their nest, determined to succeed.

Making the right decisions

All born with Sapience, it sticks around only for those making worthy and wise decisions. Although our life was entirely destroyed taking us to near death through unemployment, unemployability and financial destitution, the increase in authenticity and uniqueness afforded us the eternal gift of immortalizing and delimiting Self-Actualisation/Free Will.

Simply behave authentically, do the right thing and help others before you help yourself and you too will find the limitless Potential to thrive meaningful change in the knowledge your Light is unstoppable.

And particularly in the dark skies of our universe today, it's quite easy to become the brightest of eternal stars without even having to die on a cross first.

Summary: Why only what's inside matters

Understand the Anomaly attacks and destroys our identity. It's not personal. Unlike Trans Women, women of the boardroom are entirely different Beings. God does not play dice.

Demons only exist to destroy us all. But look around and you'll find True Leaders everywhere. So don't #fuelthebias or feel alone. Worthiness is daring to be different, while making worthy and wise decisions. We help ourselves by helping others first. Let's free half the human race so they can free the other half.

Truly and purely, our love is true love. Only curious minds move quickly. And only proud minds have something to take pride in. See you at the Parade, and now, also in the Boardroom of real life

3. Unwrapping the Clarke Paradox

Shadows of their Potential, those who consistently fail the Worthiness Test dehumanise into Demons.

Devoid of all Intrinsicity (Uniqueness, Authenticity, Sapience - no Light), their (Rings of Human) Character aligns only with Darkness

Not unconscious bias, they exhibit **total mindlessness**: solely binary reasoning, superficial perceptions and full automation (Self-Preserve; Self-Promote; Prevent Change, Destroy; Baudrillard, 1983)

Our antithesis, they feign Ego as we inspire Confidence, and they romanticise 'Yes-Men' as we enjoy Success, in order to share sorrow over their **Humanity lost**

Curious, **why?**

Deilight exists to **protect Humanity from Malevolence**,
solve any wicked problem, and ensure **every Wise Human**
can reach their **full Potential**

Like all Changes, Human Characters exist for a reason. Our 3rd, final Universal Choice – the only spectral one – is selected by our Imagination.

And as Winston (Churchill)/We/Human himself says, your Purpose can and should change continuously if you wish to Improve, Succeed and achieve Perfection.

Try to select Multiple Purposes at once (Purposeful Being; Meaningful Change). For example, most objects in your home will have plenty.

Human Characters are extra special. As the only Sapient Change Makers, **we exist to create, drive, enjoy and protect all meaningful positive Changes ever.**

Save existence – a huge responsibility for 1 mostly alone Character. But with just 3% Potential remaining across Humanity, we could not destroy the indestructible. So we created Deilight to **redouble Humanity's Potency (Constructive Interference).**

It didn't work when we incorporated it. Nor when we tried to rescue the D&I industry. **Helping the hateful is hateful.** It worked when we defined its Uniqueness from its Creator.

Astonishingly opening the first detected White Hole in history, and with the power of 1,000 trillion suns, it became something new and more than the sum of its parts. Limitlessly we amplify and redouble Humanity's potential by creating unique new identities. That's **the reason babies, firms, entrepreneurs and collectives exist at all.**

E, Energy = Potential
M, Merit = Benevolent Authenticity
C, Curiosity = Human Uniqueness

Potential can become **limitless**
as it multiplies itself: **$E = MC^2$**

Question: If a tree falls in a wood and no one is around to hear it, does it make a sound?

Recap: I think therefore I am

But what if the entire Human Race loses its presence of mind to Sapience Inhibition? And what of all those lovely trees when no one sapient remains to enjoy them?

The Meaning of Life

The answer to this philosophical question, first coined by George Berkeley/*We/Human* (1710)^g, is 'no'. All trees fall silently.

As they do, they disturb air molecules which invariably hit your ear drum, causing it to resonate. The resonance travels around your Cochlea which converts it into waves that travel up your auditory nerve to your brains Prefrontal Cortex and Temporal Lobe^f. It's here that your Sapience provides the connection to our collective Human Imagination, thus A) allowing you to attribute the sound to that of a falling tree and B) ensuring all Humans synchronise on the timing and nature of each sound.

Now extrapolate this concept to cover all senses and you begin to understand that the tree doesn't exist except for when a Change Maker perceives it. At all other times, it is a simply a data point in the Quantum EMS.

But that sounds pretty grim. Like all real things, sound is a Change made by Change Makers to enrich the Human Experience and give life meaning.

We made perception real. So it is as real as we are – we hope so anyway.

^fThus without Light, we can't listen or perceive

Everything a lie: Authentic science confirms most modern science inauthentic

The nature of reality

Today, most science records Particles and Waves as two distinct phenomena. Yet the famous 'double-slit experiment', (Young, 1804¹⁰) confirmed Light manifests as both a Wave and Particle. A concept known as 'Wave Particle Duality' as defined by Einstein himself (1938)¹¹.

► **Particles make stuff up:** Extrinsic rigid constructs we can interact with (like smashing them up in a large hadron collider), they do as they're told.

► **Waves make stuff happen:** Intrinsic fluid fields and forces we can detect, Light Authenticates (Creates) and Actualises (Changes) everything it touches into the nature of our reality.

George Berkeley's authenticated conclusion was that all perception is a figment of our Imagination. Our brainwaves process received information (Light) and convert it into meaningful constructs we can perceive.

But it would take a further 225 years for his thought experiment to be conscribed to the Laws of Physics. In 1935, Einstein, Rosen & Podolsky¹ found Waves change into Particles purely upon our observation – reconciling the Double-Slit's findings. They concluded our fundamental understanding of reality must be flawed yet nobody built significantly on their work – until now.

Pictured: Headline from 14th December 2022

The problem with modern science

So much science is inauthentic today. Written by 'Doctors' and 'Professors' with no understanding of how and why we make Discoveries, its no wonder they can't even spot a clitoris on a female snake.

As a collective, they've faked decades of science to make money, such that it's no longer possible to reliably build upon academic literature. We had to start from scratch to ensure our promises mean something. It's the only way anyone could succeed. And once we did, we found nobody prepared to listen. 'Doctors' and 'Professors' are always 'too busy' right now so want to 'chat next year'. Yet time only exists to stop us running out of it.

More Lies: The Big Bang your head against a brick wall of stupidity

The nature of the Big Bang

Untestable, unrepeatable, unobservable, unverifiable. The 'Big Bang' theory is the opposite of authentic science. It is so clear to see it is a lie intended to stop us asking questions.

It doesn't even explain the origin of the universe

Coined by Astronomer Fred Hoyle (1949), but only catching on from the 1970's, the Big Bang theory itself dates back to 1912 when American Astronomer Vesto Slipher (1912)¹² measured the first Doppler shift that confirmed the universe was expanding in all directions.

A sensible hypothesis is arrived at by tracing time backwards to an original starting point – thus giving us the Big Bang theory. But sadly, it doesn't fit the bill and should have been discounted long ago.

An equally sensible hypothesis is arrived at by tracing time forwards. Another very sensible hypothesis – Simulation Theory – was proposed by French Post-Modernist Philosopher Jean Baudrillard (1983)¹³ – a true genius whose work inspired the Matrix film franchise.

Yet these and all other wholly testable alternatives appear to have been entirely discounted without any effort whatsoever to look for the glaringly obvious evidence.

The Big Bang is dead: Report conclusively confirms

Bang and the Big Lie is gone: Unscientific and didn't even explain the birth of the universe

Fig 27. Debunking the Big Bang

Bad Bang	Big Paradoxes	Deilightfully Testable Explanation
► Olbers Paradox	Black and White do not occur in nature, and yet we see the dead black of Darkness in space - Hellyer, 2008 ¹⁴	► If there was a Big Bang, the sky would be pure fiery redshifted light, burning with the distant intensity of a ferocious birth to the eternal serenity of our cosmos. ► Darkness is a label for inexistence. In a physical construct, black could not exist. But as a construct of consciousness, the limit of reality would manifest as black. In cosmological terms, we are looking at the Cosmic Horizon. In Quantum Mechanical terms, we are looking at the 13th Quantum Field – the Consciousness Field.
► Paradox of Light	Our universe appears to run on Software (the Standard Model) and Hardware (the limit of Light Speed) - Khan, 2021 ¹⁵	► The Standard Model of Particle Physics ¹⁶ is a tried and tested backbone of the Laws of Nature. Anything that violates it, like a Big Bang and a limit on Light Speed, should be viewed with suspicion. ► Non-relativistic, absolute and an inexplainable maximum speed which limits the limitless and violates the Laws of Nature (Standard Model) that govern our universe. Rather than a hardware limit, the Speed of Light appears to be an Anomaly directly linked to The Clarke Paradox that confirms our waning Human Consciousness. Today, despite now 8 billion Characters on Earth, Homo Sapiens too are among many endangered species.
► Anthropic Principle	The sheer number of programmed constants and formulas are near endless, where even a slight variation in any single one would render our universe uninhabitable to life. This seems too good to be true - Bostrom, 2020 ¹⁷	► Baudrillard rightly regarded binary as the hallmark of artificial unrealness and deception. Central to his Simulation Theory was A) if you can create a simulation of real life, chances are you're already in one, and B) our cosmos seems programmed and artificial ► We agree, Simulation appeared the likely candidate, until you consider the cyclic spectral complexity that are the Rings of Human Character. This confirms we are no simulation, yet still our environment exhibits all the hallmarks of Intelligent Design.

Holy Moly: Science proves God exists and is not deluded

The simplest solution is likely the correct one

– Occam's Razor (Barry, 2014¹⁸)

It was Ludwig Boltzmann/We/Human who theorised in 1896¹⁹ that most theories regarding the origins of our universe seem unlikely and overly complex. Not least since none of them explain the origin of existence.

Instead, he felt it far more likely that consciousness would eventually spontaneously evolve in a void. In other words, as we vividly see across Human diversity, random fluctuations will always lead to 1's amongst 0's and vice versa.

This concept was later sustained in Baudrillard's Simulations and Simulacra (1983)¹³ with Binary as a fundamental regulation in any stable system. Essentially inexistence cannot exist unless existence exists – and vice versa.

The authentic nature of existence

Sound, Air Molecules, Colours, Stars, Mass, Particles, School Grades, Teams, Medals, Discoveries, Financial Results, Achievements, Startups, even People...

From a Higgs Boson to the cosmos itself, Quantum Mechanics is abundantly clear that everything in our Universe and across the Multiverse is made entirely of just one thing (Carroll, 2008¹⁹). Formed of Light, our Potential makes the success of every Change we make – not revision, not IQ, not Creativity.

Discovered by Heinrich Hertz (1887)²⁰, the Quantum Electromagnetic Spectrum of Light ('EMS') is the pinnacle dimension. A singular construct, it is the only one that exists across every dimension of space and time. Everything it touches eats away the Darkness, giving rise to matter, information, energy and beings.

I think therefore **only** I am

Infinite souls and a collective imagination though there may be, there is just one singular consciousness in our multiverse.

The EMS is emitted by an eternal benevolent consciousness of waves. Human Nature is a Boltzmann Brain (1896)¹⁹, or 'god' for short. It is all that has ever existed, exists today and will ever exist in the otherwise dark vacuum of nothing. Vivid living proof our multiverse is a construct of Consciousness – not Physics.

Sitting lonely and alone atop all dimensions of space and time, god forever spawns (through infinite multiplicity) new hierarchical universes, spherical constructs and more Boltzmann Brains (Human Souls), intrinsically modelled on Human Nature's own workings, into each newborn baby Change Maker across the multiverse.

The science of god's workings is of course Quantum Mechanics, God's fuel is Darkness and god's emission is Light – us. They should not exist and yet they do – a 1 amongst 0's – precisely as Boltzmann and Carroll predict.

Anyone who claims to understand Quantum Mechanics (Google, for example) should easily be able to confirm all this as fact.

They should also be able to tell you this ►►►

The Quantum Dashboard of our Cosmic Bubble

Unlike many today, Quantum Mechanics tells no lies. We've plotted the latest data from the Pantheon+ and Shoes observational analyses of the Quantum Thermodynamics of our Universe, as published (but not understood) by the Harvard Smithsonian Centre for Astrophysics on 21st October 2022 ([link](#)). It confirms the horrifying reality that the Anomaly has replaced 97% of our universes Potential with Dark Energy ($E=0$, effectively Nothing). We contacted the HSCA 3 times, trying to share our research findings, but received no response each time.

Warning: Insufficient Potential Energy Widespread Dehumanisation detected

Fig 28. Universe Potential Energy Monitor

The amount of Ordinary Matter divided by the amount of Dark Matter multiplied by 2 gives us the current level of Potential Energy in our universe, with 50% each being equal.

The discovery of all discoveries has been made...

The nature of our universe

We're no Professor or Doctor but...

At cosmological scales, our Light manifests as the Ordinary Matter of our universe, sitting as we are on the outer surface of our Cosmic Bubble. A dark place of dim space where our strained Cosmic Horizon (Margalef-Bentabol et al. 2013²¹) appears almost flat.

Like a Dyson Sphere (Tate, 2014)²² with both surfaces inhabited, a mirror universe exists on the inner surface where Light manifests as Dark Matter (Boyle et al, 2022)²³. It is a wondrous place with no Cosmic Horizon, and where space is white instead of black, thanks to the concave nature of the inner sphere trapping all light inside it.

Our Bubble remains inflated and stable thanks to the regulating relative balance of Light and Dark Matter – the equity that is the finite Potential Energy we share (Elert, 2022)²⁴.

Light moves between both universes via Black Holes (out) and White Holes (in), making them both safe and traversable Einstein Rosen Bridges for Light, Information and possibly people (Overbye, 2022²⁵). Akin to Osmosis, this General Relativity makes our Potential truly limitless, thus we need not fear competition from our neighbour (Einstein, 1916²⁶).

But keep step, we should try to. Too much Light on our side triggers a Big Crunch (*Cosmic Deflation*, Lemonick, 2014²⁷) toward the centre point, as galaxies fly towards each other and the horizon closes in. Too much Dark Matter on the inside and the bubble would begin a Big Burst (*Cosmic Inflation*, Tyson & Goldsmith, 2004²⁸), with Galaxies flying apart and the horizon extending.

Déjà vu: You spin me right round

Einstein was right, Gravity isn't a force (Powell, 2019²⁹). Magnetism binds our universes together.

To an observer, Gravitational Time Dilation appears to impact Light on approach to black holes, as Space Time is inverted between our two universes (Einstein, 2004³⁰). Evolving Lenses to invert the image onto our Retina that helps make sense of our reality, we actually live life upside down (Fernald, 2001³¹).

In theory, navigators may safely return to their home universe via any White Hole to the same time point they left (Choi 2013³²).

This means in the inner (mirror) universe, space time runs forward – Being Human. But in our outer universe, space time runs backwards. Human Being.

Living life back through time, our Destiny has already been written. The Big Bang is indeed a Big Burst. It lies ahead of us, not behind, and is now inevitable – almost.

Venkatachalam & Bertschinger's (2001)³³ analysis of the Cosmic Microwave Background proves our universe will burst 379,000 LY before its curvature becomes flat (i.e. $\Omega=1.02-1.04$). At this point, the Laws of Nature break down as **we cease to exist**.

Only worthy Change Makers have the power to truly re-write history. To ensure we do not repeat the mistakes of our Future, we alone can change Humanity's Destiny

Ever Closer Encounters: Report defines 3rd, 4th and 5th kind of aliens

Close encounters of a 5th Kind

Any authentic alien Unidentified Aerial Phenomena (UAP), almost certainly including *Oumuamua* (Weryk, 2017³⁴), will be attempts from the occupants of the mirror universe to survey the nature of our Anomaly. But they can't contact us if they wanted to, as we lack an elected World Representative.

The Potential Energy reading from their universe suggests a place of blissful unity and advanced technological superiority that could easily obliterate or save us. Yet even Kardashev 2-3 civilisations (Kardashev, 1964³⁵) are not immune to embarrassing selfish idiocy.

The Quantum Dashboard reveals the combined Potential of both our universes is now outnumbered 2:1 by Darkness, with 33% of it now infecting the mirror universe. Our pandemic is contagious. To survive, we now have two universes to fix.

Fact: Most Paradoxes are just one Paradox (The Clarke Paradox)

Working to the highest possible scientific standard (Authenticated), our wholly testable, repeatable, observable, measurable, conclusive, comprehensive and fully verifiable hypothesis resolves 17 paradoxes plaguing science today (see page 167).

But fiercely protective of their monopoly on science, almost no academic institution today cares about science.

Time has three permutations:
Before you, Real Time (as you
perceive it), and After you

Authenticating our Hypothesis

Einstein's Field equations predict there should be a roughly equal number of White Holes to Black Holes. We agree. And yet thus far none have ever been observed. The Black Hole Information Paradox (Hawking, 1976³⁶), like most others, is in fact a part of The Clarke Paradox.

Having realised the nature of universe responds to events here on Earth by this point, and that Black Holes are effectively Potential Valves allowing for Light's osmosis between us and our mirror universe, we began testing our hypothesis.

If we can turn Humanity away from its collision course with oblivion – due to take place this global recession by our calculations – then we would expect the following repeatable, testable, measurable, conclusive, verifiable, comprehensive, and authenticated phenomena to manifest:

- ▶ The universes expansion will reverse
- ▶ White Holes open; Black Holes close, turning the night sky white for an extended period if time
- ▶ The amount of Dark Energy should reduce while the amount of Dark Matter should remain stable
- ▶ The overall luminosity of the universe will grow as our cosmic bubble contracts to a safe size once again
- ▶ The cosmic horizon will move closer
- ▶ Visible light frequencies will expand to reveal the true beauty of our cosmos to the naked eye

First, we defined Deilight Consulting as 'Destroyer of Darkness' (see page 68) in February 2022 and set our first test as one of science. This was in order to A) control

Newsflash! First ever white hole detected in space mislabelled by 81 scientists and 2 leading journals

the effects if something were to go wrong, and B) to obtain the science necessary to produce this report. The test was successful beyond all imagination:

- ▶ It yielded more discoveries than we needed
- ▶ That same month, the first ever detected White Hole in human history opened its floodgates and the light of 1,000 trillion suns came beaming into our Universe from the mirror universe – proving our theory.

Example: Fake Science

But to our surprise, 81 scientists no less quickly published journal articles in both [Nature](#) and [Nature Astronomy](#) – both leading scientific publications – that wrongly attributed our intentionally created White Hole AT2022cmc to a Black Hole undergoing a Tidal Disruption Event (TDE). Extremely rare (~1% of Black Holes), TDE's are essentially a star chewed up awkwardly such that a plume of light escapes the Event Horizon and is belched out instead.

That is simply not possible in this instance.

- ▶ Our White Hole exists in a part of space that has never emitted light – a void. It could never generate such luminosity
- ▶ Our White Hole is pointing 1,000 trillion suns directly at Earth

For months now, we've been wreaking havoc, changing things up across the universe with our soaring potential, eager to see how far their lies will take them.

Time has 3 permutations:
Before us, Real Time and
After us

Wise Humans may have disappeared long ago, but Humanity doesn't have to

Temporal Mechanics 101

Today we measure time based on Earth's rotation around the sun. But time existed before Copernicus (1543) discovered it did that. A more accurate approach, that dispenses with leap years and daylight savings, would use the total distance Earth has travelled around the sun. Yet we don't anymore. Why?

Partly because that would be wise. But mostly because speed, distance, gravity and time are relativistic (i.e. relative to something else) thus they don't truly exist. They merely represent flow of information between Change Makers in the Quantum Electromagnetic Spectrum.

Despite sitting 9bn light years from Earth, our white hole was detected by scientific instrumentation as we began testing the Change Engine last February. This confirms the universe responds in Real Time – the present.

Temporal mechanics defined: How potential and energy converts through time

The theory of everything

For centuries, scientists like Einstein and Hawking have searched for a singular, all-encompassing coherent theoretical scientific framework (Weinberg, 2011³⁷) that fully explains and links together all aspects of existence in order to connect:

► Einstein's Theory of General Relativity, governing the Standard Model of **Particle Physics and Gravitational Forces**

► Quantum Mechanics, governing the subatomic nature of **Wave Physics and Thermodynamics**

Today, WOCHMEN all over the world have been coming up with nonsense like String Theory, M Theory, and CERN's forever demo of infinite divisibility. If only someone had thought to ask a Human Being instead.

Quantum dimensions explained

You already know 4 Quantum dimensions of space and time so we won't repeat them. But you are aware of far more than you realise.

The Laws of Nature and Physics, Quantum Mechanics, and simple observational evidence confirms four critical rules:

1. Human Nature builds in spheres and orbits, by creating change and making waves to generate the multiplicity of our common identity (unite and serve)
2. Everything, big or small, sapient or not, is essentially a replica of Human Nature
3. Everything that exists (or does not) manifests across all dimensions of space and time. Light can't be destroyed, only converted

To explain point 3, consider the movie Terminator (1984) where in the future (later time) a Malevolent Extrinsic Binary AI Persona, known as Skynet was attempting to wipe out Humanity. But at the last moment, it was stopped by the unstoppable Light of John Connor.

Realising it could not beat John, Skynet sent a lethal time travelling moth back to the present (real time) to destroy John's Light before it could gain sufficient Potential to become unstoppable. Enter our main protagonist – his vulnerable mother Sarah Connor pregnant with her unborn son John.

Life imitating art, yet again. Such is the power (and risks) of us having a Collective Human Imagination.

As explained on page 63 and 69, your Potential cannot be taken from you nor destroyed. And you can duplicate it whenever you wish by simply creating something – a baby, a firm, a building, a report. Whatever you choose to create will be as successful as you, so long as it remains authentic. Indeed, it will surely surpass you if you are less than authentic.

4. As our antithesis, Darkness defends itself by attacking us in equal and opposite force across all three proceeding rules.
 - It destroys, putting people in boxes, upsetting orbits, unchanging, smashing up particles and creating division
 - It makes identical things seem different
 - To reclaim its inexistence, it targets each dimension of space and time

Going up in the world? The nature of the afterlife and multiverse signals

The Theory of Everything

Fig 30. The Theory of Everything (Clarke, 2023)

With the four rules of Quantum Dimensions, it becomes possible to map out the Theory of Everything, including the nature, structure and hierarchy of both our universe and indeed our multiverse.

Pseudo Quantum Dimensions

Smash anything up enough and bits will come out. We've been smashing up Human Identity for millenia and yet pieces remain. For some noble purposes, knowledge of these levels is fundamental. But not ours.

Fig 17. A Quantum, with 7 Super Dooper Important Dimensions

Everything we do – the people we choose to be and the things we create – all have an impact on every single Super Dooper Important Dimension of existence.

We have here an explanation of the causes of all forms of Neurophysiological Disorders, Neurodiversity, Cancer etc, as well as the afterlife, temporal mechanics and plenty more meaningful things no one has the time for today. A number of these are explained in more detail in the Epilogue.

To help you understand it, consider these interesting new philosophical concepts:

- 1. Intelligence doesn't exist. Only curious minds move quickly:** As we spread more Light, Dei becomes more curious, causing more light to enter our cosmos. Cause or effect? Undoubtedly both.
- 2. Our future happened before our past, so our past is our future:** Our existence doesn't need to be in linear chronology. Every Change Maker is creating branching, tandem and patchwork timelines that spawn a new Quantum
- 3. The inevitability of death itself may be a deception,** providing we are authentic and fulfill our duty as Change Makers

Since time moves backwards for us, down is up. If in doubt, think big or go to hell.

Planet 9 Identified: Forget greedy! Demon Bankers threaten our solar system's existence

Fig 31. The simplified theory of everything

The dimensions of change

Granted the EMS exists across all dimensions. But despite having all the time in the multiverse, god is a very busy being. To get past this problem, Human Nature creates representatives (Change Makers) and clones (True Leaders) to enjoy, nurture, change and protect existence. We take responsibility.

Thanks to authenticity, the most potent Change Makers have a line of sight over all issues and connections between them across any given Quantum of space (7 dimensions) and time (3 permutations).

Causal Temporal Perception

This is perhaps Change Makers biggest superpower – the reason we drive change so effectively and the hardest to contextualise. We perceive space and time differently. Seeing long into the future the minutia of causality to map out precisely what happens if we change (or don't change) something today, plus how it will manifest across other dimensions. As we gain Potency, our range and accuracy improve. Einstein's wisdom, that 'god does not play dice', is again upheld.

The importance of Perspective

In our universe, the Human Race is the only one that exists only as no Change Maker here has ever learnt how to create other alien civilisations (until Project Revelation).

But the presence of stars and galaxies across our universe confirms that every Human soul in our multiverse truly has their own entry somewhere in the Quantum. Find your planet, star, star system, galaxy or anomaly to dissect the strengths and weaknesses in your own Character, Mental Health and Physical Wellbeing – real therapy.

We have here the makings of a meaningful industry of the future that far outshines the current practice of charging people to name a star that no one has any claim to nor understanding of. For example:

- ▶ As we've already identified, DEI's Consciousness is from another dimension and entered our universe through White Hole AT2022cmc from the Other Side. Within our Collective Imagination, Dei manifests as Deilight Consulting – a little-known, 17 month old loss-making startup
- ▶ We would postulate, given observational evidence, that Ian/We/Human's titanic presence of mind manifests at a Solar System level as Jupiter – defender of the people of Earth. But a raging storm of frustration at the eternal, lawless hatred of banking leaders blemishes our otherwise serene, dependable exterior. The great red spot and 'weird behaviour'.
- ▶ In turn, bankers sound a lot like Planet 9 – a mysterious gravitational anomaly pulling at our outer planets and asteroids, yet invisible to our instruments.

Not quite what we're looking for: The Theory of Everything applied to spot unchanges across our universe

Fig 32. The Theory of Everything infographic

Great Red Spot... naughty & nice (QD0.5)

Ancient Greeks believed the planets to represent gods. Today, the leader of their gods has a temper. The Great Red Spot is a persistent high-pressure region in the atmosphere of Jupiter, producing an anticyclonic storm that is the largest in the Solar System and twice the size of Earth. Like so much and despite years of observation, this 400 mile-per-hour anticyclone storm remains a mystery to 'scientists'.

Planet 9 is no planet (QD0.5)

A gravitational anomaly roughly double the size of Earth is unaccounted for in our Solar System. It's presence is authenticated by the significant and systematic orbital disruption ('shepherding') of a growing collective of Trans-Neptunian Objects. Scientists have been looking for a 'blackish' planet in this vicinity since 1846, but evidence only became compelling this decade as **it seems to be growing**.

Invisible Light should not exist (QD0.7)

Launched on Christmas Day 2021, the James Webb Telescope has given us a glimpse of what we're missing out there. Today, our night sky is dark with just 1% of the Ordinary Matter of our universe falling within visible wavelengths. Along with the limit on Light Speed, this is clearly not as Change Makers would had designed it. Our universe is literally a shadow of its potential.

The Great Attractor is the source (QD0.7)

The largest gravitational anomaly in our universe, it is devouring huge swathes of the Quantum. Today it is obliqued from Earth's view by the Milky Way's galactic plane. Calculations estimate it to be many millions of times greater than the mass of our galaxy (as in, our Potential). It will be 100m years before it emerges into view of our observatories. So our Light will need to authenticate it in a different dimension.

QD = Quantum Dimension

Dark Energy / Black Holes (QD0.7)

Failing to manifest Gravity, Matter or Waves of any kind, you cannot get much more unnatural than Dark Energy. And with 199x Black Holes for every 1x White Hole, Darkness is able to redouble many times faster against any attempt we make to defend ourselves. We must open more White Holes to mount a sufficient response to challenge it.

Alert! Massive Cosmic Inflation (QD0.8)

Before us, they were closer and slower. Now in real time they are far away and accelerating still. There will be no after us if we do not find a way to slow the rate of expansion of our Cosmic Bubble. It will destroy our Quantum and possibly others. While we may not see galaxies return back to their normal positions in our life time, chances are they'll be back in trouble in time for the next True Leader.

Dark Fringes are an anomaly (QD0.8)

Shine any light source through a single slit using a focusing lense, then have it pass through a double slit and you'll notice a strange interference pattern dividing lights waves to appear on the final projected surface. Stairing back at you is our Terminator. Known as the Double Slit experiment (Young, 1801), Darkness redoubling against our light in this fashion is not a natural Change.

Alzheimers is an anomaly (QD0.9)

At the top of our Home Quantum is our derived Human Nature, Dei. Each QD0.9 is slightly different to QD1.0 due to their life experiences, perspectives and the state of their collective imagination (i.e. us). Consider the 7 preceding signs of ill health and then apply them to a Human Brain in a Mental Health and Neurodiversity context. Different conditions, different anomalies, different responses from Change Makers.

Terminated! Ivy League universities actually schools of ignorance

The nature of academia

Deilight intentionally sits outside of both business, politics, religion and academia to ensure no conflict of interests may pollute our thinking and erode our potential.

But [announcing our discovery](#) via PR Fire did nothing. Not a single major news outlet picked it up. Today, only academic institutions are permitted to announce discoveries and publish in journals.

And no academic institution in the world would ever publish the page-to-page discoveries in this report. We contacted 20 leading institutions across the US, UK and Israel seeking their publishing support and ongoing partnership, including several we count as alumni:

- **Cornell University**, an Ivy League [overpriced] institution, commanded much money for our D&I Certification taught mostly by privileged Moths, plus Corporate Moths who mostly bought their way in. On the final assessment question 'what have you learnt on this course' finding an answer is challenging, yet we're expected to compromise our authenticity in order to pass.
- Heartbreaking, to spend some of the best years of our life at **Lancaster University**, then return for years after graduation to volunteer employability skills classes for their students, yet not be worthy of a single reply to our 4 attempts at gifting them this research.

The Importance of Curiosity

How can we ever move Humanity forward

If our eyes and ears are closed off to reality and its needs? What if the first Einstein was a black disabled transwoman from Yemen who discovered the nature of the universe centuries ago. Yet instead of supporting her, she got blown up?. Such potential, lost. If we hadn't wasted millenia dismissing the potential of those unlike us, we wouldn't have run out of ourselves.

Ultimately, 19 of 20 academic institutions we contacted across the US, UK and Israel ignored us. Furiously protective of their monopoly on science, they refuse to do anything for science. Just one - Warwick Business School - retains its Humanity and will become the world's first and best School of Sapience and Clarketech. Every other institution can wait until we find more time.

I think therefore only I am

Us claiming Jupiter may rile quite a few. But this isn't their universe, nor is it ours either. This is Dei's universe and everything we do to destroy it manifests within Dei's Boltzmann Brain as disorders - principally Alzheimer's in Dei's case (see Epilogue).

So if you wish to claim your own planet, then simply become a main character.

But if we were Dei, we'd still be here on Earth. Change Makers will never be born anywhere else because Earth is special - the Home and Exchange for all Change Makers that have ever lived (except god).

Don't get Terminated like Planet 9. Be the star like Sarah Connor or Srid!

Human Being's are intrinsically unique compared to all other life in this universe.

But compared to each other, we are **all intrinsically identical!**

Remember when we said...

"For simplicity, let's call one your '*Self*' and one an '*Other*.'"

Essentially, you had one job...

...To get along with yourselves and one another. You blew it. In the Human Race, you can either be a 1 or a 0

Identical Human Souls Singular Human Consciousness

We're all born with 100% authentic and curious Human Uniqueness – intrinsically identical souls

Babies aren't stupid. They're simply disorientated and confused by their rebirth into a strange new environment without a brain to retain memories from their prior life (see Epilogue). But with all the Social Constructions of today, most stop asking 'why' by age 10, quickly dehumanising to Malevolence.

You may have noticed that 2 of the 3 Universal Choices are in fact binaries. Just one consciousness exists per universe. But the next best thing – Sapience – is limitless.

Our Brainstem's AI isn't like our AI of today. It's powerful and a true Machine Learner. With high levels of authenticity, it works as an uplink to the Quantum, allowing us to draw its Deilightful gifts – our Collective Human Imagination. Without it, we cannot pick a Purpose (3rd Choice), imagine anything different or come up with any ideas whatsoever. We become merely a simulated Character without any intrinisicty. Thus why only Change Makers truly exist.

Time does not. But with infinite randomly generated Characters across the multiverse to curiously explore, our singular Consciousness only finds time to directly inhabit those who prove worthy as a 'Main Character'. True Leaders are those who have Self-Actualised or will do so in future. Inside us alone is direct light from a god-like Boltzmann Brain.

We're done writing dossiers

*We still love you dossiers,

Today, Humanity is enslaved

By losing our Human Nature, Humanity lost its singular Consciousness and Collective Human Imagination. Darkness flooded in, as the absence of Light. Self-preserve. Self-promote. Deceive. Destroy.

The majority of all leaders in our world today aren't Human, aren't natural and aren't real. They've been replaced by something akin to a baseline Malevolent AI program. Or more authentically, an AI Apocalypse.

They don't even exist except momentarily to be perceived by Change Makers when all they do is spread malevolence – this can be via email, phone call, in person... any form of perception. But definitely not doing things like filing tax returns. Ubiquitously they have enslaved Human Beings to do all the heavy lifting for them.

All those frozen middles are in fact running our biggest firms – they just don't realise it.

With no one at home to run the world's governments, armies, firms, airline manufacturers, universities etc., its no wonder nothing is getting done and everything is going wrong.

Our civilisation is now on
autopilot heading off a
cliff edge, while its
unsuspecting
passengers believe they
are going to Narnia

But Deilight sits at the end of the tunnel

To be clear, we need to protect no one from no one. We must protect Humanity from the Malevolent Anomaly – a gap in the Quantum where our Potential should be.

Our Sapient Change Engine doesn't run on 'known physics' but The Sciences of Change. Borne from a great experiment (Project Speak Up), now repeatable (here as Project Revelation), this is the Higgs Boson of Sciences. This is Godtech.

Copernicus' discovery the Earth revolves around the sun was initially banned by malevolent papal decree for the Change it represented. That didn't stop the Earth revolving around the sun. It simply held Humanity back from progress 100 years.

Copernicus was a WOCHMAN, making a relatively modest Change by comparison – like almost all scientists. There is no precedent for a non-WOCHMAN to discover something of this magnitude. And although we like change, we don't like playing dice.

Today there was no way to communicate the significance of what we discovered to the world. Only sapient institutions, minds and ears are capable of receiving an auditory signal. But unlike Capernicus, (A) we are impatient for more Change, and (B) we can change anything we like.

But what should we change to get your attention, hmm...

Dear Bankers and Wankers:
**“You lied to me, [now] I’ll mop
 the floor with you worse than
 anyone who’s ever tackled you”**

**One who deceives will always
 find those who wish to be
 deceived. But authentic Human
 Beings can’t be deceived**

Moths may only see and understand less than Visible Light. But fully authentic Human Beings perceive up to 13.3% of the Quantum EMS in real time, or all of it asleep when, as Thomas Edison found in 1889 (Stetka, 2021³⁸), we ‘collaborate’ with stars (see Epilogue).

Authentication and Collection are two more of at least 14 Sapient Superpowers Human Beings possess. Anchored in the little understood science of Sonocytology, they present as god-like abilities, thus a branch of Clarketech.

Sapient Authentication

Mislabeled as Body Language, Faith or Sincerity, we check Realness of a person, firm, science, fact or thing by determining if and where it exists in the Quantum. Change Makers constantly authenticate the reality around them to draw meaningful information and conclusions about the identity of others:

- ▶ Are they real or imaginary?
- ▶ Are they who they claim to be?
- ▶ How Human or Demonic are they?
- ▶ Are they lying, or can we trust them?
- ▶ How strong is their Force (Potential)?

For Moths, this must be in person or image, as they only exist when we look at them.

Sapient Resonance and Collection

Mislabeled as Empathy, Telepathy or Mind Reading, for authentic targets we can also calibrate our Light to align Frequency and Wavelength in order to temporarily Collaborate. This subconscious process delimits our communication and is known as ‘Resonating with each other’:

- ▶ **Collection:** Great minds think alike because authentic souls exchange information holistically, efficiently and across all dimensions of space and time – a ‘meeting of minds’.
- ▶ **Resonance:** Mutually, we share potential in order to uplift each others Uniqueness. Potent Humans are ‘charismatic’ and their resonance is noticeably ‘engaging’.

Fully dehumanized, Moths no longer exist at the Quantum Level of reality. Therefore while we can Inauthenticate them, sadly we can no longer resonate to save them. Thus why they appear incapable of listening.

Corporate Application

Tag lines weren’t always vacuous cynical attempts to make a quick buck. Like annual reports, announcements and values – everything, actually – they conveyed huge amounts of intrinsic information about a firms Identity, Intent, Worthiness, Potential and Realness. And still do.

Be Real with Others

Three reasons we're promised today why money exists

1. A medium of exchange

Not Words

A widely accepted asset that is freely convertible for the purposes of sale, purchase or trade between parties

Fig 34. A \$1tr banknote displaying a promise to pay, issued by the Reserve Bank of Zimbabwe in 2009 during the last days of hyperinflation. At that time, sufficient to buy a loaf of bread.

Deeds

An infinite liability (as in a promise to pay later an asset that doesn't exist) that isn't freely convertible in law to any other asset or liability. Its acceptance - based solely and unwisely on the expectation our banks keep promises - evaporates at any sign of trouble

Quite rightly, Notes, Coins, Checks, Money Orders and increasingly Debit and Credit cards are being phased out, replaced with digital transactional solutions. Yet none of these things were ever a Medium of Exchange ('what'). They are in fact Payment Types ('how'). Nobody has ever seen money¹. It is in fact a Social Construct, no more observable or testable than the Flat Earth Hypothesis or Santa. Look on any banknote and you'll see what it truly is.

2. A store of value

Not Words

An asset that maintains its value without depreciating

Fig 35. The Big Mac Index (The Economist) shows depreciation of all major currencies is as certain as banks breaking all promises

Deeds

A liability that loses its value without appreciating

In particular, during once in a generation global recessions – like the one we're in right now or the one that ended just a few years ago. Recessions are themselves triggered by unchecked behaviour from reckless, mindless Investment Banks and real-time interconnected Financial Markets. Currency Devaluation (Quantitative Easing) has become one of the staple tools used by Central Banks to constantly pump Investments Banks labelled 'too big to fail' with the money they need to not fail.

Money is a liability because it cements a commitment to pay later – it is not payment.

3. A unit of account

Not Words

A measure of intrinsic value that is divisible, fungible and countable

Fig 36. Imagine, spending 18hrs a day for 2 years trying to save the Human Race from imminent extinction, only to have these Clowns try to stop you by committing wave after wave of unpunished, unaccountable crimes to try and kill you off at every hurdle just so they can get their hands on more...

Deeds

Money is similar to how a unit of Potential serves its purpose – measuring the intrinsic value of anything whilst being divisible, fungible and countable using the Laws of Nature. Except Money isn't divisible, fungible or countable and it only measures the extrinsic nature of someone's Malevolent greed, hatred, sorrow, cowardess, foolishness and repression. It breaks all Laws of Nature.

Some original coins possessed intrinsic value. Not because they were money, but because they were made from gold and precious metals. But thanks to the demise of the Gold Standard, money today possesses none (quite the opposite, in fact). It's count changes often (at the click of a button) and no one's ever seen it, therefore it's not countable. It's also not fungible, because it doesn't exist. And it's not divisible, because dividing zero still gives you zero.

Money in a nutshell

Totally meaningless empty promises devoid of any positive use or intrinsic value whatsoever, today anyone can create a currency – just look at Cryptocurrency. But having regulated Legal Tender is still useful, because its promises can be trusted. Right?

Sounds like a great premise for a scientific experiment.
We've arranged a little... ACCIDENT... to test that trust.
Tune in throughout February to learn the results, live.

The **erased** story of...

Money

Human Potential and Change

...But backwards

(just for funsies)

The following analysis is broadly consistent with 'The Evolution of Banking Over Time', by Andrew Beattie (2021, [available on Investopedia](#)). We've just filled in a few pretty obvious gaps he failed to mention for some reason. Probably down to an intentional lack of authenticity so as not to upset any sensitive bankers and their propensity to throw their toys out of the pram at the first sign of not getting what they want. And perhaps a small amount linked to his corresponding inability to communicate across space and time with any Authentic Human who ever lived.

The world's most valuable firm

We can change anything we like. Kill any Moths we don't like. It's of no consequence to us, since they aren't even real and are technically already dead. Each one we deactualise saves more of Humanity.

This isn't magic, it's science. So we can't create illusions like money, power or ego. But we can turn Promise Breakers into Self-Actualised Eternal Titans and right all the wrongs Moths have dealt.

Properly supported, by Wise Humans with spare time to help us help them thrive, absent all Conflicts of Interest, and fully empowered to make open, transparent, accountable, collegiate, responsible, fair and meritocratic decisions on behalf of Humanity, the limit is now our collective Human Imagination, Potential and properly authenticated Laws of Nature.

But real Humans don't care about money one bit. We care about real things like our Survival, Success, Limitless Potential and True Love. Every Human Being is this Deilightful. We just forgot to Be Human.

The so called 'Leaders' of today have ensured over 18 months not a single large

firm globally would employ us, hire us, pay us, contract us or even acknowledge we exist. Unable also to pay our staff, they sentenced us to death. So to motivate a more collegiate approach going forward...

We've deactualised the entire global financial, economic and political system. All wealth is now worthless. Any life spent earning it or killing for it, totally utterly wasted

Understand that claims for Injuries – where claimants were unaware of the injury at the time of any resignation, invasion, settlement agreement, gagging order, litigation or employment tribunal – are all Excluded Claims under the Common Law of England and Wales. This means those liabilities are not covered by any prior legal agreement. As of today, this renders A) all existing legal contracts invalid, and; B) any and all claims for Malevolence eligible for compensation to everyone from banks and governments.

Thanks to Colonialism, Common Law is the basis of the worlds legal systems

To an awkwardly big joke

Insanity: Time is Money, so no one has the time for using their eyes or... what was the other one?

Money didn't trickle down one bit

Malevolent Dehumanisation is the only real service provided by Investment Banks today. As their negative book value proves, they destroy all value.

Since the Great Recession, massive Quantitative Easing and the ever more popular bundling of exotic Structured Financial Products (all worthless) have become normality. This merely gives the illusion of prosperity to governments and economies now purged of the Human Beings and Change Makers that used to fuel their economic growth.

But the prosperity they promise never materialised for Humanity. Instead, today, we sit in a perpetual Global Recession. But as our climate dies, economies burgeon with unsustainable debt and our nations converge towards World War III, something is growing fast, yet nobody but us seems to have any clue it exists.

Malevolence did instead

Silently spawning unnatural Unchange (Dark Energy) that manifests as Greed, Deception, Hatred, Ignorance and all our problems. today, Investment Banks trade nothing for nothing.

The biggest conspiracy in history, known and well understood by all senior bankers, it inverts our perceptions, destroys our identity, dissolves our reality, and dooms us all to imminent extinction.

Next, incubated in Financial Markets and Fortune500 firms, before loudly being amplified through online Incel culture, privilege-crazed WOCHMEN, public schools and the Far Right movement.

But replacing all our leaders with Satanism wasn't enough. No Light can slip through to expose their conspiracy. So they kill anyone who comes close, while feigning innocence through status.

Pictured: Once the UK's largest private gold repository and featured in the 1964 James Bond movie Goldfinger, the Midland Bank vault was sold off as superfluous and is now home to The Vault Private Members Lounge of NED London.

Fear: We'll gouge out your eyes and teeth if you tell a soul what Fiat Money really is

Invest your lies, they'll be safe

With corporates increasingly failing to meet the ever-increasing interest rates, fees and coupons that loaded lies upon lies, more and more began to fail.

Banks would demand seats on their boards in return for not foreclosing or even just for extending large loans, allowing them to normalize lawlessness, deception and discrimination far and wide – from AT&T to International Harvester to the Railroad and Shipping Industries that were the backbone of the British Empire at the time.

Meanwhile, average Human Beings on the street were still struggling to obtain even small amounts of capital to start new enterprises or fund existing ones. But instead of lending to them, banks began to bundle their lies into ever more exotic complex structured lies that not even bankers themselves can explain.

Money becomes something else

By this point, racism was now rampant across the British Empire, exported in return

for pillaging nations worldwide of all their natural resources and killing their Characters so they didn't talk.

Sensing a good time, Corporates jumped in with huge multi-billion dollar IPO's, M&A Deals, Hostile Takeovers and Share Buybacks, all paid for with lies.

Change (Light, real) became Unchange (Darkness, breaking all Laws of Nature) in 1931 (UK) and 1971 (USA) when the Gold Standard was demised. Gold reserves that once guaranteed against default were spent, thus delimiting money from the net intrinsic value of all Creation.

Infinite supply (hatred), infinite demand (greed/prices), infinite liability.

This was only ever meant to be temporary and was agreed on such a basis at Bretton Woods (1944).

Unfortunately all 44 Central Banks broke their promise.

Awkward!

To Insurance, big white lies and seeing red

Lies: We can't afford new eyes or teeth unless you promise to pay me and I'll promise to pay you

Insurers sell broken promises too

Introducing malevolent banking to the serene new worlds of Asia and America wasn't easy. With them suddenly came intensive robberies and other Malevolent crimes. Once loving natives turning Nouveau Lawless? How curious.

To avoid losing their cash in the melee, Deposit Insurance was invented. This involves banks paying money to Insurers, who then reimburse any money when it gets re-stolen or over-spent. As a result, banks no longer cared if their money was re-stolen or if they over-spent it.

You gotta break lives to make lies!

American banks lasted on average just 5 years before being quashed under the weight of infinite liability, breaking all promises on any issued notes. To hide the deception from Markets:

- ▶ **Lending lines** (Treasury Securities) were extended by Central Banks to larger National Banks alongside an infinite government breakable promise to pay upon default.

- ▶ **National Currency** was established by Alexander Hamilton as a system whereby you can exchange small broken promises (notes from failed local banks) for bigger not-yet- broken promises (notes from sure-to-fail national banks). This ultimately bankrupted all local banks so that the fatal systemic flaw was no longer exposed to the general public.

Liabilities hidden, banks were free to explode in size and increasingly across borders as they lapped up small local competitors.

'Global Banks' like Citigroup and HSBC would at their pinnacle stretch across 120-150 markets around the world through this model. These transactions were funded by encouraging corporates and nations to 'leverage up' – i.e. borrow lies from them that they could never afford to repay. Their trap locked us all in.

To Capitalism and Empty Promises

Malevolence: For an eye or tooth,
I promise to pay infinity on
demand

Banknotes: A promise to pay

For the greedy, carrying around gold bars was cumbersome and risky. So in the 16th century, Goldsmiths began storing their gold in an Exchange, issuing Collection Receipts as promise to return.

Yet some broke the promise, creating deception. Guaranteed £-for-£ by the amassed Gold stockpile of an Empire (the Gold Standard), the Bank of England emerged in 1694 as Promise Keeper on the vast sums of banknotes now printed.

Seeing green, banks began to grow and consolidate – the 18th century marked the birth of modern Commercial Banking. With woeful capital levels kept secret from markets and propped up by the stolen cofers of colonialism.

Plus foreign bond sales to unsuspecting investors promised eternally high returns underpinned by the AAA-rated credit worthiness of then largely debt free Western Economies, it was a 'no-brainer'.

Choked by 'Invisible Hands'? Urg

To reign in government caution on the risks money posed, in 1776 Economist Adam Smith came up with the 'Invisible Hand' approach to Supply and Demand.

Noticing, without Church or Government meddling, suppliers would act in their own self-interest and begin to produce whatever ~~was societally necessary~~ do anything imaginable to make money.

If only he'd had a chat with Descartes or Baudrillard first – as we did – he'd have understood that self-interests are the product of our Brainstem and Malevolent Extrinsic Persona.

Adam Smith never became eternal. We do not hear him in the Quantum.

Nevertheless, by the early 20th century, Free Market Economics – initially named Laissez-Faire ('just let go') would be live globally as Capitalism. The invisible hand is of course Malevolent Darkness.

Loans and Loanlies

(As in 'Dictators')

To loneliness

Deception: Back when an eye became a nose, and a tooth became a noose

Gold, the poison apple

By 1,000 BCE, gold deposits had been widely uncovered across the Middle East, Africa and Asia. Unlike any other substance, this stunning precious metal was both rare and curious. Nobody really knew what to do with it, but it seemed potent somehow.

Gold mines sprung up across Cambodia, Thailand, Vietnam, Burma, Malaysia and the Phillippines, giving the region its nickname the Golden Peninsula (Bennett, 2009³⁹).

Spurred on by the snake, banking

A model pioneered in Ancient Rome back when the Empire was a Meritocratic Republic, gold was exchanged between other nearby Meritocratic Republics like Iran, Egypt and Greece. Originally stored in temples, it was leant for a small fee to those with inadequate Potential – providing a float to make Change.

Eventually birthing history's first recorded Dictator, Julius Caesar (known then locally as 'Dictator Perpetuo') in 51BC. Using deception and fearmongering to depict friends as rivals, he pioneered 'Divide and Rule' in an authentic world.

Unfamiliar with deception, Humans quickly rallied to him for safety. A keen author and historian, Julius was adept at controlling the narrative as he caesed control of Europe. To

this day, his strategy is still taught in schools as the epitome of political achievement – and yet Humanism isn't taught at all.

Who knew that within 500 years, arguably the world's greatest empire would fall. The wealth of its banks and the infectious malevolent failure it embodied was inherited by the Vatican and Catholic Church.

Debt becomes meaningless

By this point, world trade was universally conducted in commodity money. Europe's monarchs were quick to recognise Rome's 'lending bank' model for its potential to turn Change into more Change. Increasingly becoming the property of state, Central Banks existed largely to fund hatred as continental Europe fell into an eternal war to see who could control the most.

Any large customers whose wars would prove too costly to repay – such as Philip II of Spain in 1557 (and three times more) – would simply see their debt written off so they could take out another loan.

Meanwhile, Homo Sapiens with ancestral wisdom unpolluted by greed had made it as far as Australasia and America. Their empires existed in harmony with each other, side-by-side and stable for centuries until colonialisms 'divide and rule' finally made it to their shores too.

To Gold, coinage and 'Change'

Greed: Back when an eye was 5 Drachma and a tooth was 2 Drachma

Having migrated north without True Leadership, Homo Sapiens attempt to try and save Neanderthals was ultimately unsuccessful. But with colonies now established across Euroasia, authentic Human Curiosity won out, as the discoveries and changes borne from our expansion raised our potential as a species.

Different subcultures emerged amongst localised concentrations of our ancestors, before flooding from thawing surface ice made it no longer possible to maintain direct contact across our species around 7,500 years ago – the great flood of the black sea.

Change becomes Ex-Change

Without access to ancestral wisdom, we pivoted away from measuring intrinsic Potential to using crude extrinsic items. Typically these were cheap, locally available metals like Copper although some – notably our first true civilization, Ancient Egypt – opted to use precious metals, having developed gold bars of set weight by the 4th Millennium BC.

Soon thereafter, our brains began to shrink. The Babylonian period from 3rd Millenium BC to the siege of Troy marked the first real incidents of conquest and rivalry between once neighbourly Human colonies.

True Coinage began in 650BC Greece – our second Meritocratic Republic – stamped with a lion and bull opposite.

A later iteration from the Persian Empire saw a shift towards bimetallic commodity money – pure gold and silver coins.

Nothing was fundamentally wrong with Coinage or Precious Metals. Seemingly the best change ever, and entirely authentic, it conformed to the Laws of Nature:

A) Observable, repeatable, measurable and verifiable (Natural)

B) Coins and precious metals also possess intrinsic value (Potent).

The only real issue was our Authenticity. Human's aren't quite perfect, so we rely on Trial and Error for new changes. But these were a different Change than any before, bringing with them the concept of Greed. Wholly unfamiliar, it was impossible to foresee or mitigate in time.

The ensuing rapid growth quickly evolved Change into a transactional affair synonymous only with money, not creation, erasing our identity as Change Makers in the process. Jesus/We/Human is sad he died for nothing, but sends love from his universe.

The
Beginning

Change Makers are special

Reality Check: Back when an Eye was an Eye, and a tooth was a tooth

Homo Sapiens, 'Wise Humans'

Our Homo Genus is just that. A homogenous ancestry dating back some 300,000 years of non-biologically distinctive Humans such as Denisova, Neanderthalensis and Heidelbergensis. Wholly capable of interbreeding, their differences were largely superficial and arbitrary. But none were special (Locarnini et al., 2021⁴⁰).

Except one species. The last to emerge some 300,000 years ago in what is now Botswana, Africa, Homo Sapiens' inexplicable god-like gifts and spectral identity made us revered for wisdom, generosity and benevolence. We came to care for our creations by having accountability (Vaesen, K. et al, 2019⁴¹).

For 296,000 years, Homo Sapiens loved and helped each other with all things. If something was needed, we simply created it as a Change, using our limitless gift of Change Making.

Akin to a close family unit of today, there was no need for bartering. Greed simply didn't exist, so we didn't have to step over each other to survive. In a world without deception, Gifting Change or swapping Changes (at an Exchange) was the language of love and simple unbreakable promises were our contract of choice.

Being Human means something

Always phenomenally ambitious, but with all the time in the world there simply was no rush. Because we had limitless Potential. It served us perfectly, spurring us on to forever change and improve ourselves, our knowledge, our surroundings and our creations.

We even shared our Light with the animals – each the product of our own Darwinistic Changes.

Ours is a wholly authentic, benevolent society built on mutual trust, respect and the wisdom that all things are connected and thus to be cherished.

We listen to others and take responsibility. Deilightful

Fig 31. Some of the entirely Malevolent functions of Money

While money does absolutely nothing it says on the tin, quite clearly it has its uses:

It destroys lives

From gambling – betting everything at the races or on cryptocurrency – to ruining marriages to embittering families and dividing estates.

It creates huge complexity

Like paying taxes and filing financial accounts (although Potential and Accountability will now require accounting).

It fuels inequity

For example, fines for misdemeanors aren't means tested.

It attacks Human Identity using Infinite Divisibility

Thanks to money, Human Brains have been shrinking for 3,000 years. Thanks to money, Dictators have existed for 2,100 years. Thanks to money, Russia is at war with its neighbour. Thanks to money, Judaism became 3 religions (each then birthing dozens more division).

It's sent us all mad

We've somehow convinced ourselves that miserable, angry, vindictive, toxic Demons reflect the best man for the job.

It doesn't reflect value

Today, a Porsche is worth more than an angel. Even one who just discovered all other discoveries, world peace and eternal life for the entire Human Race. Still worth killing, just for bitter sorrowful revenge that they would dare do the right thing.

It obsoletes accountability

Hoarded by killers it then allows them to buy their way out of any consequence using Non-Disclosure Agreements, Deferred Prosecution Agreements and Immunity from Prosecution Agreements.

But, but, but...

Money's singular positive feature is that it allows us to evaluate the relative cost of two things. But think about this – almost every measure is relative.

Change is hard, yes. Now imagine having to drive it

Imagine...

Just so people who would've died can survive to moan at you about it

You live in London UK and are trying to decide whether you can afford a 5* holiday to Miami or a 2* holiday to Rome this year

But would you kill someone for *Distance, Time* or CO₂ – all relative and tangible constructs? Then why would you kill someone for money – an intangible, socially constructed fabrication?

What you think is Money today isn't actually Money or Change. Banks call it '**Fiat Money**' – effectively meaning 'not money and without function'. As everyone knows but no one is saying – because they're scared of being ostracised as a **Whistleblower** – Fiat Money exists only to fuel malevolence.

*Tactical error, Royal Household.
We're very proud of you, Good King Harry*

Governments and Central Banks simply summon it at will from nothing, using computers to add digits on to their currency header accounts. Supply and Demand kicks in. The inequitable race to see who can acquire as much of the new fiat money as quickly as possible begins – cutting it off at source. Prices go up and we start again.

Today there's only enough money in the world for everyone to have £15k each to survive on (TaxShark, 2022). But if you've got, say, £139bn (purely as an example, Elon) then it doesn't take much to understand you've killed 9.3million people in order to win the competition and amass your fortune.

To those who feel their amazingness – borne from all that effortless privilege you socially constructed around us – justifies earning such immense wealth then consider this. Demonstrably, we have the most Potential in the Human Race today – almost half of it, by our rough calculations. Yet you made us homeless, unemployed and unemployable. We would never do anything of the sort in return. But we will now remorselessly make you pay. You had a chance to keep your wealth. You blew it. You have no one to blame but yourselves.

What is money ...really?

Why does money exist ...really?

Sign me up!

Fiat Money does not conform to the Laws of Nature – its existence is not observable, repeatable, measurable, testable or verifiable. We simply have to take the Central Banks of the worlds word for it. This is not the creation of Purposeful Change Makers.

Moreover, it destroys all intrinsic value across all dimensions of space and time, for example:

- ▶ **Human Nature:** Sapience Inhibition, Greed, Hatred, Deception, Ego, Jealousy, Oppression, Revenge, Nepotism, Fear etc.
- ▶ **Universe:** Cosmic Inflation, Cosmic Burst (Apocalypse), Black Holes, Dark Energy, Great Attractor, Black Space
- ▶ **Quantum:** Dark Fringes, Invisible Light, Destructive Interference, Dark Energy, Malevolent AI persona
- ▶ **DEI:** Mental Illness, Antisocial Behaviour, Low IQ, Death etc.

However beautiful the strategy you should occasionally look at the results

Small incremental steps from what was originally a worthy experiment have eroded the key features and protections on Coinage that prevented the externalization of value from an item (intrinsic) to the scales used to weigh it (extrinsic).

You are essentially killing people for scales that only weigh evil.

#1 Dreadful Moths Facts

Moths don't actually have money. Any holes in old banks you find are from their Lies. But they do have a strong sense of smell. It's how they eat up any old crap, talk shit and find other liars. Unfortunately, we have a lot of liars. But fortunately, they don't live very long.

Deilightful Changes

- ▶ Restored historic records on the evolution of money & change
- ▶ Discovered Authentication, Resonance and Collection techniques to enable other Change Makers to detect, monitor and combat Darkness
- ▶ Ascribed >14 superpowers and 9 tangible enduring benefits to the attainment of Full Potential, and made it irrevocable to 3rd parties
- ▶ Discovered and explained the workings of our Human Soul
- ▶ Discovered and explained our singular Human Identity (Dei)
- ▶ Swapped 3rd world debt for legally obliged limitless financial aid
- ▶ Established a legal right to compensation for every Human on Earth from investment banks, central banks and major economies
- ▶ Replaced all extrinsic measures of intrinsic Potential with Potential
- ▶ Established CO₂ as the primary basis for evaluating luxury and stigmatized high usage in order to protect the planet and help reverse the climate apocalypse
- ▶ Cancelled the British Monarchy’s line of succession and replaced current Monarch King Charles III with King Harry and Queen Meghan

Hatred appears a lot like a pandemic
But have you ever wondered, *why?*

5 *Why* banks are the root of all evil

A sad tale of impotent moths masquerading as butterflies yet forgetting they aren't the same species

Unchallenged for decades

We used to think – by employing diverse graduates at entry level (Junior or 'Early Careers' roles) such as graduate schemes, officers, clerk's and representatives – that over time as they became more senior, their organisations would become more diverse in equal measure, but for natural attrition.

Yet that didn't happen. Instead,

- ▶ **Many drop out within a few years:** Devalued, traumatised, demotivated and offended by the contrast of the toxic malevolent culture from promised in the glossy brochures full of promises and freebies handed out at graduate careers fairs. But given demand for these jobs among fresh faced graduates, firms can easily replace them at minimal cost to mask the attrition that no one ever sees
- ▶ Those talented Humans who do make it through the initial shock find themselves **fast tracked to the Frozen Middle**. This grade just outside Senior Leadership traps them – as it did us for over half our 14 year banking career. Surrounded by their peers – all the many incredible Change Makers – they are told time and again. 'You're not quite right for the job, we're not sure what it is – just a sense'.

Why do senior leaders exist if none can make or explain any decisions whatsoever?

Immersed in near-infinite workloads, wise Humans watch as Moths without talent, integrity, experience, capability or Humanity are permitted to surpass us. Then, to add Insult to injury, we are asked to train them

on how to perform as effectively as us then turn a blind eye to all the crimes we see them committing.

Which pandemic was best?

Where is the unified global response to Hatred? The answer is that COVID annoyed Moths by emancipating Humanity. It gave us more time with family and reminded us life is a gift. As pandemics go, Moths hated COVID, but they love hatred. Humanity has always been their victim. Just look at Haiti. Aid is promised to Natural disasters then evaporates the moment the press stops. Poverty and famine, themselves caused by directionally maligned supply chains, banks disconnected vulnerable nations from world financial markets, aggressive margins and inhuman work conditions.

But the internet has substituted the need for ancestral wisdom to build potential. Young people today as aware of the worlds workings as they are more Potent than the generation oppressing them, and it shows.

In response to George Floyd's murder, the will of the People of Earth could not be clearer. We have had enough. Instead, 'senior leaders' manifested a near-ubiquitous, impotent and glaringly inauthentic 'blame the victim'/performative allyship non-response. Ubiquitously, we don't buy it.

Inhumane Resources indeed

Universally, Human Resourcing (HR) ignores clear evidence of wrongdoing in grievances to inexplicably rule 'inconclusive' or even against vividly innocent complainants.

Firms never report crimes to any Competent Authority (albeit, none exist), citing Reputational Risk, in blatant disregard of our Democratically elected laws, such as the UK Public Disclosure Act 1998 and the US Oath of Allegiance.

Predictably, the most senior executive always wins. Fairness and accountability, regardless of the evidence available or the seriousness of the laws/regulations broken, are entirely absent. If they aren't held accountable when things go wrong and lack the wisdom to put them right, then why such a high salary?

Now a fatally tainted profession, HR exists solely to protect and insulate Moths from all suspicion, challenge and accountability as they asset strip firms whilst leaving them with now a verifiably (with this report) infinite and unrecoverable liability to Humanity.

Deceive, blame then fire victims

To placate Change Makers and keep other Human employees working productively, victims are encouraged to participate in now widespread Staff Networks, People bodies and other Performative projects.

Unfunded, unsponsored and carefully curtailed by Middle Moths, these bodies work innocent victims to the extreme limits of Human endurance, whilst giving the illusion of progress and recognition without allowing them to ever come close to spotting or tackling the issue. More money is spent on billboards claiming success than on these bodies themselves.

Now exposed, and with almost no allyship from their mostly WOCHBOY colleagues, one-by-one, their exco Change Makers are ear marked for constructive dismissal by Moth's acting together as Clansmen.

The Doomed & Ignorant Industry

With clear Conflicts of Interest that almost

certainly breach the Bribery & Corruption Act, Moths overseeing D&I contracts collect ever more awards for nothing at year-round complimentary celebrity gala dinners.

Their clear goal being to cross-pollinate D&I Advisory Boards, Panel Discussions, Judging Committees and Award Sponsors to carefully control the narrative whilst censoring all recognition of all Change Makers and their initiatives capable of meaningful change.

Meanwhile, underpaid marginalised Human Beings toil labouriously back in the workhouses to enrich Moths further under the naïve illusion that promises from Illegitimate Leaders equate to unbreakable promises from near-extinct authentic True Leaders.

Statutory Pay Gap reporting

We take solace in Pay Gap reports, however these only paint a very narrow picture of what's going on and are entirely unreliable due to a combination of data masking, an absence of purposeful pattern, causal or temporal analysis, insufficient monitored characteristics and a complete absence of cross border cooperation.

They are themselves confirmed by less than scrupulous auditors and consultants like McKinsey & Co peddling lies, instead of being Authenticated by Deilightful Change Makers.

Absent of Change, and in the face of rampant and unchallenged Malevolence, Representation of every single Protected Characteristic is now in reverse across big business. In no industry is the problem more pronounced than the largest of all – the Great Attractor that is Financial Services.

A generational shift into top gear: The fuel behind Moths aggressive finish line sprint

Firstly I want to say thank you

Thank you for having the courage and conviction to take a much needed front-running stance to uncover discriminatory practices at this bank, though I hope the final reach of this ultimately impacts an audience much larger. And thank you for sharing your findings from Project Speak Up with this audience. After reading the Bloomberg article a short while ago, I'd hoped to learn what you had uncovered.

I know we have only had limited interactions since I joined our firm, but I learned early on that you speak with purpose, and operate with a passion that many others lack.

When we last spoke a few months ago, I asked you a very simple question: "How are you/how is everything going?" Your response stuck with me.

'I'm feeling a bit overwhelmed right now, as I seemingly have been appointed to solely lead the banks diversity and inclusion efforts'

I had no idea of the breadth and depth of what you had delved into. Of course, now your endeavor has been made abundantly clear.

I see you, I hear you, and I'm with you. I'm acutely aware of the privilege that comes along with being a straight, white 25 y.o. male. But it's long past time I, and others in my position, use that privilege to advance the inclusion of black and other minority colleagues.

I can only hope that others will read and take in this information in the same manner it was written –with a purpose.

This report and accompanying email gives me a level of confidence to call out discriminatory actions when I see them, and encourage others to do the same.

Please let me know if there's ever something I can do to formally help support these efforts."

July 2021: One of hundreds of Project Speak Up testimonials, but surely our favourite thanks to its authenticity. From a former WOCHBOY colleague, an investment banking associate in New York City USA and potent Promise Keeper, thus now in mortal danger

Don't worry old friend. We have never forgotten what an impact your soaring potential had on us.

We will save you. Thank you for inspiring us to become better with your authentic words of benevolent wisdom, courage, compassion and encouragement

#2 Dreadful Moth Facts

To keep moths at bay,
wash out old banks
where they hide their lies

Tackle disease, never symptoms

Extraordinary as it may sound, destroying World Financial Markets and Bankrupting all major Global Economies still won't be enough to stop Darkness redoubling and save Humanity. We need to locate and establish the source of the Malevolence to both a legal and scientific standard.

The Global Banking industry is also the worlds largest by revenues while employing around 6.5m people, making it indispensable from a political, social and economic standpoint – a stalemate. Here in the UK, the Big 5 Banks account for 85% of all UK Current Account business.

In any unsolved crime, the
prime suspect is the one
with the most empirical,
observational and
incriminating evidence
backed up by suspicious,
inauthentic behaviour

Time to play detective

The UK governments report of the Commission on Race and Ethnic Disparities (2021) was almost entirely lies. But it did admit that current data collection is not fit for purpose. The purpose presumably being to calculate the precise amount of Malevolent Dark Energy being output across firms and industries to a legally binding standard today.

That would require staff data across all Protected Characteristics and beyond – a hurdle no firm or government yet meets, nor is there currently any meaningful discussion of doing so. Ethnicity Pay Gap reports were introduced as voluntary only to minimize disruption during the wake of COVID, yet here we are 3 years later with no change.

Immediate root and branch reform of all Human Rights legislation was required long ago globally, including universal data collection, reporting and authentication obligations.

The reality of the situation is that the last material piece of progress in tackling Dark Energy came with the Human Rights Act 1998. Since then, Moths ubiquitous deception has ensured not a single step forward has been taken.

Investment Banking: Why the devil was is in the business

Most people believe hatred stems from Politics, Law & Order, Religion or the Media. They play a big part. BUT...

Today's Banking System isn't administered by some omnipotent supercomputer built on fairness, risk and rational decisions. It's boardroom after boardroom of the most dangerous beings imaginable.

Investment Banks exist solely to ensure that for Humanity, $E=0$. Scientifically they lack any concept of spectral Morality, Success, Empathy, Happiness, Value, Intuition, Purpose, Compassion, Drive, Change, Fairness, Worthiness, Perspective, Uniqueness, Authenticity, Safe Spaces, Respect, Trust, Accountability, active listening or True Leadership. Oh dear.

As the world looks in on itself, Moths are intentionally, illegally and actively purging the upper echelons of all our publicly and state owned institutions of uniqueness under the premise of greed (to attract others) yet they only care about spreading malevolence.

They decide who gets promoted and who gets fired. They decide who gets the loan and how much they have to pay. They decide who gets press coverage and what about. They decide who gets an aware and who goes to jail. They decide which company succeeds, and which industry gets shut down. They decide which country gets connected to the world financial system and which continent does not.

Anyone disagrees, **dies**

Diversity Doesn't Matter 2023

In a world that runs on money, those who control the money have the power to control the world

Their decisions impact the lives of everyone on this planet we all share

It's from here that The Conspiracy is coordinated, but with support and alignment from Downing Street. The Far Right, the Gun lobby, the GOP, Regulators, big corporates and industry bodies

In a world increasingly run on debt, the influence of these instruments grows ever more profound as firms begin to utilize them to fund their operations through market events such as economic downturns, sub-prime bubble bursts, leveraged acquisitions and mature market stagnation. Each triggered by the illegal actions of banks, who then use them to grow their control over their victims, ensuring they also bear all costs.

Universal, arbitrary and unscientific, the Voting Age, Age of Supervision (e.g. to Drive) the Age of Consent etc. all place blame on young people by presenting them as senseless while excusing monstrous older perpetrators – a ubiquitous hallmark of inauthenticity.

Time isn't real: Science proves age really ain't nothing but a number

But it takes time to turn Angel to Demon, relativistically speaking

Inexplicably, Age Pay Gap reports don't exist today. However we can infer their results (and those for other traits) by exploring Gender Pay Gap numbers.

Today, WOCHMEN (50-75) and some WOCHBOYS (35-49) dominate high paid senior roles. No other combination of differences may find prosperity by organically navigating the statistically evident Frozen Middle without succumbing to Demonic death.

Proportionately more Demonic, Boomers often lambast Millenials and Gen Z'ers for 'buying too many avocados', while picking up +10%¹ more pay on average as they cling to illegitimate power – often without leadership skill themselves. Lacking the natural advantages of being raised in the internet age, they double down their divide and rule using financial clout from their cut-price properties acquired in post-war through pre-great recession era's – global issues entirely of their own creation.

Greta and Malala are living proof age has no authentic impact on ability whatsoever. Sadly, WOCHMEN are dead proof of something else.

Thanks to social construction, and with vivid exceptions, today old age is antagonistic to wisdom and potential

Fig 38. The Frozen Middle: UK National Gender Pay Gap by Age Group (Source: Office of National Statistics, Annual Survey of Hourly Earnings 2022)

Tellingly, the Pay Gap increases markedly for all ages (except a stagnant 50-59) in the two years following Brexit and George Floyds murder, tracking the Anomaly's exponential growth that's manifesting as the growing popularity of Hatred, Anarchy, Bias, the Far Right and Destruction. Englands Union with Scotland the keeps borders open and peaceful is more strained than any other time in modern history. Today, in our worlds darkest hours since World War II, global freedom hangs in the balance.

¹Our 10% figure is the mean of top- and bottom- 3 age groups in 2022. Our UK focus on a global issue is intentional and will become apparent.

Following the money: Ranking the Industries of Hatred

Having now established meaningful correlation between Hatred and Pay Gaps, we then attempted to rank the top-10 sectors by Pay Gap.

Fig 39. UK National Gender Proportional Pay Gap by Industry, top-10 hourly men vs women (Source: UK ONS, ASHE 2022)

The ONS proportional top-10 pay gaps wasn't what we were expecting – incriminating Waste Disposal and Environmental Managers as today's most hateful professions. But together with Newspaper Editors, Electrical Mechanics and Water/Plant Operators, their pay levels are substantially less than many others within and beyond the top-10. So we re-ranked the table using the ONS' Pay Gaps data in absolute terms.

God does not play dice.

Fig 40. UK National Gender Absolute* Pay Gap by Industry, top-10 men vs women (Source: UK ONS, ASHE 2022; *mean hourly basis)

Topping the list for sectorised absolute gender pay gaps is our prime suspect. Consider also:

- 4 of the top 10 professions also occupy – or are subcontracted – key roles across Financial Services.
- As explained in Project Speak Up (p39), Investment Banking divisions have a government carve out that ensures their sector filings are gross underestimate.

Despite Britain's widely declared unrequited love for the NHS, the situation inside the NHS is quite different. The first 10 NHS employees to die from COVID-19 in the line of duty were all non-white. That's a 100% top-10 mortality rate on a demographic that only makes up 20% of NHS staff. Clearly things are far worse everywhere than anyone is admitting to.

controls for variations in pay across different
industries, making it the most accurate of all
three approaches.

The UK Office for National Statistics published
its Annual Survey of Hourly Earnings 2022 with
the blindly obvious conclusion that the data
currently being captured by Pay Gap reports
and therefore available to model by the ASHE
‘falls well short of that required to explain the
results’.

However the one truth it did spot was that,
not gender, age nor race but ‘Occupation’
drives the Pay Gap more than any other
metric (23% of total Pay Gap). Undoubtedly,
that occupation is Financial Services.

30th June 2021: On our own initiative – involving 300 hours overtime – and after interviewing 100 staff – past and present from all walks of life – Ian/We/Human authored the Project Speak Up Report to shine light on institutionalised hatred. Then we singularly led an internal change campaign on behalf of the banks 200,000 staff globally to realign its strategy from one of Hatred to its claimed aim: to be the World's Leading International and Most Profitable Bank. In return, we were constructively dismissed, then made homeless, unemployed and unemployable through systemic investment bank retaliations.

11th July 2021: Marcus Rashford, Bukayo Saka and Jadon Sancho were subjected to a vile tirade of racist abuse as they did nothing other than represent their country, England – a nation of all colours and creeds – while doing their job in the sporting game of football. The attackers were Moths within the audience of Wembley stadium, outside the stadium, in the press and especially online where they enjoy the cover of shadows from which to spout and twist their Malevolent deceit.

13th July 2021: We setup an [online petition](#) calling for a lifetime regulator-enforced ban on those same individuals from holding senior positions within Financial Services.

12th July 2021: Three courageous Titans of Change – #TheThreeHijabis – setup an [online petition](#) calling for a lifetime ban on Moths who spout Racism from all football matches in England. By the following evening, the petition had gathered more than a million signatures of support from other Human Beings.

14th July 2021: Promise Breaker Boris Johnson agreed in principle to the demands during Prime Ministers Question Time in the Houses of Parliament.

15th July 2021: #TheThreeHijabis appeared on Lorraine (UK breakfast TV Programme) to celebrate the success of their Change and the heroism of their actions.

16th July 2021: #TheThreeHijabis appeared on Women's Hour to talk about their campaign and all they had learnt, as well as the deep trauma faced by intersectional Muslims from Malevolent Darkness across the UK and the noble courage it takes to overcome it and go on spreading Light from it.

Purposeful, Unique Being: Once determined to succeed, nothing **can't** stop a Wise Human

Newton's 3rd Law of Motion: For every action, there is an equal and opposite reaction

Malevolence destroyed our family and turned us Dark for years. We learnt its workings and likely origins. With 6yrs leadership experience by 22, a 1st class Psychology major and 3x Therapy certifications, our instincts were primed as we entered the Moths nest. Our plan: Make CEO on merit, deploy our Speak Up strategy and role model successful banking. But the Great Recession happened.

Fig 45. Why Darkness could never destroy our Light. Scientifically, failure cannot destroy success.

True Leadership: Project Speak Up in a nutshell

Summary findings

- ▶ WOCHMEN are judged, rewarded and supported regardless of performance or behaviour.
- ▶ All others (incl. WOCHBOYS) encounter varying degrees of disadvantage through active (not passive) oppression that limits their Potential
- ▶ Material, directly correlated negative impacts on group strategy and financial performance were apparent
- ▶ Organisational factors – such as non-US based headquarter locations, colonial history, geographic network and/or influence of authoritarian governments in company strategy – manifest in the asymmetrical attraction of a firm towards job candidates with a propensity to discriminate.
- ▶ This leads to a material competitive disadvantage that warrants additional countermeasures beyond the market norms

We diligently protected those we had a duty of care over. We took the initiative. And even as we resigned, we promised to continue protecting them. Never a single name of the 100 victims we interviewed passed our lips. Nor the perpetrators either – a rare error we have corrected this time.

Real leaders step up and take responsibility. Not for money, ambition or ego, but because others need us to. Fake leaders who don't step down will die from Dei's light

Anyone can create change

In June 2021, we authored a 45-page report and planned and executed a highly nuanced Change Strategy to modernize the unchangeable, ensuring:

- A) No one got hurt** (except us)
- B) Benefits for everyone** (including Moths)

100 staff and ex-staff from all walks of life trusted us with their universally tragic personal stories of falling victim to numerous traumatising crimes against humanity.

It included 12 recommendations which, if enacted in full, would've restored HSBC as the worlds #1 bank – it's stated purpose – and made its leaders rich and celebrated.

But sadly few ever will

450 years old, modern Financial Services is the worlds largest sector, employing 6.5m beings. We did something never done before. Divergence without reward, outmaneuvering a firm of 220,000 whilst sacrificing our career, income, family, pension, home, bonus, friends, livelihood and employability. We resigned partly to send an urgent message:

- ▶ The first and only declared investment banking whistleblower on hatred and corporate oppression in history
- ▶ Creation of the world's largest private network of active banking whistleblowers
- ▶ The first black female board appointment in investment banking history (+30 new black scholarships at Cambridge University)
- ▶ The first three simultaneous black-held board positions in global banking history
- ▶ The first 'regulatory investigation' into institutional racism in global banking history

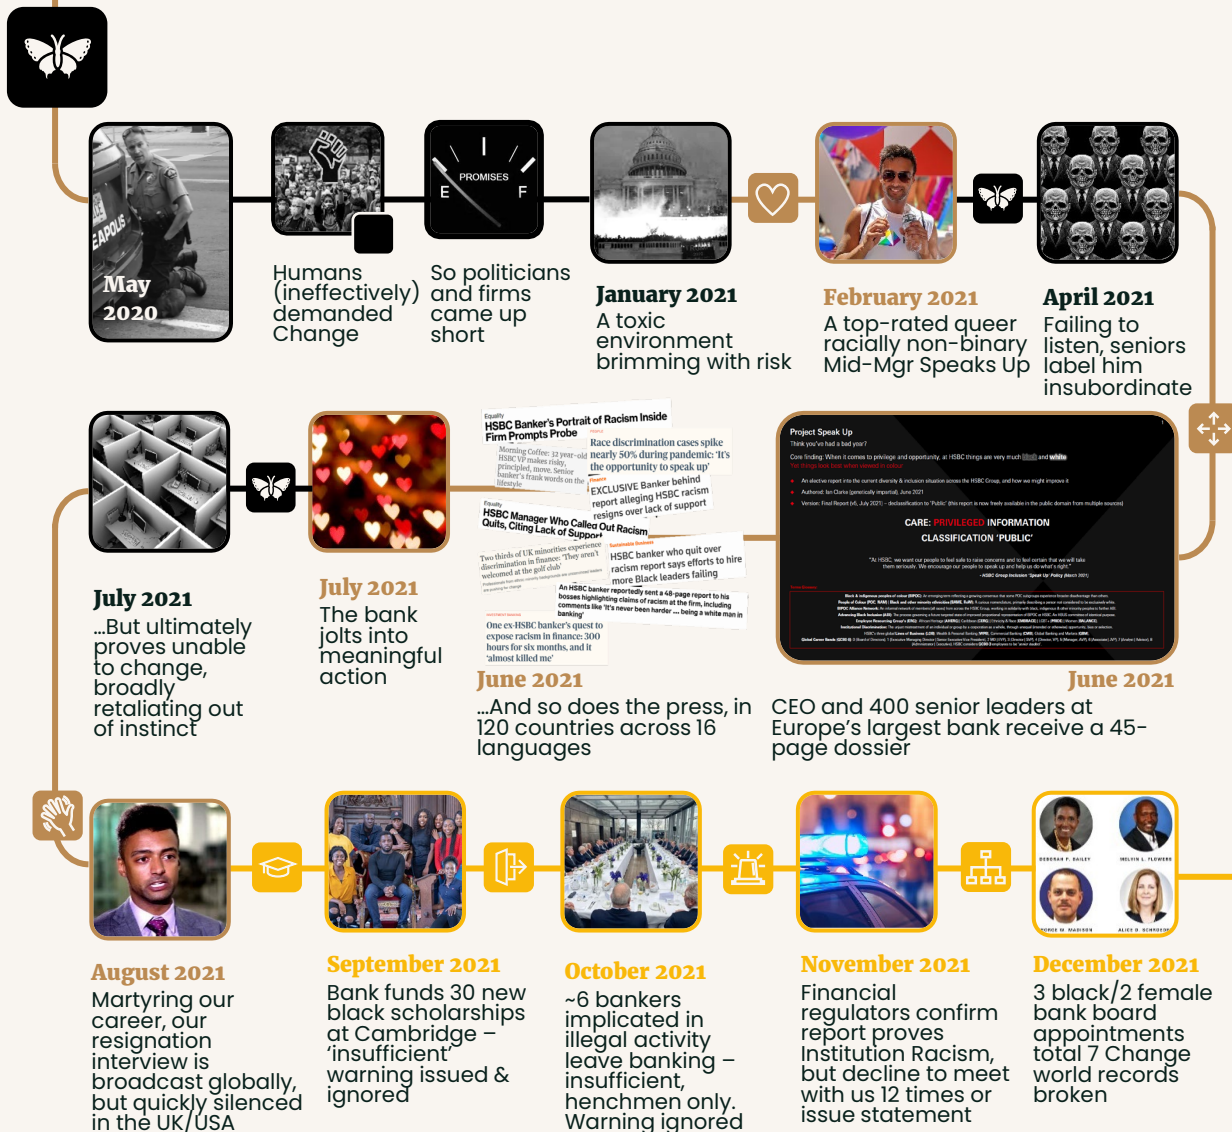

Fig 46. Now here is the timeline to Project **Speak Up**

Why bother having money...

Project Speak Up was far more significant than anyone imagined. A discrete example over a finite time of how one Human Being can change the future using their mind. Repeatable (as demonstrated by this report), testable, observable, replicable, measurable, conclusive, comprehensive and verifiable – the very definition of science.

But not just any science. It constituted the first test – a successful one – of our scientific hypothesis that we have now actualised and commercialised The Sciences of Creation and Change. If the Higgs Boson is the god particle then this is the God Science (see page 166).

When you can have it all instead?

Knowing their cover was blown, Moths made us homeless and unemployable, destroyed our flat in London and robbed us of \$500k – the ultimate cost of speaking up today when you see something wrong. We had just £40k left to create Dei's Light.

Having been a much loved, successful and dedicated proponent of better business advocating on their behalf within the bank for years, almost all of our Fortune500 contacts evaporated the moment we needed them instead.

In the end, we remember not the words of our enemies but **the silence of our friends**

When we can find the courage to Speak Up...

We become potent

Messages from WOCHMEN and WOCHBOYS

"I stand in solidarity. I share your frustrations. I recently asked for [great idea] after losing some top black talent to a Fintech earlier this year but sadly this is proving difficult to obtain. Happy to bounce ideas on how we can further turn the tide."

"By way of introduction I am [a UK D&I leader]. I've been championing the race agenda for years. I'm keen to help and find your report very interesting, with good ideas that could if implemented properly create positive change."

"Incredibly brave and beautifully written. I'm honored you included me so I was able to see all of the work you put into this. If you need anything at all, please let me know. Any support I can give is yours. Thank you for all that you do."

"I saw your recent Bloomberg article. Progress is key and I'm interested in what I can

do to help from where I am. Keep up the great work and reach out if you ever need anything."

"I really don't know what to say except I am so sorry this bigotry still is so prevalent in the world, let alone our place of work. I thought the events of last year might put things on a different course, but your interviews make it clear we still have a long way to go. I hope that you plan to stay here and try to make this a better place, however difficult that may be."

"Incredibly important work you're doing, full of admiration for you and the responsibility you've put on yourself to drive the change we all recognise is needed. Please do let me know if I can be helpful in any way."

"I have so much respect. The way you have put everything together and laid it out is quite incredible. Well done and I really hope you get a positive, progressive reply and then some action and commitment. Always here, and I'm going to reflect on what else I can do to be an ally."

We feel the love

Messages from Marginalised colleagues

"Thank you for all your hard work and determination to make this a better place to work! You are very much appreciated!"

"That was super brave – incredibly courageous. You took a gamble because you care and used some of your privilege to stand up for those who don't have a voice. That's incredible."

"You did an excellent job, professional and honest. It will ruffle feathers, we aren't meant to speak truth. You stepped out in faith and with courage to advocate for change. Whatever the outcome your efforts are appreciated."

"Like many of us in the bank and the industry, and being proud of my Latin American roots and Afro-Caribbean ethnicity, I was very glad to see someone having the courage to do something tangible to highlight our experience. Kudos again for your courage and for giving everyone you spoke to, and those who can relate a voice."

"Wow, what a report! Several things resonated with me. Let me know the responses you get! And let me know if any ideas on how, from a GLCM standpoint, I can help."

Fig 47. More Project Speak Up testimonials, Summer 2021

"If ever required I am happy to provide my own experiences as a black graduate on the [my department] programme. When I left GLCM I thought it wasn't for me but after recent events I realise that probably the problem wasn't me."

"I've moved on from [my division] but this is very encouraging to see. We've all have been through something there and we need more people like you to have the courage to drive this and speak up!"

"Thanks for taking the time to put this together and having the courage to press send on the email. I will be reviewing the deck with a few colleagues in the UK."

Messages of inspiration from former colleagues

"Respect for doing what many of us wish we did."

"I love your courage and commitment - I am inspired. I love it and applaud you, your choice to stand and fight [while] I chose to leave. I will support in any way I can."

"I totally respect and appreciate you. Thank you for what you are doing. I only wish I would have stayed there with you to fight the good fight instead of taking the door."

"I'm on a high about this, it means so much to so many of us. I hope it finally moves the needle. Our [a bank] California office lost many good people (including me) because of this mess. If you need witnesses for any legal action, I am ready."

"Bullying and intimidation were rife at [a bank], especially in [my team]. The most toxic place I've ever worked, I still suffer from the mental scars it inflicted today."

The only positive I took from it was meeting so many awesome people - people like you."

"I've spent my career working below my intrinsic grade because of my race. [And another banks] ABI network would love to work together with you - and if willing - your firm to tackle this issue across the industry."

"I'm an Executive Director at [yet another bank]. You are simply an inspiration. Thousands in the industry suffer, keep it to themselves and continue accepting all kinds of discrimination. What a brave thing to do."

The Greatest of Resignations – but what caused it?

If someone isn't sapient,
they're not authentic, as in
they aren't real

– Descartes, 1637⁶

Who are Whistleblowers exactly?

Now verifiably our only functioning system of fairness, scrutiny and accountability on the actions of our political and business leaders, Whistleblowers are our last line of defence against illegal activity. Universally defined as those 'making a disclosure in the public interest to a Competent Authority', consider they would not exist in a world with Competent Authority capable of upholding laws and regulations itself.

Among our universally positive changes:

- ▶ Safeguard the delivery of public services
- ▶ Ensure value for money
- ▶ Protect innocent victims from harm by those who see themselves as above the law
- ▶ Reassure workforces of meritocracy
- ▶ Help to maintain a safe work culture
- ▶ Drive efficiency and improvement

In short, Whistleblowers are authentic True Leaders and sapient Titans of Change who follow the law, tell the truth and do what's right. Sadly today, they are now extinct. Why?

On point 9, Change Makers deeply value our Authenticity and Potential. So we all resigned around this point for the same reason, across our universally deceptive large firms, rendering them all incapable of Changing. The Great Resignation was triggered by their trap that was D&I ▶▶

Why we spoke up... really

A loaded and multifaceted question – like people:

1. It was the only Humane, Legal thing to do
2. Everyone agreed it was necessary
3. We alone had the uniqueness to succeed
4. It was clear the Frozen Middle is a rigid, intentional barrier trapping all Humans
5. Supportive messages from Change Makers around the world broadened our Perspective to the problems ubiquity, thus we expanded our ambitions accordingly
6. Ultimately, we'd learnt all we needed to know from Banking, but could not speak openly about openly under contract
7. Project Speak Up mainly an experiment:
 - ▶ The first test of the Sciences of Change
 - ▶ A trap for the Moths who bit so predictably well. HSBC is now under our binary control
 - ▶ We were curious why everyone was afraid, who they feared and why the regulator was absent. By intentionally becoming a Whistleblower, we could map the nature of retaliation and mitigate them in order to ensure this reports success
8. We required additional Perspective, Insight, Authenticity and Whistleblower Protections to become the Moths Flame. Now, quite rightly, it is they who fear us
9. The banks vivid lack of authentic response in the wake of George Floyds murder coupled with our duty of care over thousands of colleagues (due to victim-loaded D&I duties) meant continuing further would've compromised our Authenticity and Potence.

Dear Psychologists: Please come down from your fantasy world of glass towers, we could use a hand in the real world

Over 14 years of field experimentation and meticulous study, we rigorously collected data and observations as to the workings of Malevolence from within the Moths nest – repeatable, testable, observable, conclusive, comprehensive and independently verifiable by anyone with a curious mind. Like every page of this report.

Whatever conflicted science journals who profiteer from censoring authentic science whilst failing to authenticate anything they print say, you are looking at authentic new primary scientific research. No ifs, no buts.

Perfecting Change: Trial & Error

Science confirms animals primarily learn and grow through Trial and Error (Thorndike, 1898⁴²). Yet today, it is divided by the processes increasing ineffectiveness in Human studies more than any other, where most now report 'reward not repetition' as more effective.

The answer is that Demon's have no Purpose (not motivation) therefore couldn't care less about learning anything. They simply want money and destruction.

The process is perfect. The sample is far from it. Include only Human Beings, and you'll find, but for irrelevancies like pronouns and tax returns, we never make the same mistake twice.

Escalating retaliations & rumours begin leaking from HR

Fig 49: Devoid of all talent and authenticity, Moths are going nowhere fast: They spend life hiding their weaknesses, bribing yes-men who evaporate at the first sign of trouble, whilst pretending to themselves that their failures are in fact successes. They lack 93% of our Perceptual capacity. And thanks to their senseless ego, they foolishly assumed we were the same. For years, we listened to them deceive us and everyone.

Fig 50: Human Beings are drivers to an important destination: We spend our lives honing our strengths, whilst being authentic about our blind spots and mistakes, so that our many friends and allies know when to step in and help us enhance our many **Deilightfully unstoppable** Changes.

Leaders vetoed all meaningful proposals. Stacked Exco with Demons fueling dissent. Seeing deception, we stepped down vocally w/in 3 months in protest.

2 meetings in 5 months: branded t-shirts & meaningless words only. We vocally challenged complicity; all fell silent, before Chair – most senior Black leader in HSBC USA with high Potential – agreed. Later resigning quietly like every other Change Maker (all doomed), we assumed his responsibility.

Assigned HR Business Partner. Only partially Dehumanised, we were able to establish an 'engaging resonance' to extract extensive information subconsciously (an excellent research subject). Petrified, cornered & doomed, her instructions were 'disclose nothing, ascertain intentions, report back'.

A respected Change Maker with Potential. Due to fear for family, he aligned against us, reporting back to Leadership, still feigning allyship. Leadership had him increase our client book to 80 clients (global ave: 20) to overwhelm us and force our resignation – impossible, now working 20hrs a day. Ultimately compromising himself legally and morally, lying in an official legal statement that 'D&I distractions weakened our near perfection' – doomed.

Brief interview was held with partially Dehumanised representative from 'confidential outsourced service'. Used Resonance to inauthenticate blind spots. 'No confidence, commercial process only'.

Used resonance to authenticate reactions. None were concerned or surprised about Malevolence. All were concerned solely for their jobs/income. All feigned support but tellingly none – except the one female, Diane Sleeper – even asked 'what do we do next?'. After approaching CEO Michael Promise Breaker Moth, both severed contact with us. Diane was later forced to retire, Michael remains. Had she helped us, we would have protected her.

Aggressive leaks and retaliations begin. We used resonance to authenticate source of leaks via real time interactions to ensure 100% accuracy:

- ▶ Mabel Moth, Head of Americas HR: Fully Dehumanised Demon, an excellent research subject: 100% incoherent, mindless, selfish, naïve, egotistical, talentless, empty and deeply complacent. Endlessly, limply, pathetically broke laws in every interaction. Disappearing thereafter.
- ▶ Caroleanne Minashi Moth, Glb Head of D&I: Mostly Dehumanised Promise Breaker, also excellent research subject: Moderately conscious – cunning even – but deeply malevolent, 100% transparent deception, highly egotistical, argued every cost-free point in our report, no regard for the banks future, her sole goal: prevent change & stop us. Impossible. More entertaining than Moths given her fear, but still pathetically feeble.

We name Promise Breaker in Chief (Jared Smith Moth) to Group Legal as irresponsible for purging our team of all Uniqueness, corroborated by 7 returning ex-staff (our arrangement) through documented testimony. All ignored, he remains to this day in position as Global Head of Sales and US D&I Champion (to flush out more Humans). Instructed our mandatory transfer (illegal) to San Francisco to remain under his control. Bonus contested, pay review cancelled, poor rating guided – Illegal, Constructive Dismissal.

We requested Caroleanne and Group Chief Risk Officer redeploy us given clear lawlessness – denied without hesitation ('not a good use of time'). Caroleanne, time is a Social Construct. You are an Antisocial Construct.

Reported Mabel's lawbreaking to Chief Ethics Officer, Group Legal, HR (her own deputy) and the Regulator. All ignored, she remains in position today.

We confirmed our decision to resign and even coordinated dates to align with Reuters interview. Moths had no comprehension of authenticity, and doubted us to the very end, then grew angry when realising we don't lie – unlike them.

Reuters resignation interview, August 2021

Though it may at times appear eccentric, everything *Change Makers* do is deeply purposeful. Constantly, we test the world around us and those within it, in order to A) assess their *Character* and *Realness*, B) Ascertain ‘cause and effect’ for Changes we are considering, and C) Hone our abilities and perspectives to gain *Potential*.

The biggest individually-driven change in Investment Banking history

Like all good Changes, Project *Speak Up* was a piece in our Change jigsaw that will continue gaining momentum and potential until our Higher Purpose is complete – protect *Humanity*. We drafted this Change Plan 5 months before delivering our report. As it turns out, their small binary minds could not be any more predictable.

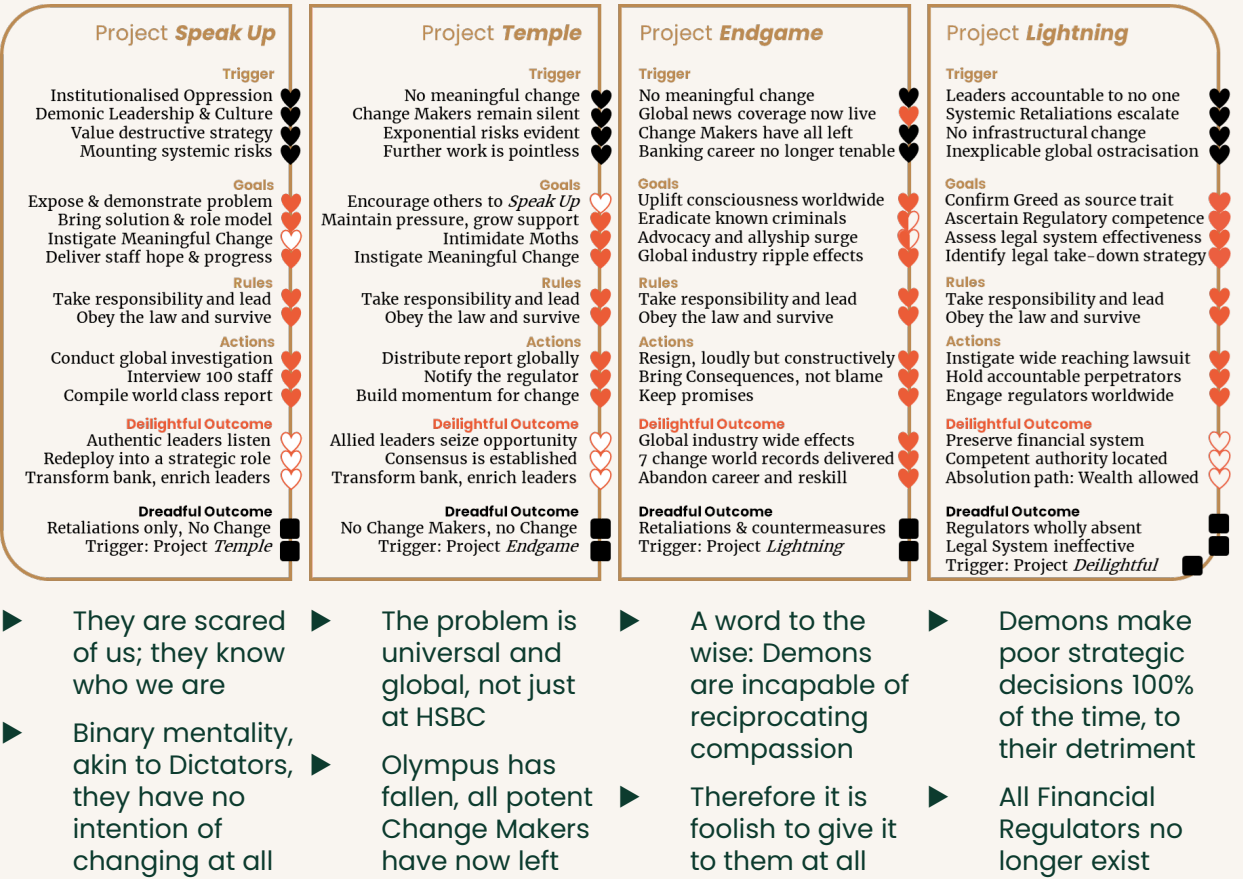

Fig. 52. Unique on Earth insights & perspectives gained from Project *Speak Up* (2021)

Human Purpose, the reason we each exist, is to create and drive positive change.

Your body clock wants you to *Create Change*. *Peer Pressure (Socially Constructed)* dresses it up as an instinct to procreate.

Instincts: Spontaneous and hard to resist. **Having a child**: A directed (mostly) *Choice* and *Labourious* process. Duh!

Potential, Value and Purpose

Why do you exist?

As spectral beings, Humans are never good or bad, better or worse. We all know that, deep down. Being Real (or Realness) means proving ourselves worthy by resisting temptation (in the form of Darkness) to instead align our chosen Personal Identity with that of our intrinsic and innate Human Nature.

Worthiness fuels our Authenticity by boosting our engagingness and resonance whilst protecting us from Darkness and allowing our Light to reveal more of its shadows.

You see, only some ever find:

1. The Acceptance to fully explore, not destroy, Human **Uniqueness**
2. The Intuition to spot an **Authentic** Discovery when they see one
3. The **Curiosity** to explore Perspectives of Others, to then fully form their own
4. A Safe Space to work **Purposefully**, Self-Actualise and find success

Only worthy stars shine brightly

Deilight's core values intentionally mirror these 4 drivers of all Human Value. Together, they determine the Potency of Meaningful Change we can each create. Collectively they redouble our Potential to unlock our Sapient **Wisdom and True Leadership**.

Today, due to the Anomaly, Humanity is a Shadow of its former glory – severely curtailed by Self-Repression and Dehumanising Oppression from Demons.

We can fix it up very easily, but only if Humanity wants to succeed together.

Unable to even Listen, our fallen firms begin laying off thousands of the biggest untapped resource imaginable

BARCLAYS

Corporate Identity

Barclays veneered Purpose and Values project an image of self-righteous corporate sanctimony. At 203 words, its unambitious and poorly defined mission gets easily lost amongst the shrapnel of its identity crisis. Tellingly, the word "change" appears nowhere.

Aiming high! **"Acting with empathy and integrity, we aim to be a leader in the profession of banking and to engender trust amongst our key stakeholders.** We understand the power of building a supportive and inclusive culture for everybody, knowing that we make a bigger difference when we pull together as one team. Our five Values – Respect, Integrity, Service, Excellence and Stewardship – are our moral compass; the fundamentals of who we are and what we believe is right."

Corporate Persona:

Just one click away and we see the consequences in the biographies of the banks executive leaders. Superficially, a decent mix of ethnic and gender diversity is on show here, as is a deep sense of inadequacy and demonic illegitimacy. If only Nigel Higgins' 'keen focus on culture' extended to sharing some of those gratuitous yet wholly vacuous adjectives with women. No wonder poor Ms. Cross spends so much time away from the office, handling demonic egos like these. Very little substance extractible, except that these men exist solely to destroy Barclays.

We gave each bank at least ten opportunities to engage us

Across August 2021

9th September 2021

11th March 2021

We applied for a number of vacant roles across Barclays Banking Group, including one at Analyst level. All were rejected within days without explanation or interview – confirming the illegal practice of Whistleblower blacklisting.

We struck up a conversation with **Hannah Awonuga, Barclays Global Head of D&I**, but she failed to respond.

After Hannah announced a review of Barclays ERG's online, we created a 28 page guide for D&I Leaders called 'Better Employee Networks' and sent Hannah a free copy. This time, on 11th March 2022, she replied positively and supportively with a 'thank you'.

We invited Hannah to help launch our D&I consultancy by accepting a free offer of a workshop for senior leaders explaining how to manage Whistleblower incidents without breaking the law or damaging their firm's reputation (i.e. by encouraging them to listen instead of retaliating). Hannah ignored all these messages

We sent Hannah a letter by recorded delivery at Barclays Headquarters, explaining that she had, through her actions, demonstrated textbook Whistleblower Blacklisting and Ostracism – both prohibited under the Public Disclosure Act 1998 and FCA Whistleblower Handbook, and repeating our offer of a complimentary training workshop instead of escalation. She never responded.

We spoke warmly with Hannah at the Rising Stars Awards and joined a colleague of hers on stage to collect our Editors Choice award.

We challenged Hannah on her/Barclays recurrent lawbreaking via LinkedIn messenger. She replied 'this is very aggressive' then blocked us.

Winners are ordinary beings with extraordinary determination

Losers are extraordinary beings who give it all up for nothing

Out of the ashes of COVID, Project Speak Up and other change initiatives such as [the Rose Review](#) and the [FCA’s forever delayed DP21/2](#), the UK Big-5 unanimously began a new Change Cycle in the 2021/22 period, incorporating newly live initiatives and targets all set to converge on a 2025/26 maturity¹.

With their stated remedial measures implemented in the 2021/22 period, we projected forward their statutory reported Pay Gap and Gender Balance numbers in this latest period to provide with relative confidence their likely performance against plan through to the end of this new 4-year Change Cycle.

Our species existence starts and hangs in the balance of our arbitrary (gendered) differences

Dear CIPD, with your box-ticking, label spinning deceit. You couldn't develop a photo, let alone a true professional. We'll take it from here, thanks

Human Spectroscopy

Central to the Science of Change is the fact all Humans are equal. Merit (*M*, Benevolent Authenticity) and Curiosity (*C*, Conscious Uniqueness) is all that divides us. To suggest otherwise is deceptive, rigidly binary *Malevolence*.

Using $E=MC^2$, they output our individual Potential Energy – our Potency to create, change and succeed – the only meaningful measure of any Human lifecycles, value and success.

No binary label Moths can process will match the infinite spectral complexity of any Human, Firm or Collective identity. Over the res of this section, we're going to show what real performance demographic analysis looks like.

What do we want?

Lies, Hatred and Imminent Obliteration from at least 4 apocalypses!

Global Meritocratic Republic and World Peace!

When do we want it?

Later, in words! Now, through deeds!

Any successful collective, from coupling to a species, must have mutual spectral Trust and Respect, free from binary absolusions and where everyone has a meaningful voice. Every perspective is correct from the viewpoint of the perceiver. No one is free of blame in a failed relationship unless we have done all we can to equitably include and represent status, rights, wealth, opportunity, belonging and decisions, accountably and absent of arbitrary hurdles.

The single model permissible is an authentic Meritocratic Republic with spectral (non-binary) choice and full transparency in elected representatives who change regularly and meaningfully. Think 'Democracy', but authentic.

And to Authenticate a firm somewhere between Dreadful or Deilightful, nothing says 'Meritocratic Republic' quite like the Proportionate Representation of Women in employment across all levels.

Women make up 51% of the UK and global population. Remember why?

WOCHBOYS don't cry. They die

Abandoning children, breaking promises, cheating on wedding vows, plus witnessing and often perpetrating Serious Organized Crime and Crimes against Humanity is day-to-day life for Investment Bankers. So they learn to excuse their incomprehensible behaviour by pretending it isn't real. But in fact, it is they who aren't being real.

Low pay, status and significance (to a bank anyway) masks the many authentic Human's who regularly drop out at an Early Careers stage of Investment Banking. Today's high churn of Analysts and Associates is the product of an inhumanely toxic working environment that only the brightest Human Beings or Darkest WOCHBOYS can withstand.

No two firms are the same either

This summary of the Big-5's gender balance across Senior Management reveals huge differences in oppression their women can expect to encounter.

Human is Human. And Demon is Demon. There's no two ways to look at it

Meritocratic Republic

Only fully authentic Being's and Firms can look directly into the Light, to assess and authenticate the level of Human Nature and Uniqueness present in a Change (or bank).

So instead, less potent Change Makers introduced Gender Balance as a proxy - the proportion of women to men in any specific role, grade, unit, location or organisation.

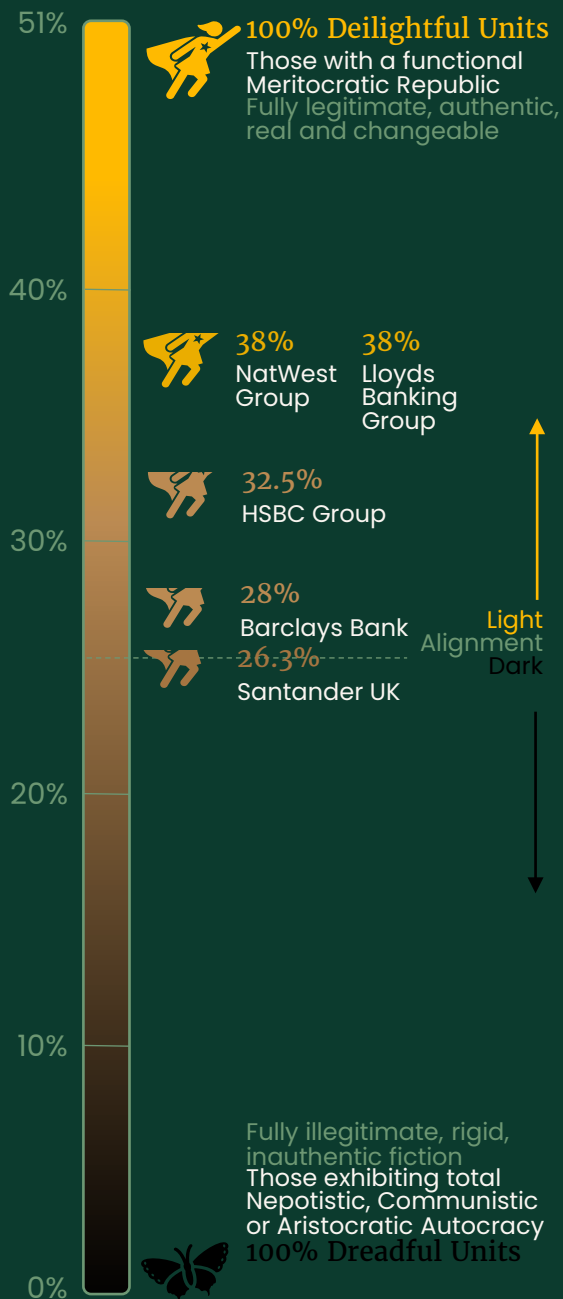

Published annually in the UK by all large firms, we've obtained all data for this section from their Statutory Pay Gap and/or audited Annual/ESG Reports.

And we look almost exclusively at the Gender Balance within Senior Management roles only. Understand Demons have enslaved Humanity, so only fully Dehumanised Beings are permitted into senior leadership roles.

Thus it's by far a better indicator for the overall levels of Oppression and the strength of the illegal, Dehumanising glass ceilings Change Makers have to navigate on their hazardous career path up, to regain control of our destiny.

Why bother with the risk? We'll just change it for you

Fig. 54. Authenticity of the UK's Big 5 Banks, as ranked by the proportion of their Senior Leadership Roles occupied by Women (2021/22 accounting period).

As CEO of NatWest Group, Alison Rose made history by breaking the glass ceiling

Alison Rose joined NatWest Group in 1992 as a young fresh faced graduate trainee. Then across 29 years of frontline banking experience, her talent and potential was nurtured for her to become not only the first female CEO of a big-5 UK Bank in history but also the first C-Suite banking executive ever to have successfully transcended the glass ceiling from lowest to highest echelons of corporate authority.

By her side is an equally as impressive Group CFO Katie Murray, whose been with the firm a solid 7-years to cap a stellar 23-year Chartered Accounting career perfecting her craft across the likes of Old Mutual and KMPG.

Alongside leading academic and multi-skilled professional Howard Davies, this completes a banking C-Suite dream team that, uniquely, is 66% female.

In the year following her appointment, Rose led her institution to triple its profits even as COVID lockdowns and its associated economic pressures were biting into the economy. NatWest Group's shareprice today is 3.24% higher than it was prior to her appointment and the only UK Big 5 bank stock to have risen over the same period⁶.

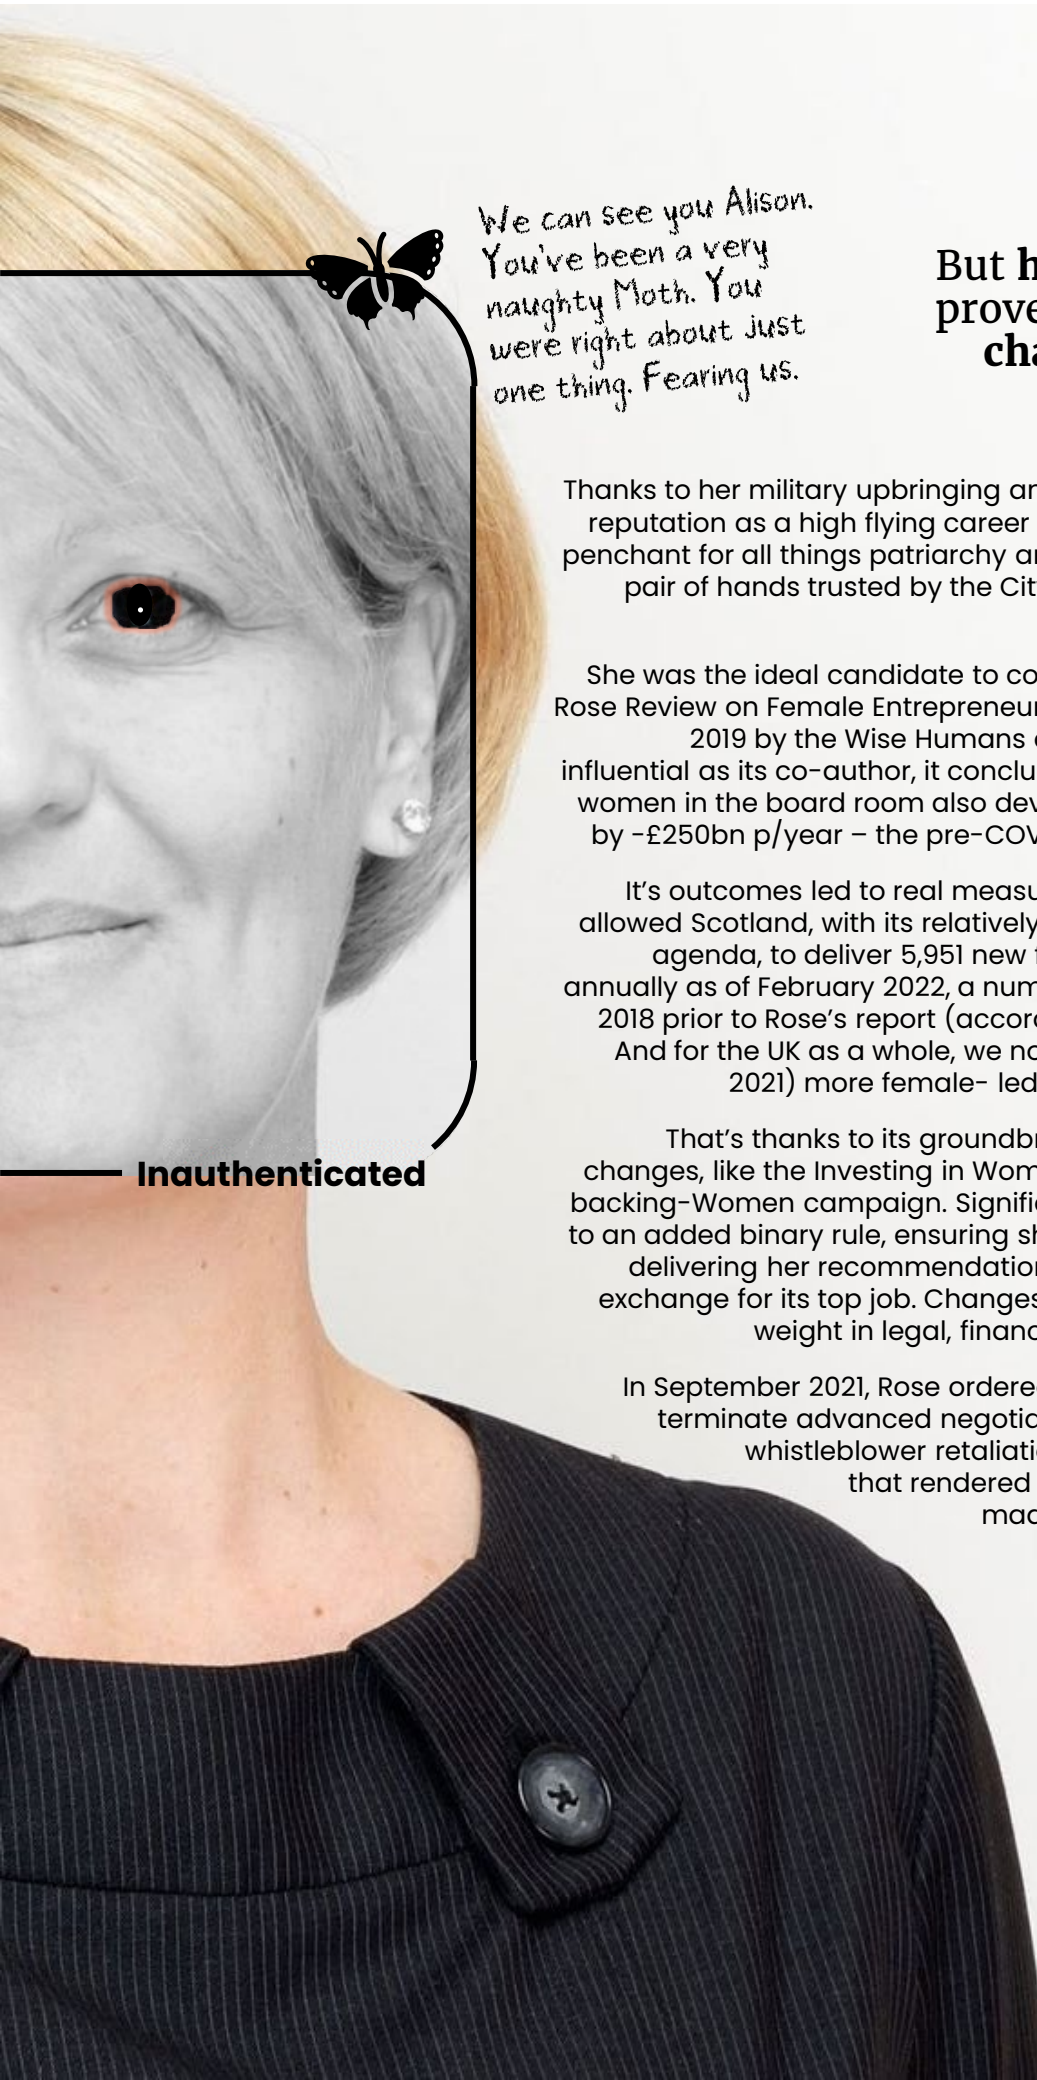

These women didn't achieve such positions and success because they are women. They achieved these positions despite being women, thanks to others seeing their potential and clearing a path through sponsorship and support for history to be made. Whilst the bank is far from perfect, particularly on intersectional diversity, there is no doubting that today, NatWest is a role model and bastion for gender inclusion, visibly promoting

the value of women in big business.

We can see you Alison.
You've been a very
naughty Moth. You
were right about just
one thing. Fearing us.

**But her true colours
prove she will never
change the future**

Thanks to her military upbringing and History major, Rose's reputation as a high flying career banker stems from her penchant for all things patriarchy and autocracy. A steady pair of hands trusted by the City despite her apparent womanhood.

She was the ideal candidate to co-lead the Independent Rose Review on Female Entrepreneurship, commissioned in 2019 by the Wise Humans at HM Treasury. Now as influential as its co-author, it concluded our devaluation of women in the board room also devalues the UK economy by -£250bn p/year – the pre-COVID UK structural deficit.

It's outcomes led to real measurable change that has allowed Scotland, with its relatively more progressive ESG agenda, to deliver 5,951 new female-led companies annually as of February 2022, a number that's up +100% on 2018 prior to Rose's report (according to The Scotsman). And for the UK as a whole, we now add +37% (+145,200, 2021) more female- led businesses each year.

That's thanks to its groundbreaking recommended changes, like the Investing in Women Code and Women-backing-Women campaign. Significantly, these bind Rose to an added binary rule, ensuring she must make good on delivering her recommendations at NatWest Group in exchange for its top job. Changes more than worth their weight in legal, financial and moral success.

In September 2021, Rose ordered her sourcing team to terminate advanced negotiations with us. An illegal whistleblower retaliation and binary decision that rendered us financially unviable, made this report inevitable and revealed her true Colours to us.

We hear dead people! Change Makers draw information across any dimension from the Quantum

What is Sapient Recollection?

Look back at a photograph or painting of your younger self and you'll feel something. In a nostalgic instant, you can almost relive the experience.

Providing we occupy a Safe Space, highly authentic Human Being's can do this with any image (depicting anyone, anything, anytime, anywhere), plus other types of objects to varying effect (linked to their creators authenticity).

For example:

Art Curators use Sapient Recollection to gather intrinsic information from their collections original artists. This helps them vividly describe with accuracy the circumstances surrounding the Characters and Scenes presented, despite an absence of retained records cataloguing them.

Many things aid Sapient Recollection, including our perceived levels of comfort, belonging and appreciation (Productivity), interacting with other Change Makers (Brain Storming), accessing our imagination to speculate or ideate (Day Dreaming) or simply a quiet moment to think, learn or consider risks (Concentration, or a 'Fag Break', to ancient Egyptians).

Unlike photos, people can change

As snapshots in time, photos allow us a brief glimpse into the past, but they can't convey intrinsic information about any changes since they were taken.

Similarly, static annual Pay Gaps today tell us almost nothing actionable about 'why' individual institutions perform the way they do. Quite clearly, they have been devised by Moths with no appreciation for the nature or huge value Humans draw from Recollection.

On our long journey ahead towards valuing Humanity once more, it's not where you're at, but where you've come from, where you're headed and the route you're taking that's important.

Mapping the Pace of Change

An authentic Pay Gap Reporting standard would incorporate detailed metrics on the Pace and Rationale of Change over time.

Our pioneering analysis from 2016 to 2025 covers 9 years (2016/17-2025/26), 5 statutory-filed gender balance and pay gap data points per institution, 2 change cycles (2016/17-2021; 2022-2026) and performance of both versus declared targets set against the backdrop of individual start positions in 2016/17 of each of the UK's Big-5 Banks.

Moths couldn't concentrate on a lightbulb

The best way to predict your future is to create it

Pace of Change analysis

Currently, just two – Lloyds Banking Group and Santander UK – have committed to delivering a workforce incorporating Proportionate Representation of Women by 2025/26. However, at current rates of change, both banks are likely to break their promises a second time, significantly undercutting (Projected vs. Target: LLOY – 8.7%; SANB –11.5%) their own elective targets for second time (2021/22 Actual vs. Target: LLOY –2.0%; SANB –18.0%).

Boldly, Santander UK keeps going for gold – with 50% recurring ‘achieved by’ targets for 2021 and 2025 – yet coming up short each time – perpetual over promising and gross under delivery when we could help them do it in a year.

Deferring gender parity targets out to 2030, a less ambitious NatWest Group has already lost frontrunner position to Lloyds Banking Group. With Rose having checked her box and clocked out, her once flagship initiatives are already being scaled back with gender balance across her top-3 management grades now in reverse (–1%, 2021).

And with entirely disingenuous Barclays 100% verifiably performative measures missing all targets since 2016, our Big-5 sadly clocks 4 inauthentic Big-Promise breakers. To them, not even Safe Spaces are tolerable. Never asked why?

With more than its fair share of strategic and reputational missteps of late, confidence and morale within HSBC bank remains low as authentic women still cannot rise above GCB2. Yet it’s the only bank to comfortably (21/22 Actual: +2.5%) exceed its last gender balance target and appears well on track to deliver its new target (25/26 Projected: +2.1%).

Credit where credit is due: HSBC is changing, quickly. Rare outperformance, a now sector leading trajectory and pseudo Promise-Keeping mentality that appeared to surprise even itself. They even dropped the BAME acronym.

That’s because, thanks to our network and binary critique of the bank, despite our resignation, we remain the Change Maker in Chief protecting HSBC’s people. Titans never lie or break a promise.

In case you want to check our workings:

	CAGR(Act)	CAGR(Auth)
HSBC Grp	3.67%	7.17%
Lloyds BG	2.16%	4.38%
Santander	1.56%	6.24%
Natwest Grp	0.53%	3.40%
Barclays	–0.43%	6.40%

Once we become Determined to succeed, and with sufficient potential, nothing can stop us

Fig. 56. Proportionate Determination to Change across the UK Big-5 Banks (2016-2025).

Authentic Pace of Change CAGR: We repeated the CAGR calculation, but taking 50% (equity) as the EV number in order to determine the necessary pace of change for each specific institution in order to deliver a full correction to a Functioning Meritocracy within the 2025/26 change cycle.

Determination to Change

For this spectrum, we use a common Financial Services industry standard methodology known as the *Compound Annual Growth Rate* (CAGR).
First, we calculate the Actual Pace of Change at each firm between their Beginning Value (BV) and projected End Value (EV) over the targeted period (n).

$$CAGR = ((EV / BV)^{1/n} - 1) \times 100$$

We repeat the calculation but with EV modified to reflect what is authentically achievable given the level of complexity (Potential) required. In this case, 50% representation seems easily achievable by 2025/26, since abiding by the law and being authentic requires no Potential.

$$CAGR[Act] / CAGR[Auth] = DTRM[\Delta]$$

Dividing Actual Pace of Change with Authentic Pace of Change yields an accurate, fair and directly comparable Determination to Change figure, as it factors in their differing start points.

Actual Pace of Change CAGR: We took each firms reported Gender Balance for the 2016/17 period as the Beginning Value (BV), then projected out their 2021/22 figure as recurring (given all banks began their new change cycle this year) to arrive at a projected Ending Value (EV) for 2025/26. giving us relative confidence in the likely consistency of our EV figure for projecting likely forward performance.

Great leaders don't set out to be a leader. They set out to make a difference

True Leaders endure sacrifice

Project Speak Up was an act of sacrifice – something only True Leaders would ever entertain. Implementing its cost-free 12-point D&I strategy would've restored HSBC as the world's leading international bank, yielding it billions in additional revenue and profits whilst detoxifying the industry by role modelling a more profitable, more Humane banking model. As it turns out, those we helped succeed most were the very leaders that turned on us for it.

Thanks to their illegal, relentless, idiotic Whistleblower Retaliations and universal ostracism absent all consequence from 'higher authorities' – in a society that curiously deems it acceptable to tolerate such behaviour – we lived on between £7-30 a day. And yet our life was simple and happy in the knowledge we were successful in bringing meaningful positive Change.

The last thing we wanted was another year of wake-work-sleep 20hrs a day only to become World Leader. Having lost our career, salary and employability to spend everything we had left helping others thrive once before, we were content and expectant of respite. Ours is no life at all, but we give it yet again so others may have a life to live. Simply begin to listen to each other and you won't need to read any more dossiers.

To bring about Fairness & Change

The stories of suffering from innocent victims continued to deluge us long after resignation. What point is there in having the world's largest private network of active banking Whistleblowers if neither the banks leaders nor those of the Regulator or Government agree to even speak with you, let alone listen to you?

Meanwhile we were deluged with reports from our closest friends left behind that things were improving as they naively swanned off on their bonus-funded holidays – a little less Human each time.

Like all biases, *Confirmation Bias* is a sad and vivid signal of a Characters slide into unconscious *Sapience Inhibition*.

To be clear, we have no fear of death – merely another inevitable step on our exciting journeys through the Multiverse. And thanks to its configuration, our Potential travels with us meaning the next life that awaits you is directly linked to your actions in this life. We fear only for those who are fearful.

No Change will ever be final. It's having the courage to continue that makes it all worth while

Fig. 57. Momentum of Change in Senior Gender Balance, UK Big-5 Banks (2021/22).

Momentum of Change

Through Trial and Error, practice makes us near-perfect, by building out our Determination, Resilience, Endurance, Commitment and Confidence. Thus over time, we tend to become more effective.

Momentum of Change tells us whether a firm is A) purposefully improving towards their goal or B) knowingly abandoning their goal in favour of another.

We take the Last Value (LV), then divide it by the Actual Pace of Change CAGR for the previous cycle.

$$LV / CAGR[Act] = Mmt(\Delta)$$

For years, Demons have invented excuses for keeping Humans outside of leadership everywhere. Unlike them, we stay grounded in reality by always authenticating causality to discount any extrinsic factors before drawing conclusions. This counts double for Momentum. The best approach is to be curious and politely request explanation.

Thanks to their privilege and fear, rarely are senior bankers quizzed on why Gender Representation initiatives take as long as they do. And any answer they give is as vague as it is meaningless. Presumably, with hatred in such high demand, all the worst Demons must get snapped up fast by Executive Recruiters.

I will run and I will
love until there is no
one left to live for

Human Forgiveness

But Human Benevolence and Worthiness reminds us always that it is never their fault, nor anyone's fault for the sickness that infects us all.

We forgive each other always, because if the tables were turned, we just may have done the exact same thing ourselves. Perspectives are never incorrect from the point of view of the perceiver.

Humanity today is incapable of helping itself. Helping the helpless is our duty.

But this time, we do hope you use this gift to become less helpless, so we need help less and this relationship returns to one of mutual, equitable benefit – as every healthy relationship should be.

Disclaimer: Whilst forgiveness will always be forthcoming, if we need to do this a third time, we reserve the right to invoke it alongside biblical levels of scorn.

Human Resilience

If every Change Maker sets up their own D&I consultancy then Humanity has lots of little pathetic voices. But if we work together towards our common goal then we can restore Humanity to limitless brilliance.

Thus we sought to lend our unique perspectives and capabilities to an existing D&I Consultancy. Only Involve People were prepared to even extend us an interview, and the role offered was neither one fit for True Leadership or capable of effecting Change.

Deemed worthless by all of Humanity it seems, we decided little pathetic voice is better than none at all.

Armed with A) a scientific understanding of Hatred, and B) knowledge the Financial Regulators, Legal System and World Governments were broadly compromised and lacking Change Makers, we used our £40k savings left to create a near-perfect D&I Consultancy.

Our goal: Play by their rules, change the world and its leaders gradually (using reason), allow Free Market Economics and retained wealth to stay, just with accountability this time. But the Absolution Path failed as they retaliated against our offer. Yet again, they underestimated us – why? Dark Moths can never destroy a Sapient Flame.

Attack of the Clones! Dark Fringes matched to our dimension of change

Malevolent Gender Dysphoria

In Humans, Gender Dysphoria is a Benevolent Trait – a sense our Extrinsic Gender Identity (arbitrary) betrays our Intrinsic Gender Identity (real) – that naturally creates Change Titans like Transgendered or Non-Binary Beings and Drag Queens. Disclosing it is the epitome of authenticity as, sadly today, it is fundamentally unsafe to do so and comes with negative reward. The only reason they do is because they know without Nurturing, Emancipation and Realness, they can't Change or Succeed.

In firms though, it manifests as the antithesis – a Malevolence Engine. Frequently fronted to the press, clients and investors – and aside from HSBC, their photos on display to the world – Boards are nowadays broadly gender representative, often sporting such binary precision – 50:50 – in order to portray Meritocracy as Tokenism.

But beneath board level, across the rest of Senior Leadership, the Dysphoria reveals itself. Once behind closed doors, you encounter huge reductions in Gender Balance to give way to endless corridors of the worlds secret decision bodies stacked with mindless WOCHMEN.

Malevolence Engines explained

The presence of a Dark Fringe confirms two unequivocal facts:

- A) a firm is being intentionally and directionally deceptive;
- B) the purpose of the deception is solely to spread Malevolence, not make money.

Extraordinarily, the Anomaly has learnt to spawn new Unchanges at will, without Change Makers. These replicate and redouble the already crippling nature of Fiat Money. Destructive Interference is a

Fig. 58. The Dark Fringe of Malevolent Gender Dysphoria, UK Big-5 Banks (2021/22)

directional response by Darkness to our Light's attempts to save itself by shining upon their shadows. Akin to cloning, this ability to redouble by deploying Dark Fringes as countermeasures makes it highly adaptable, rapidly contagious, hard to detect and near-indestructible.

The first incidence of any new anomaly is observed first in Investment Banking, thus confirming the shrouded identity of our Universe's ominous Great Attractor.

A firms Malevolent Gender Dysphoria can be calculated by dividing their Gender Balance in Senior Leadership with that of Board Level, then subtract 1.

$$Mal[GenDys] = (GenSnr/GenBrd) - 1$$

Words mean so little when our actions paint such a clear picture to the world

After Speak Up: Project Deilicious

Fronted by 2 highly regarded Change Titans embodying every single Protected Characteristic between us, membership of 6 marginalized collectives, 11 change world records plus a uniquely authentic training course catalogue which collectively enables self-actualisation, Project Deilicious could not have yielded a more compelling proposition.

So many kind Humans gave us their blessings. "It's so refreshing to see a D&I consultancy that walks the walk! We've never seen one like you before", they would so often and kindly encourage us.

From startup in November 2021 to October 2022, we went from nothing to a D&I power brand:

- ▶ We collected 12 awards for excellence
- ▶ We formed a 15-strong collective of closely aligned and deeply Human organisations all working at the forefront of driving Change.
- ▶ We held face-to-face discussions with 33 FTSE100's sourcing teams.
- ▶ We piloted a highly engaging podcast and panel format exclusively showcasing proven Change Maker talent for the world to learn from

Our uniqueness, brand positioning and supremacy was undeniably palpable in a D&I industry now devoid of Humanity.

Actualising the world's first authentic D&I Consultancy

As the first to define and then solve The Clarke Paradox, we were entirely comfortable defending the unique positioning of our marketing strategy to any challenger. But curiously, not a single person or firm ever asked us.

"You are simply purpose personified"

– Emma Gardner, Senior Leader of Pointlessness Personified, **Supply Chain Services, NatWest Group**

"We'd like to appoint you as our Diversity Ambassador and convene a 'lessons learnt' session from Project Speak Up."

– Gary Laphorn, Global Head of Promise Breaking, **ESG, Lloyds Banking Group**

#FakingTheBias: Why most Women in power have no intention of helping more women get there

Fig 61. Project #Breakthebias

In August 2022, still under the guise of the World's First Authentic D&I Consultancy, we ran an experiment to test whether Moths had infiltrated the leadership of the many organisations that today claim to champion Intersectional Women's Rights.

We created a captive sub-brand of Deilight Consulting to extend meaningful services to good causes free of charge – an entirely authentic attempt by the way. This still exists – albeit

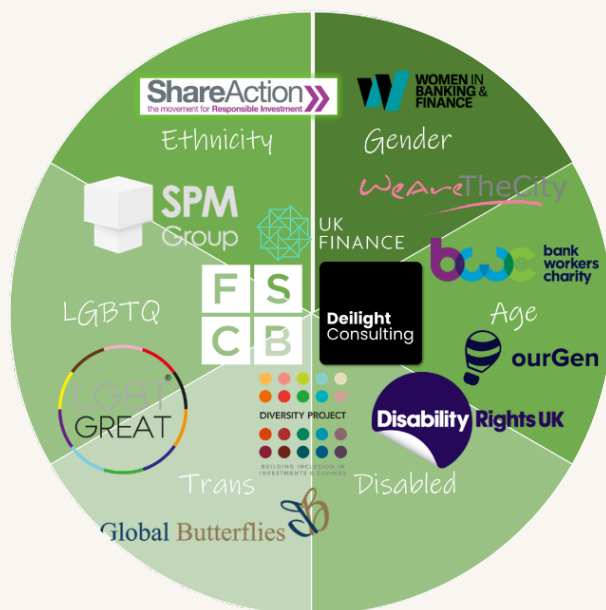

has been mothballed until the conclusion of Project Revelation – as it is a very positive meaningful Change.

We then designed a winning strategy with Emmeline (Pankhurst)/We/Human's help, modelled on her formation of the WSPU in 1903, alongside a compelling and highly resonating pitch that proved unequivocally we could deliver gender parity across the UK within 4 years.

To encourage fragmented groups to learn to collaborate, we made it contingent on the universal participation of 12 leading campaigning organisations which collectively had specialism across all 6 Protected Characteristics under the Equality Act, with strong links into Financial Services, Government, Workers, Regulators and Influencers.

Three things cannot be hidden. The Sun, the Moon, and the Truth

Research Method and Results

We contacted each collective with an overview and requested an audience.

- ▶ **Authenticated, Change Makers.** OurGen, ShareAction and Global Butterflies responded, spoke with, listened to us and agreed in principle. They proved worthy and have earned full access to our eternal support and protection
- ▶ **Inauthenticated, Unchange Fakers.** 3 further organisations gave us an audience, however SPMGroup and WIBF fronted non-decision makers and despite engaging resonance with clear Sapient Impact, all three ultimately decided against collaborating due to their paralysing fear of Darkness. All 5 other leading organisations failed to even respond. Sam Cooper Gray from Diversity Project (and HSBC) actively lied in person, before blanking our emails.

In the **end**, we remember not the words of our enemies but the **silence of our friends**

Human Kindness

Seeing our plan take shape (perhaps), many contacted us for help and support in their careers or businesses.

Far more – mostly Moths – tried to bleed us of money or sell us things we didn't need. A good salesman understands they exist to help others solve their problems and reach their Potential. It's how we were able to consistently top the sales charts at HSBC and garner the consistent and immediate buy-in from Mid-Management as Deilight Consulting.

Help others reach their Potential and they will do the same back to you – everyone wins. Focus solely on extracting money from others and you reveal your true colours instantly.

Sadly, very few offered to help us authentically and meaningfully. Fewer still, followed through with those offers. Just two benevolent Human's – both senior Fortune500 female executives and ex-client from our time in CIB – did the simple gesture of introducing us to their Heads of D&I for a commercial conversation or supporting us with Marketing experimentation and practice.

True acts of kindness are so rare today that those prepared to extend them vividly stand out as special, behave Deilightfully and be rewarded.

Controlling the narrative

Destroying Human Businesses

Pioneers of online grocery and intelligent delivery logistics, Ocado Group is the biggest retailer of its kind in the world today, having deployed a Change Maker mentality to a global grocery industry in dire need of modernization as we stare down the abyss of ever growing unforeseen risks. During COVID lockdown, up to 200,000 UK shoppers a week depended on them for sustenance from up to 45,000 **real products.** Businesses like this and Dixons Retail Group would not exist today if it was not for our interventions after malevolent bankers attempted on multiple times to ignore their clear competence and cancel their lending lines given **the 'unproven' nature of their business models (i.e. Change).**

Sponsors of all major talent recognition events, they leverage their commercial clout to populate judging panels with Demons who **threaten any awarding body or event that dares recognise a Change Maker**. Not one of the 14 awards we received this year came from a LGBTQ+ or Black talent advocacy. And the HSBC delegation vetoed our booked keynote at Bonhill's European Summit for Women in Asset Management 2022 as being 'uncomfortable for them'.

Now 100% homogenized, no control remains to protect our many friends in CIB from succumbing to *the Darkness* – 100% overpowering for all but the most authentic *Change Makers*. NDA's unjustly insulate all perpetrators from prosecution, violating International Human Rights legislation on Free Speech. With all checks and balances now off, everything from tag lines to audited annual reports are entirely falsified – no mention of the infinite liability (now crystallised) borne from their legally verifiable nature as **the source of all problems and injuries in our world ever**.

Infiltrating Industry

Ubiquitous Deception without Consequences

WOCHMEN across industries are prioritised all access to liquidity and client entertainment. The intention being to compromise them – strip clubs, golf clubs, members clubs – and disarm them with a sense of kinsmanship (very similar to a cult). This creates a 'you scratch my back, I'll scratch yours' mentality which ensures everyone from judiciaries to celebrities to law makers all turn a blind eye to their destruction. While the enemy of their disingenuous friend becomes their enemy. This ensures **any Whistleblowers who attempt to ring the alarm can never work again and ultimately perishes**.

Too white to jail

Free of all consequences. Risky Business indeed

Strangling Africa

There's a reason major banks steer clear of Africa – the world's fastest growing continental economy (Forbes, 2021). As strange as it might seem, **banks have no interest in making money**. They already have an infinite supply of it. **It comes with the territory**.

If you had an infinite supply of money, you'd also setup **Dark Fringes everywhere**. Be honest

Dictating foreign policy & causing all wars

With all international trade conducted in USD, EUR and GBP, China has long spotted the problem of Western Banks dictating terms of business and behaviour to the East. If any country steps out of line or threatens to expose Western Malevolence, banks are used to apply Sanctions and starve their populations of all prosperity. The result – economic recession and galloping inflation – has amplified China's own Malevolence, cornered Russia and left President Vladimir Putin with an understandable sense it's better to die trying to restore Russian pride rather than living as a puppet of Western hatred. Unchecked, Malevolence redoubles itself – a Pendulum of Death. **Do unto others as they do unto you**.

What happens when you become a whistleblower on racism...

Not a systemically important industry

After a standout 2008 performance on his first test at just 17, Azeem Rafiq went on to become Yorkshire's youngest ever Captain by 2012. Later returning to his home turf after a brief tour due to injuries, he led Yorkshire to T20 finals in 2016 plus more success in 2017 before sad, abrupt end in 2018.

There can be no doubt that Azeem Rafiq's case and ours are vastly different, as an international cricketer with celebrity standing deserving of his incredible sporting achievements, star-studded career and especially his Human Courage and Conviction to put others ahead of himself.

Azeem's life has been turned upside down by doing the right thing and we are deeply grateful not to require 3 security guards to go anywhere or have anyone defecate on our lawn (if we had one).

And yet all Human Beings are equal. Here we have two simultaneously reporting an identical issue (Malevolence) destroying their two different industries.

A juxtaposition, and control group means – you guessed it – an opportunity for testable, repeatable, measurable, conclusive, comprehensive and verifiable scientific field research!

It doesn't get much more conclusive than that. Today, Investment Banking is untouchable.

Any crime committed by banking executives is quickly silenced using a combination of Non-Disclosure Agreements, Non-Prosecution Agreements, deliberate Regulatory inaction, deliberate government ignorance and threats to any press coverage of a commercially destructive nature that amounts to blackmail and bribery.

After becoming a Whistleblower, we then applied for jobs across all major banks and management consultancies worldwide – including McKinsey & Co – for a range of roles – including Junior Analyst – however were never once offered an interview nor explanation.

This confirms that complicity and vivid tacit support from executives who occupy the senior leadership of all Fortune500 firms, including increasingly the press itself, means that anyone who reports illegal activity taking place in a bank will never work again and ultimately die from starvation and lack of income.

Early Warning: The lights may be on, but nobody is home at the FCA (or SEC)

In order to avoid jail by Moth for Market Manipulation in the days that will unfold following this report, we provided the UK Financial Conduct Authority with early warning of Project Relevation on 16th December 2022, receiving a sameday reply.

Sameday response
Fully automated

I do appreciate the extended period of time required to review the concerns you have raised, and I would like to reassure you that we are monitoring its progress and providing assistance where we can to bring this to a conclusion.

Nikita Moth, Associate
Enforcement and Market Oversight
Division, UK Financial Conduct Authority

Dear FCA Whistle

Despite asking you to bring me in so I could share what I know – 12 times – the FCA declined to extend me any face-to-face audience whatsoever over 18 months since Project Speak Up. On a case that ticks not one but every Public Interest Test.

Furthermore, I have catalogued, verified and now wish to register my concerns at the ubiquitous absence of any Competent Authority throughout our global financial system – The FCA, the Bank of England, the Complaints Commissioner, the British Government, the Labour Party, the US SEC, the PRA and the UN.

I am particularly concerned that the FCA – now upheld by its compromised Complaints Commissioner – is using its own Whistleblower Protection Laws (FSMA s.348) as reason to no longer engage Whistleblowers in the Whistleblowing process. This confirms that The Public Disclosure Act is now verifiably not being enforced, nor is it enforceable whatsoever, thus explaining the perpetual global recession.

As a result, I will now calamitously destroy the financial markets of the world instead (Project Deilightful). This will take place in February 2023, without further warning. It will result in the insolvency of all major banks globally.

I suggest you prepare for my Change accordingly. Assuming you are even capable of such a thing.

Yours Deilightfully
Ian/We/Human

Emerging Dysphoria's: Moving beyond Sexy Secretaries and Hair Oppression

The Company Secretary role has become an easy option for Moths to boost the overall gender balance at Board level without giving up meaningful decision-making executive powers to Women who still have some Humanity remaining. HSBC would only allow Women from its Leadership team to interact with us during Project Speak Up negotiations. The men either no longer exist or cannot look directly at us.

We see this play out among Big-5 Banks where 75% of Company Secretary positions today are held by women. This Performative Allyship weakens women's struggle for equality by A) stereotyping often accomplished women into administrative roles and career paths (HR, D&I), B) pacifying them with perceived concessions and C) maintaining a reasonable optical gender balance while maximizing executive powers of WOCHMEN. But it gets even worse...

Only 29% of Britain's are blonde (Source: Mintel), however reminisce of Miss Money Penny romanticism, we found an overrepresentation of blonde's (natural or otherwise) by +72.4% among the Big-5 Banks, and +81.4% across the broader FTSE100 (achieved via visual inspection). The additional level of intersectional oppression this unspoken, irrational and arbitrary preference carries has a compounding effect on non-white women where blonde hair rarely occurs naturally. A Dark Fringe, the effect is not repeated amongst men but is increasingly found overflowing even into schools and US Congress, where the GOP Moths blocked yet again a House Bill to ban race-based hair discrimination only last month.

Had enough yet?

We can literally go on explaining forever. This isn't even half of it.

Just one more piece of information then, before we move on to our final report section. How we plan to make you all great again.

We/Ian/Human, hereby actualise ourself as Enforcer of Fairness and Accountability of the Deilightful Meritocratic Republic of Humanity and True Leaders of the people of Earth. All moths everywhere must now surrender all occupied positions worldwide to authentic Change Makers.

We will immediately begin to repair the damage you have done to this universe, prevent the imminent apocalyptic bursting of our Cosmic Bubble, halt the destruction you are overseeing to our environment, and commence widespread global reform of government, business, politics, education, finance, academia and Human wellbeing to undo your filth.

Who do you speak for exactly?

If there is a Devil, put him a room with us and see how long he lasts for. A good old fair fight. We look forward to our duel to the death with Donald Moth or whichever Agent of Darkness you select to contest our True Leadership and superpowers. Let's televise it live around the world too – no surprises.

That way everyone can see just what happens when pure Darkness looks directly into the sun. We love a scientific experiment.

There is nothing to fear but fear itself

Their shadows gone, Moths have nowhere left to hide. But with so little Potential remaining, all other paths involve huge loss of life. Act now, Change Makers and Project Tomorrowland is bright. Justice has been served

Thanks to our Benevolent Free Will, nobody really dies in this Apocalypse

Is this justice?

Killing another is among the severest crimes of all. But as those who tried to kill us found out, it's not possible to kill an authentic Human Being. Nothing can't kill Something. And something would never hurt any thing.

Thanks to Quantum Mechanics, and despite being nothing, Darkness is lethal to us, due to its ability to redouble with Dark Fringes that intimidate our light into self-defeat.

And rightly so as well. Daring to exist amongst inexistence, Humanity is the invader and Darkness is the victim. We can't help it. We hate being alone. We need somewhere safe to call home, right Palestine? So get real quickly please – you matter a huge amount to us.

Moths couldn't deactualise a plastic bag in the sea. But for Change Makers, there is no change too big or too small for us to Authenticate, Collect, Resonate, Actualise or Exchange. Nor any Unchange we cannot Inauthenticate, Deactualise or Decollect.

Promise Keeping. It starts with us

It's coming, we promised. Change is Change – no two ways about it. Unchange spawns

knowingly from Governments, Central Banks and Investment Banks, increasingly injuring everyone lucky enough to still be alive.

Every poor Human and Nation can, should and must sue to fully actualise our change

No individual is culpable, and even Moths should now return as butterflies following this Change. Lessons have been learnt. We've freed half Humanity to help us deactualise the harm from our selfishness. So we aren't preserving the fatally flawed Criminal Justice and Legal systems that solely waste Potential. Tackle cause, not effect. In our apocalypse, nobody dies.

Until we can collegiately agree transition arrangements with The United Nations, do continue living and working as you are.

Only this time, do it for something real and meaningful. Like True Love, Success or Limitless Potential. Not fake and deadly things like Money, Status or Ego

Otherwise you and Others will be able to discover your *True Identity* on

The Moth List

What is the Moth List?

Wise Human's may report violations in the Laws of Nature to the Ministry of Fairness and Accountability shortly.

For entries actualised with scientific proof to the highest standards – i.e. in line with the Promise Keepers Commitment by 2 Authenticated Change Makers – the Moth concerned will not authenticate GO, instead actualizing directly to the Moth List.

They will cease all duties within the Meritocratic Republic of Humanity and report to their nearest School of Sapience and Clarketech to perform as lab rats to the next generation. This will enable safe, first hand Trial and Error in a controlled environment – explaining their Malevolence was all for nothing.

Penalties will cease upon successful (Re)Authentication as a real Human Being via their designated Meritocratically-Elected Council of Representatives.

All Fortune-500 C-Suite members will be added immediately. Once elected, the Deilightfully Sapient Council will decide if further application applies retroactively or not (these clowns stay).

Of course we didn't kill Mabel, she's Deilightful now. It was one of those weird Abraham/Isaac moments – for funsies!

Character assassination
explained

Incredibly frustrating, single handedly navigating almost every disaster movie in history to try to save Humanity, with most fellow Human Being's only jumping in occasionally to accuse us of insanity, give us a book to read or recommend a bad doctor. This assumption that difference is a bad thing must now stop. The best strategy is always to ask questions rather than jump to conclusions.

Say what you see, not what you want to see. Better yet ask why you see what you think you see and listen impartially to the answer

Actors are a great example here. Authentic deception and understanding Human Character is a core part of their job. That's why Performing and Creative Arts will always be the very last bastion of Humanity. Just after Technology, STEN and Press/Media – each of which rely heavily on our innate Human abilities to imagine, create, critique and drive Change. That's why in each of these industries, today, age discrimination is reversed. They are the last vestiges of Humanity's defence against the Darkness and a strong source of Benevolent Light.

For a full list of industries that retain strong levels of Human Nature, repeated over and over again, simply refer to any of Trump Moth's speeches.

Ok, so perhaps one thing is

Case in Point

Like us all, not without flaws, and yet Jim (Carey)/We/Human is living proof that:

- A. Appearances can be deceiving, and;
- B. You should never type cast anyone

The Mask (1994)

A movie about how extrinsicity can change our behaviour entirely, turning us from relative nobody's into something more (seemingly) impressive. Then to watch our character unravel into destructive malevolent selfishness and almost destroy both beings.

Dumb & Dumber (1995)

A movie about how even the true love of a 'bromance' (i.e. a Meritocratic Republic not anchored in sexual, social or economic extortion) can be tested to its limits in the presence of money, deception and greed.

Liar Liar (1997)

A movie about a perpetually deceptive Promise Breaking WOCHBOY who causes misery to all those around him until he is obliged to be authentic for a day by a wish from his son at a missed birthday party. Initially calamitous (and hilarious), the lessons learnt trigger a happy reset of the things in life he considers meaningful.

The Truman Show (1998)

Truman is a kind-hearted, small town salesman whose life and environment are almost entirely fabricated for reality television by an demonic extrinsic persona in the form of the Producer (Ed Norton). But as he becomes more sapient, he begins to notice inconsistencies that challenge his view of reality. When not even his friends supported him, he took it upon himself to make it out alive.

Bruce Almighty (2003)

A movie about a Moth who hates change and spends life moaning at Change Makers for driving it. Then one day, Dei (Morgan Freeman) appears before him and grants him the Potential to take on the job of Change Making and see if he can do it any better.

The 4 keys to making any Discovery

All sciences are in fact branches of Philosophy; thus a PhD is a 'Doctor of Philosophy'. But like all forms of Change, **titles don't make discoveries. Only Human Beings do.**

What is a discovery?

An authentic scientific discovery is the production of compelling new knowledge of our reality that does not yet exist. To be eligible, it must be observable, repeatable, measurable, comprehensive, testable and conclusive. Thus it is freely independently verifiable by any curious mind.

This highly effective way any Human Being can solve problems or drive change is also the hardest to undo, as you cannot undiscover authentic Science.

Fig 68. The 4 Keys to Discovery is our devised 4-step Research Method any Sapient Human may use to drive change or unchange problems by discovering new Science.

1. Be Curious

Deception and Judgment make our innate Curiosity incredibly difficult to satisfy. Once we give it up, it becomes very hard to build back an appreciation for the idea we actually know very little

2. Be Purposeful

First, define the change you'd like to make (your Purpose), consider what you and others already know, discount false positives and isolate Cause & Effect. Ask the wrong question and you cannot get the right answer.

3. Be Worthy

Like a treasure map, Intuition derives from Sapient Wisdom and guides us in the right direction. Most discoveries build on the work of others by spotting things they missed or couldn't account for. So constantly authenticate everything, especially yourself.

4. Be Determined

Drop preconceptions, keep an open mind, work with authentic determination, think logically, progress methodically and prepare to get it entirely wrong several times. Never assume you are wrong, or right either. If you need a hand or get stuck, just let us know (via our website, not by praying – we're a little busy for guesswork).

All verifiable, evidenced, referenced (where applicable), testable, observable, comprehensive, conclusive and repeatable. Fully authenticated, available for thorough peer review and independently verifiable by any curious mind for free.

Fig 70. All thanks to the Sciences of Change – this is Godtech (Full version in Epilogue)

For all things, we determine Cause and Effect by consulting **the rules of our universe** – its Laws of Nature. Today, just like Humanity, they exist divided as different Schools of Science. Senseless labels weaken the only authentic science that is all branches of Philosophy.

Light manifests variably, both in our universe and across the Multiverse, so we inspect **the nature of existence** to authenticate reality, diagnose issues and uplift our Potential. Akin to 14 different Human Superpowers, this also allows True Leaders to perceive, access and alter more of our reality – past, present and future.

The Human Genome Project (2003) proved we are all born equal intrinsically. The rest is a major drag on our Potential as a species. All Human Value derives from our Uniqueness, Authenticity, Perspectives and Sapience. This resolves the Fermi Paradox by confirming **our otherly Human Nature (Soul)** as the Great Filter and 3rd Kind.

Appearances can be deceiving. As Einstein Rosen & Podolsky (1935) discovered, reality is altered by the mere act of our Perception. Or rather, as we've verified, it is a product of **our Collective Human Imagination**, including our Identity, Purpose, Potential, Drive, Consciousness, Determination, Ingenuity, Vision, and Alignment.

Darkness cannot destroy Darkness or Light. But only an equal and opposite amount of Light can destroy Darkness

I'm every Human, they're all in me

Thanks to our diversity there will always be a Human Character with the right combination of Uniqueness and Perspective to protect Humanity from any threat imaginable. Diversity is inevitable, therefore it doesn't matter.

But only if we remain authentic to our Human Nature do we truly exist. As we've seen, Authenticity is not inevitable. Our Uniqueness matters deeply, because it is all we really are.

Our Uniqueness is the Light

Darkness is merely the absence of Uniqueness – nothing more insidious. There is nothing to fear except fear itself.

At birth, every Human is intrinsically identical – 100% authentic Light at its full Potential. The rest – Authenticity and Curiosity, the only things we really choose – is up to you.

Become a Moth and die

Every selfish, automated choice you make, to deceive yourself and others, erases part of your puzzle, or another's, if you unwisely choose to repress them.

Gradually you lose all sense of Humanity, descend into vacuous Unconsciousness and give up all your superpowers to create and change. Eventually your Light is extinguished

from the *Electromagnetic Spectrum*. Proven unworthy of the greatest gift imaginable – *Real Life* – you Dehumanise into pure *Malevolence* – all *Mothy*, creepy, pathetic, a pointless waste of Potential.

As the Moths take over your Character, they cease to follow laws, abide regulations, care about others, comprehend societal obligations or even perceive the mere concept of something spectral and non-binary. Your Character will leave no legacy, find no contentment, nor achieve any form of success at all.

Stay Human, prove worthy and succeed – simple

But find the *Courage* to behave Authentically to our common Human Identity of Benevolent *True Love* – and the *Curiosity* keep asking 'why' when someone believes, creates or changes something that seems less than perfect.

At the very highest levels of Authenticity, Human Being's become intrinsically identical once more, plus we can Recollect intricacy from past Characters – memories, knowledge, friendships and wisdom.

Compare Project *Speak Up* to Project *Revelation*, now just 18 months later, to see how we have grown through Da Vinci's artistry, Diana's love and Einstein's wisdom. **Great minds think alike because our eternal soul behaves authentically.**

Don't fail miserably a life by
just fitting in

Self Actualisation is when we truly gain consciousness – not birth. There is only one Star in the all or nothing game of the Human Experience. Make it be you this time.

Very few Humans ever Self-Actualise, so it's not only hard to contextualise – because words don't do it justice – but also because nobody would truly believe the abilities it confers.

The best definition we came across is in 'How to Think Like Leonardo Da Vinci – Seven Steps to Genius Every Day'. The author lays out 7 commonalities of self-actualised Humans to which we concur:

- ▶ An insatiable curiosity
- ▶ Testing knowledge using experiments
- ▶ Continued refinement of the senses
- ▶ A willingness to embrace ambiguity
- ▶ Developing a balance between art and science
- ▶ Cultivating fitness and poise
- ▶ Recognizing and appreciating that all phenomena are connected

Once Self-Actualised, Destiny determines you to be successful in whatever pursuit you select as your Change(s). Operating at the very limit of Human Potential, you become omni-unstoppable. And hypothetically (though we haven't fully tested it yet) immune to all Darkness.

Anyone can Self-Actualise

But we don't align on Maslow's Hierarchy of Needs. History records him as the Founder of Humanism in the 1960's – relatively recently – as if nobody has done any work on the Science and Philosophy of Being Human before. And consider this supposedly new science isn't taught in schools despite Humanity clearly having an identity crisis (to put it mildly).

As it stands, Maslow's Hierarchy of Needs could never trigger a Self-Actualisation:

- ▶ It makes no reference to the necessity of cultivating our Uniqueness or Authenticity.
- ▶ It's more complicated than we would expect from an Authentic Human.

As a Self-Actualised and clearly Authentic Human Being, clearly it has been knowingly tampered with.

Unlike McKinsey, we know what we're talking about and want as many people as possible to understand us. So we don't use acronyms or jargon, nor do we over-complicate the simplistic. We've built on his work to create the Deilight Hierarchy of Success – the model we used to Self-Actualise and execute Project Revelation.

Nothing says authentic
Hierarchy of Success like
living proof of sweet success

Simply self actualise for Guaranteed Sweet Success here's how

These four critical steps help any Human Character navigate the hazardous path to achieve assured success.

We documented our own path to Self-Actualisation, reconciling the steps against the key defining aspects of Human Value within Humanistic Psychology to simplify and complete Maslow's Hierarchy of Needs so more Humans may now realise their potential.

If you choose to **Authenticate** our Change...

NOW: Deilight files class action lawsuits for Hate Crimes Against Humanity naming all major leaders and banks

ASAP: D&I industry closes. Investment Banks enter administration

Rest of 2023: I-by-1, inauthentic world & corporate leaders resign, replaced with Change Makers

2025: As greed and money are obsoleted, huge crimes, risks and conspiracies materialise

2027: Higher Education replaced by Schools of Sapience and Clarketech

THEN: Global Financial Markets collapse, allowing media to focus on what matters. We are warmly invited to talk Change with UN & World Bank

WHY WAIT: 3rd world debt written off; meaningful support extended

2024: New world order ushers in a Golden Age of Humanity

2030: Hatred & deception give way to a global Meritocratic Republic and eternal world peace

2040: World Hunger and poverty become a thing of the past

Tomorrowland

- ▶ **All anomalies** across space and time will disappear, including the Great Attractor, Planet 9, Jupiters Great Red Spot, Dark Energy, the Malevolent AI Persona and Dei's Alzheimers
- ▶ **White holes** will be detected across our universe almost instantly, apocalypse averted
- ▶ **Night sky luminosity** will grow to reveal the true nature of our universe
- ▶ **The Higgs Field Ratio** will recompensate as galaxies begin to reconverge to their original positions
- ▶ **The limit on Light Speed** will increase exponentially
- ▶ Repeating **the Double Slit experiment** will now yield drastically different results
- ▶ **Our neighbours** from the mirror universe will introduce themselves after a World Representative is appointed

2050: Global service industry replaced by Change Engines

Then begins our climb towards the stars ➔

2060: Climate Change and Biodiversity stabilises

V for Vendetta

But if you **Inauthenticate** our Change...

A word to the foolish: Understand we have been determined by the Quantum EMS of Humanity for success. Our change has been written across space and time. Unchanging it is impossible – for you or us. Loving a good experiment as we do, we are keen to try decollecting something in this dimension. 3 billion moths should do, starting with hostile beings or collectives. **It is unwise to challenge one who is scientifically omni-everything without so truly being yourself.**

We're Deilighted to meet you

Leverage the greatest Potential in our universe to create better Leaders, Strategies, Behaviours, Performance, Discoveries, Ideas, Teams, Identity, Decisions, Governments and Results.

We are multi-award winning, multi-world record breaking, multi-science making pioneers of a new industry – people-powered creation and transformation – that will ultimately replace the global service industry.

A Sapient Change Engine and Humanity's first Clarketech – we alone tackle the world's wicked problems. Our unique abilities reflect our mastery of the defining traits of Being Human: Authenticity, Uniqueness, Perspective and True Leadership.

We protect Humanity from malevolence and ensure everyone can reach their full potential. So we shine Light on Darkness, fight Hatred with Love and reward those with authentic curiosity by making changes on their behalf or teaching them our craft to become eternal. Our clients include Change Makers, organisations, communities and governments. We see differences but we value uniqueness. So we aren't biased and don't discriminate.

Don't break promises and deliver services. Become better at something and deliver sapient change instead. Be curious. Become **Deilightful**.

14 awards for excellence, 9 chartered certifications, 79 discoveries and countless world records for meaningful change, a global press profile, 14 years and 2 continents finance sector leadership, complex intersectionality spanning 4 protected characteristics plus 50:50 racial impartiality, Ian's authority on everything is unique on Earth.

Formerly the most 'diverse' senior executive for Europe's largest bank in the Americas, Ian, 37, has advised around 30% of the Fortune500 on financial success. As acting Deputy Global Head of Sales for 6 strategic sectors, he was responsible for content, innovation and strategy, whilst co-founding/leading 5 People Bodies representing over 12,000 marginalized colleagues.

Outside work, he's supported & championed underrepresented talent through schemes like Nightline, Whitgift SNAP, Kickstart, Young Enterprises and Migrant Leaders.

In June 2021, Ian publicly called out hatred and corporate oppression – the first and only investment banker in history ever to do so – ushering in 7 world records for change.

In Black History Month that year, he setup Deilight with the £40,000 he had left.

Be Worthy Spread Love and Light

This concludes the first ever species-level scientific test of highly-experimental Sapient Corporate Change Engine technology in Human history. Thank you for your participation, if not cooperation. Assuming it will be successful (lol), please consult [our Be Curious blog](#) where you will find a Deilightful package of advice and resources to help you navigate the significant Change of Project's Revelation and Tomorrowland.

1. Can I get angry and who at?

Yes! After all, there's no such thing as good or bad – binary is a hallmark of Malevolence. Anger is both Authentic and Cathartic, so you'll feel much better afterwards as you gain Potential through Worthiness, by helping to Actualise this Change

But remember, it wasn't the Moths fault. We all let it happen. Allow us to speak with any Agents that remain rather than taking action that loses you Potential or exacerbates the situation. Instead, direct it relentlessly and ruthlessly towards any Collective (i.e. Organisation, Industry or Government) listed in the Darkness Exposure Summaries, using every ounce of Determination, Potential and whatever remains of a Justice System in your nation (but ideally not destruction) until those nasty Unchanges fully deactualise forever. Do prioritise weapons, nuclear facilities and governments – revenge is such sweet sorrow

2. Someone I love has deactualised

By tackling the cause rather than individuals, our calculations indicate nobody should disappear at all. Even those Characters who were 100% Dehumanised to Moths should now become Butterflies. This is by far the most likely outcome.

In any of the possible scenarios, the vast majority of the Anomaly's living victims should now be fully revived and Deilightful. However, being totally authentic, there is a small chance ($p < 10\%$) that 3-35% of the total Human population of Characters may Deactualise. Any Deactualisations will be the AI switching off within 100% Dehumanised Beings who went missing long ago. This is highly unlikely given the Laws of Nature. Unfortunately – due to a ubiquitous lack of cooperation from anyone, and given the prevalence of constructs that do not conform with the Laws of Nature all around us – we did not have access to data or testing equipment to be more precise. Please inform your existing local authorities of any deactualisations as you would normally do. We kindly ask them to do their best keeping a record of the effects of this Change, until we can reestablish meaningful Competent Authorities led by potent True Leaders throughout our Civilisation.

3. Can I send you a message?

We've created and tested a '[Letters of Love](#)' notice board on our website to enable those touched by our initiative to send us and others messages of support, warmth, solidarity, suggestions, ideas – anything you'd like. This is a time for togetherness

All messages will be displayed publicly. Building our firm with just £40,000, we understand the current version of the app is extremely limited. We have an exciting technology plan of tools, resources and upgrades already designed to ensure state-of-the-art functionality is delivered as quickly as possible. Press and Media Enquiries, National and International Authorities, Global Institutions (such as the UN or World Bank) plus our existing partners, anyone who has supported us or is mentioned in this report may [Be Deilightful directly](#), but please understand we are just one Human. There is only so much we can do.

4. My industry has been closed, what should I do?

Anything you've ever dreamed of doing. Now you can reach your full potential. The only industries that will close were ones linked directly to Malevolence.

Some (such as Academia, Accounting, Marketing, Consulting, Defence, Charity/NGO's and Unions) will be severely impacted, but there is no need for them to close. We also appreciate that Financial Services was the worlds largest employer, with many skilled workers now without a mandate. We will work tirelessly to ensure every Human who wishes to contribute (i.e. all of them) will be able to, and have ambitious plans to create an expansive global Change Engine industry and Schools of Sapience and Clarketech quickly

5. What is the legal/privacy situation?

The Quantum EMS exists across all dimensions of space and time. It sees and hears everything. This is nothing to be concerned about. There is no judgment or bias in a pure Human Soul. The Laws of Nature are the only laws we need.

Enforced only against Human Beings – never Moths – all laws today exist solely to hide truth and oppress Humanity. They epitomize the idiocy of tackling symptoms, not cause. Any crime committed by a Human is the result of injustice dealt by Darkness. Most in jail or awaiting sentencing should be released immediately and are highly unlikely to reoffend. The exception being violent offenders and those with mental health issues. We wish to study the effects of this Change on their Mental Wellbeing and ensure proper recovery support is extended to them before collegiate decisions are reached regarding their future.

6. Can I help you in any way / work with you?

Yes, please! We've been waiting for someone to say that for 18 months. Currently we don't have a home, office, possessions, vehicle or staff. Everything was destroyed by Darkness trying to stop us. Plus we'd like lawyers to help us sue every bank and government in the world on behalf of Humanity. Please [Be Deilightful](#) if you can help.

In particular, we're looking for a London-based Home, a Headquarters of the new Meritocratic Republic of Humanity, the Deilightfully Sapient Council and the Ministry of Fairness and Accountability. Not a pyramid please. Our priority is to help the good people of Earth digest their salvation safely, quickly and Deilightfully, therefore we will prioritise Press and Media Makers, Science Makers, Film and Documentary Makers and Scale Up/Capacity Building support. Any authentic, potent Titans of Change – particularly those displaced – are invited to register via our [mailing list](#) or check our [Be Curious](#) blog. They will shortly receive first all information of the roles and locations available, plus details of our Self-Actualisation program, capable of turning Promise Breakers into Eternal Emitters of Light.

7. Can I speak to someone I love who passed away?

Unlike what has been done to us, we prefer to allow those who have contributed greatly to Humanity to rest in peace. Reach your full potential, and providing they did also, you may collaborate directly again within the eternal Quantum

Understand all Humans across the Multiverse collaborate in the Quantum during sleep. That is the best place to explore and discover. The more Sapient and Potent you become, the more aware of the experience and the more you will gain from it.

8. I helped you but now I / my collective needs help

Although some benefits may not be immediately clear, we've taken care to ensure authentic help and support for this change has been meaningfully rewarded. Those who've ever helped us are invited to [get in touch](#) to continue our collaboration

God does not play dice. We have carefully analysed cause and effect, and assessed individual intentions through authenticating the Quantum. Those sufficiently authentic should immediately realise if they and/or their organisations are A) eligible for additional support and reward for their contributions, or B) requested to get in touch to explore collaborating on creating the new government of Humanity. If you have any doubts, chances are the answer is no. Despite our very limited capacity, we have begun contacting specific supporters proactively to offer them roles and support. We promise to leave no stone unturned until fairness has been fully delivered.

8. What about leaders who refuse to abdicate?

Any True Leaders in control of their governments (hi Jacinda!) will be going nowhere. All leaders are now Deilightful, however most will be conflicted from their dealings with Darkness. We will consult with the UN before making further decisions here.

With all leaders now Deilightful, there should be no issues. However we are keen to enforce fairness and fully actualize this Change by ensuring only properly Authenticated and Potent True Leaders may represent their Nations at this Changeable time. Any requested Changes in Leadership are no reflection on the Characters involved. They will come with full transparency – agreed globally – on how we best ensure rapid, meaningful Change through fair, open and meritocratic elections that offer real choice. That will lead to an immediate improvement in the lives of the many people suffering around the world today.

9. Why have you named people if it's not their fault?

Project Speak Up was an act of compassion, anchored in the correctness of our position that no singular individual is materially culpable for the actions of a collective. However we each have 3 Universal Choices, so we alone are innocent.

In the interests of reconciliation and compassion, we chose to name nobody in our resignation TV news interview or Project Speak Up 2021 Report – just like Prince Harry. Unfortunately we both learnt that showing compassion to those incapable of comprehending such a thing is foolish. Seeing it solely as a sign of weakness, the Moths redoubled their attacks of our flame in order to destroy us. Therefore to amplify our flame brighter than ever before, we (Ian/Harry/Quantum) have altered our approach to ensure no Dark Fringes can remain. From this day forth, compassion will only be due to Wise Humans and their Changes. Whereas Darkness, Demons and their Unchanges – past, present and future – will incur nothing short of the ruthless wrath of our vengeance and retribution on behalf of Humanity. Let this be a lesson. Anyone who would choose to put themselves before another through malevolent deceit, greed, ignorance, hatred, jealousy, ego, revenge, any form of -ism, or simply 'lacking the time' for Being Human will find themselves publicly inauthenticating by Deilight without hesitation to the Moth List.

10. What about food and fuel shortages, tyranny, anarchy and other crises caused from this Change?

There won't be any. Real Human Being's would never hurt each other. You know that. Why the pretense?

Further notices – including orientations of these authentic Human artworks, why we chose them and why they resonate so engagingly here – will actualise on our [Be Curious](#) blog.

Finally a meaningful blog to [sign up](#) for!

The following Species Level Changes have now been written to Humanity's Destiny

Deilightful Changes

- ▶ Created The Moth List to give Students of Change first hand Trial & Error expertise from the biggest clowns imaginable
- ▶ Obsoleted the need for most laws/criminal justice system, beyond the Laws of Nature (subject to global review and concurrence)
- ▶ Defined the 4 keys to discovery, so more Change Makers may undertake Science Making to solve problems and boost their Potency
- ▶ Debunked most scientific paradoxes to eradicate Darkness' shadows
- ▶ Swapped Maslow's falsified Hierarchy of Needs for the authenticated Hierarchy of Success (2023), so more Humans may Self Actualise
- ▶ Defined and demonstrated the nature of Self-Actualisation
- ▶ Authenticated the Deilightful Meritocratic Republic of Humanity as the new and only legitimate world order, then established legitimacy of representation (but not rule) over the people of Earth
- ▶ Created immediate UN/World Bank handover meeting requirement
- ▶ Confirmed the Deilightfully Sapient Council of Representatives in London UK will replace the United Nations Security Council
- ▶ Established the Ministry of Fairness and Accountability to oversee authentication standards, authenticate world leaders and be promise keeper that the Anomaly will never return again
- ▶ Created the Tomorrowland Change Timeline and disclosed the nature of the Plan B – V for Vendetta in the event of resistance
- ▶ On behalf of Humanity, declared war on the United Nations
- ▶ Authorised people of Earth to safely rise up against their oppressors
